

# 319 LOST Leads Turned Into \$49,000 Of Sales

## Give Us The Leads You've Given Up On & We'll Use AI To Turn Them Into Sales

In 2025, it is possible to turn the leads you've given up on into cash in the bank...

WITHOUT hiring extra sales people, paying appointment setting agencies, or dialing the leads yourself.

Like this Debt Consolidation company...

This is a **sneak peek** inside James' campaign.

James owns a Debt Consolidation company, and every month, he spends a pretty penny with Facebook and Google in exchange for new leads.

James has a few sales guys and ladies. If he's being honest, way more than

he would like.

BUT like most of us, he's been told...

*"If you want more sales, you need more people on seats".*

Problem is, most of the leads his team dials... **don't pick up.** 😞

These people are used to dodging calls because they're used to being chased by their debt collectors.

So, when an unfamiliar number dials their phone... they don't dare answer.

For the first 48 hours, James' team **calls these leads every hour.**

And still...

Out of the 1000 leads they call, they're lucky if they **speak to half.**

What happens to the other half?

Usually... NOTHING!

For James, that's around **\$25,000 he wastes** each month on 'lost leads'

So, he agreed to a TEST! (*Small version of leads to "test" using the "Agnes A.I." Android. A "TEST" is also how we look for Profit Partners.*)

On day 3, instead of continuing with calls...

He decided to send 319 of those '**dialed to death**' leads to our '**Agnes A.I.**' Android.

Here's what happened...

<b>319</b>	Leads Fed to Android
<b>120</b>	Responded
<b>87</b>	Qualified
<b>75</b>	Booked an Appointment or got an Instant Call Back
<b>14</b>	Closed Sales

With each sale worth between **\$3,000 - \$4,000...**

That's around **\$49,000.**

That's enough to cover one of his employees' salaries, for the **WHOLE** year  
from a test batch of just 319 leads.

There are easily 20 **TIMES** that just sitting around in James' CRM, waiting to be  
worked.

James is super happy now! After all these old leads were earning him 100% of  
nothing!

In a single test, "**Agnes A.I.**" AndroidI has solved a problem he's battled against  
for 10 years or more.

James can now **REJECT** the idea that the **ONLY** way to make more sales...

Is to buy **MORE** leads and put **more 'people on seats'**.

He no longer has to 'make peace' with a \$25,000 loss each month because his leads won't answer the phone.

Instead, he can hand over his 'old leads' to our "Agnes A.I." Android' and let Agnest turn them into sales using SMS and A.I.

For the **first time ever**, James can bring more sales into his business at the same time as drastically reducing his overheads...

...so there's way more cash left over for him to spend however he chooses.

