

## **Interactive Metronome & Juice Plus**

Interactive Metronome and Juice Plus working together for phenomenal results:

***Hi everyone! I just wanted to share something: Our oldest son, Noel, is my "why." He has struggled with emotional control, focus and impulsivity since a young age.***

***He completed a program called Interactive Metronome two years ago which helped him tremendously, but he still wasn't "well."***

***We decided a year and a half ago to start working on our nutrition as a family. We started eating Juice Plus and have seen our picky eaters try (and enjoy!) new foods and make healthier choices all around.***

***We found that certain foods definitely affected Noel and have eliminated them—dairy especially. Noel's focus and attention continued to be a struggle even after the dietary changes and the addition of JP.***

***Well... we decided to try the JP Omegas and y'all.. I'm teary eyed just typing this. We have watched our little boy's mind literally open up. He's been on the Omegas for 2 months and the changes we are seeing this week are profound.***

***It may not sound like a big deal to all, but today he was getting dressed for a play date and also grabbed and packed a change of clothes for after he swam WITHOUT me even as much as suggesting he do that.***

***He is having deeper conversations with me and listening when I give instructions.***
