NITRIFIED FIR SAWDUST

Nitrified Sawdust is an economical, general-purpose soil amendment that contains green mill sawdust blended with certified organic green waste compost and urea. Because of its highly granular structure this material offers good aeration and drainage. When used as a soil amendment it will help loosen heavy or packed soils and increase moisture holding capacity. Nitrified Sawdust can be used to top dress newly seeded turf areas or for turf renovation. Nitrified Sawdust is an economical component in soil blends.

SPECIFICATION GUIDELINES

Source Material	Fir Sawdust, Compost
pH	Minimum 4
Salinity (E.C.)	Maximum 3.5 mmho/cm
Organic Matter	Minimum 400 lbs/ cubic yard
Nitrogen content (dry wt.)	.5 – 1 %
Iron Content (if specified)	Minimum .08%

Percent Passing	Sieve Size
100	3/8"
95-100	1/4"
90-100	No. 4
75-100	No. 8
45-70	No. 18