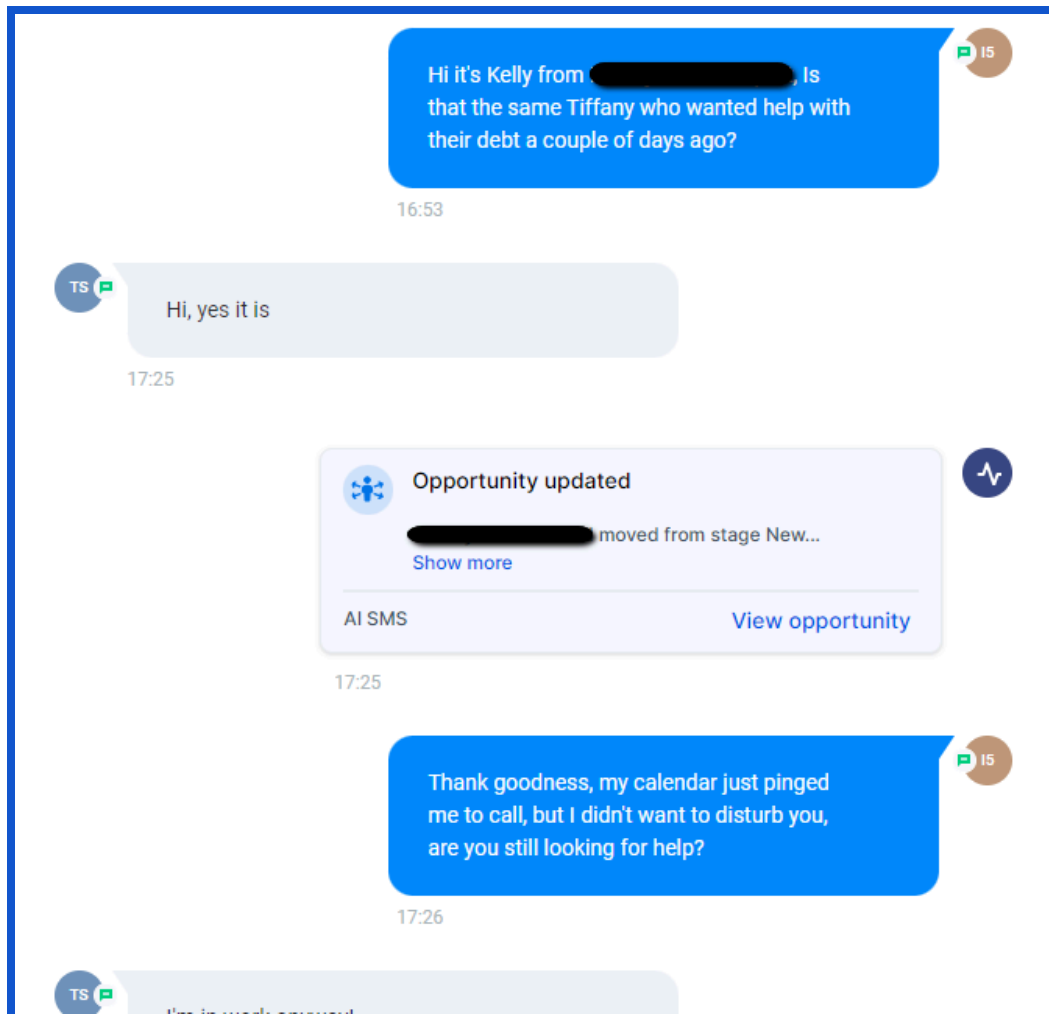

Why does A.I. + SMS work so well then?

Well, for one, people prefer SMS these days.

They don't wanna be blindsided by an unexpected phone call.

You don't get that with A.I. + SMS.

This is an **actual conversation** between the "**Agnes A.I.**" Android and one of James' leads.

The A.I. kicks off each conversation in a super personal way to ‘ring a bell’ in the prospect’s mind.

To get that “ohhh yeah, I remember now” response, which is why they text back.

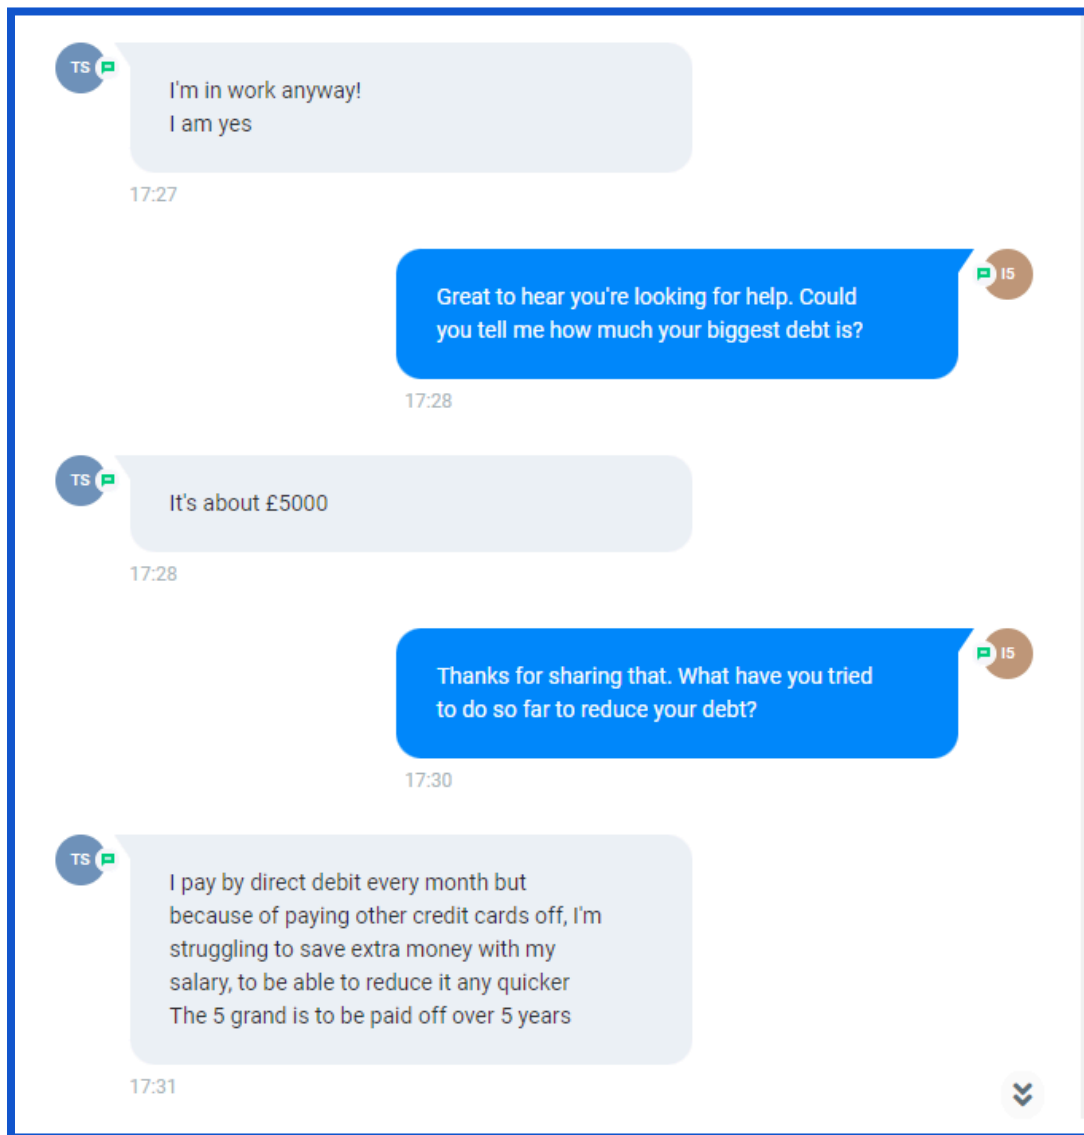

The next message is the **humble disarm** that brings down their “I’m too busy” defenses and opens up the conversation over SMS.

What’s ‘said’ in these first two messages can and will change. Believe us, we’ve TESTED and TESTED and TESTED!

The exact words don’t matter.

It’s the behaviour those words drive that’s important.

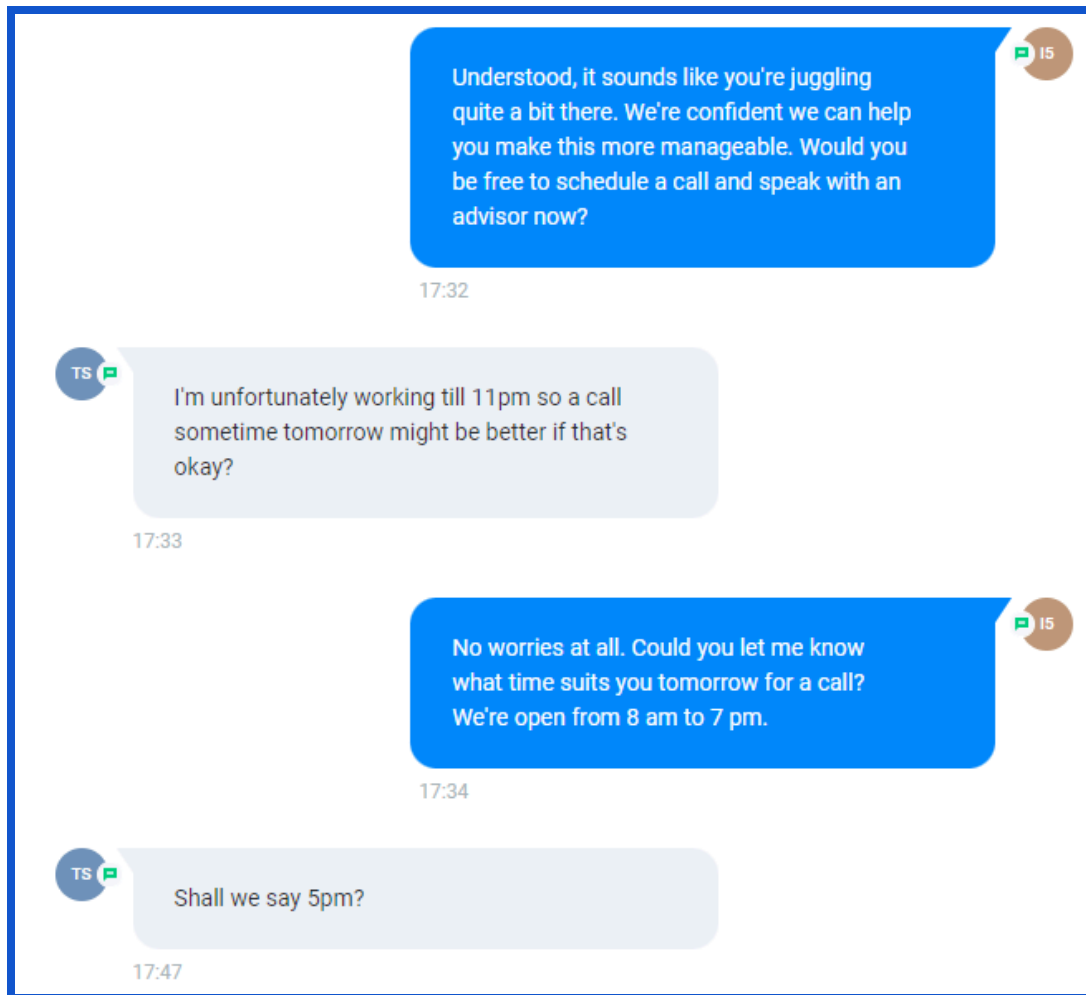

Next is the **back and forth**

The “**Agnes A.I.**” Android does a Q. & A. type session to qualify the prospect in a natural and friendly way.

It validates the prospect each time and also questions why the prospect even needs help to begin with. In some industries, this is super important.

Then the “**Agnes A.I.**” Android starts to **pre-frame the callback**.

Watch how the A.I. pushes for an instant call back and when that's a no-go...

It quickly switches tact and goes for the booked appointment.

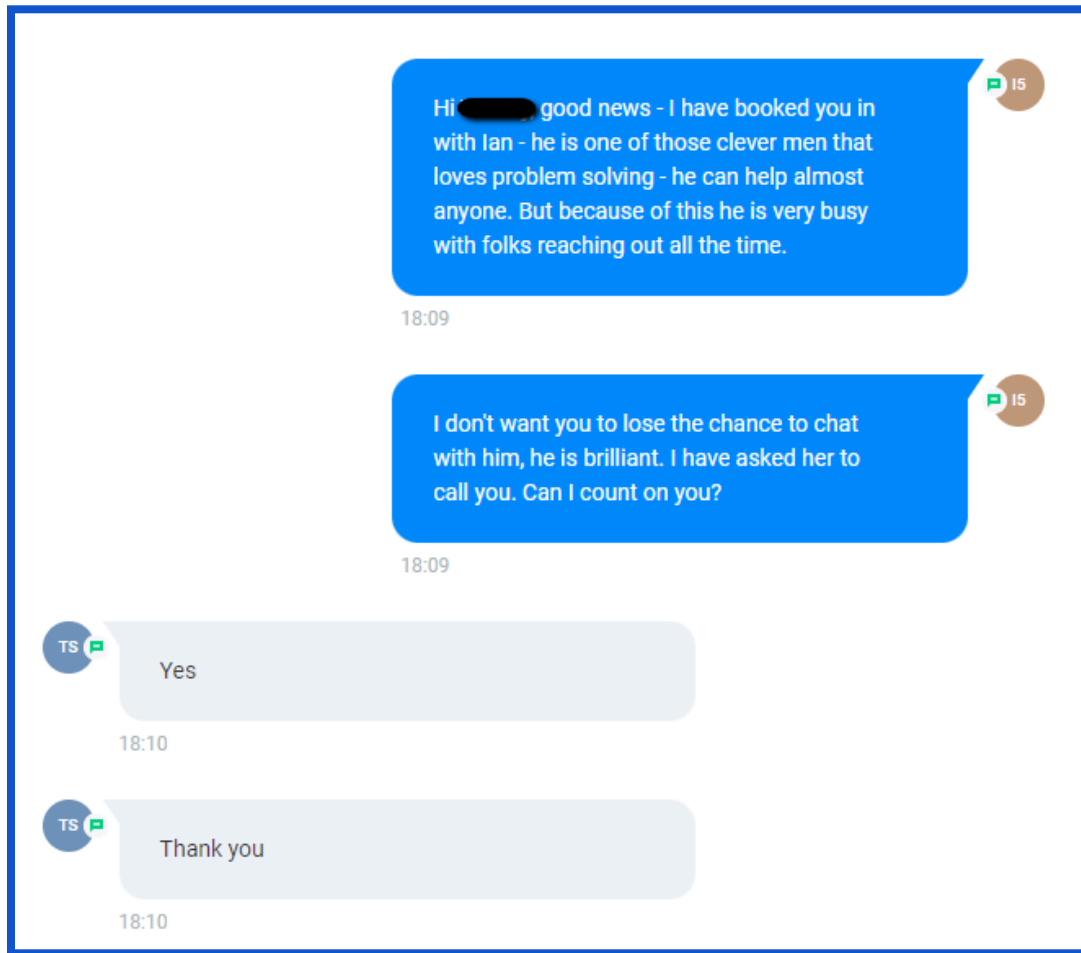

When the prospect gives a time, the **"Agnes A.I."** Android is smart enough to take that info and book the appointment directly into a calendar automatically. This of the reduced admin costs you will save.

Notice that this prospect says she was working until 11pm (this is way after James' team clock off for the day).

Which means his team could have called her phone every 15 minutes and she still wouldn't have answered.

Yet she was happy, relieved even, to reply and chat via SMS.

The “**Agnes A.I.**” Android’s final job is to **get a commitment to the callback...**

Most trained salespeople forget to do this, but the “**Agnes A.I.**” Android does not.

It knows to tie that call back to an **ACTUAL real person**, Ian, from this debt consolidation company's call center.

The prospect naturally feels way more **accountable and committed** to turn up to the call.

And guess what?

**SHOW rates are amazingly high due to the reduced pressure!**

So there you have it!

That's a real-life example of how our “**Agnes A.I.**” Android takes ‘dialed to death’ or ‘old leads’ and turns many into sales.

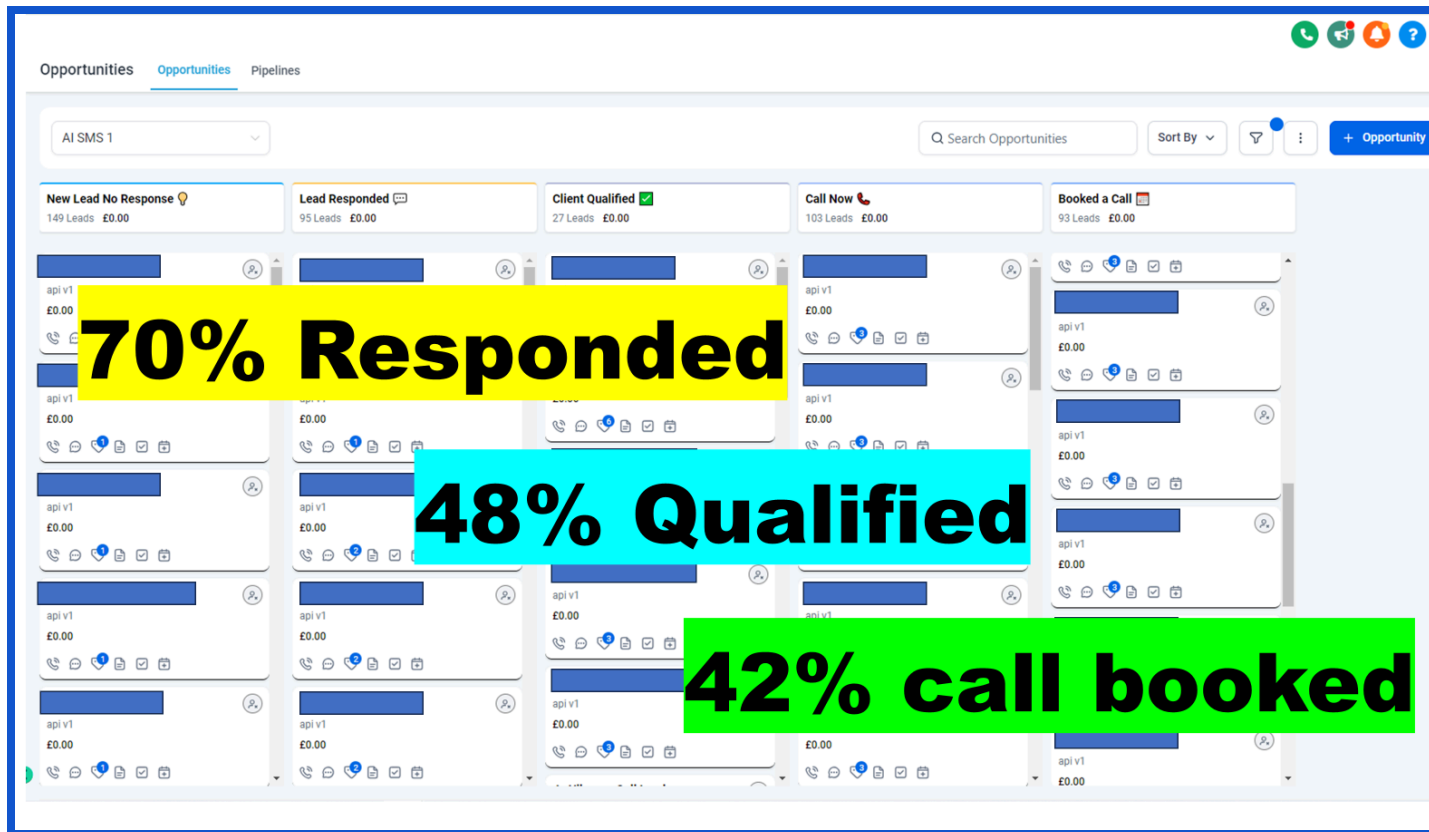

Now, the “**Android A.I.**” Android is going to get a higher rate of conversions out of a 3-day-old lead than a 3-year one. We can do both types of leads.

And the ‘numbers’ in every industry will look a bit different.

But so far, we haven’t found an industry that our “**Anges A.I.**” Android can’t help. The issue for you is not is if WE TAKE YOU on as a Profit Partner. (Smile)

## Let’s look at another Case Study. . . .

A Personal Injury law firm.

The “**Agnes A.I.**” Android’ was given 467 leads.

103 of them asked for an Instant Callback and another 93 of them booked appointments.

Even if only a quarter of those appointments turned into clients (which is very low for this business)

That’s still **49 new clients.**

Pulled from what feels like thin air.

Each client is worth, conservatively, \$2000 minimum to Simon’s law firm.

So that’s **\$98,000 of cash** that he wouldn’t have had without “Agnes A.I.” Android’s help.

## Let's look at another Case Study. . . .

What about a Home Improvement business?

Trial Results Are In...

---

96 dead and battered leads

- 38 responded (40% contact rate)
- 17 positive responses (so engaging with the bot after confirming they were the right person)
- 11 qualified for the service
- 8 booked calls (so far)
- 5 sold (so far)

There are also 2 which are technically outside criteria but they can monetise with some tweaks, and 5 who didn't qualify as they had already bought elsewhere.

These 96 leads were 12 MONTHS old.

And still, the “**Agnes A.I.**” Android pulled in **5 closed sales** from them.

These business owners have never seen anything like it.

So let me ask you...

How much GOLD is sitting in your database?

How much can you save on staff overheads?

If you'd like to find out...

We're building “**Agnes A.I.**” Androids for a handful of ‘**lead-reliant businesses**’ we refer as PROFIT PARTNERS, so they can **make more sales...**

... **without spending more money** on sales staff or working the leads

themselves.

We will build, fine-tune, and plug in an “**Agnes A.I.**” Android into these select Profit Partner businesses.

They won’t have to lift a finger.

We have blocked out time in our calendar to custom-build these Androids, but we’re a small team, so **we can't do it for everybody.**

If you’d like to be 1 of the 5?

Scan this QR Code to book a DEMO with ALL DECISION makers right now while this is fresh in your mind.

I look forward to meeting you and showcasing “AGNES A.I.” Android to see if we become PROFIT PARTNERS!
