

How To Become a **Consistently Profitable** Futures Trader & Make \$10k-\$30k+ Per Month

Using My **Proven** VPE Trading System

My goal for you today...

is to provide you everything you need to start your journey toward becoming a consistently profitable futures trader

Even if you have:

- ✗ No prior trading experience
- ✗ Never traded live or funded accounts yet
- ✗ Lost money, blown accounts, or failed before
- ✗ You feel like you don't have your 'trading edge'
- ✗ Or just don't know what you're missing to become profitable

I'll show you how to do all of this **without gambling, guessing, or relying on signal groups...**

If you've ever thought:

“I can’t stick to one strategy...”

 **“I keep second guessing my trades...”**

 **“I make some profit... then give it all back...”**

 **“I’ve been trading for a while... what am I missing?”**

**Then this Masterclass is going to
be a **game changer** for you.**

Because it's...

✗ NOT about some “holy grail” indicator.

✗ NOT about trading “more”.

✗ NOT about some “magic strategy”...

And it's definitely NOT about sitting at your desk all day watching candlesticks paint on your screen.

It's about having a **VPE system that tells you
exactly when to enter... when to exit... and
how to manage risk like a professional trader..**

Here's what I'm going to cover:

✅ Why futures trading is the #1 skill to create true financial freedom

👤 The **3 Core Upgrades** you need to become profitable & scale your trading to 6+ figures quickly

🧠 How to rewire your brain for discipline, focus, and long-term success in the markets

📈 How I personally trade using VPE

🛡️ How to manage risk & compound your capital so you don't blow accounts

💰 How to pass funded accounts or scale a small personal accounts to \$100K - \$1M+

💬 Live Q&A at the end where you can ask any questions

If you're fired up, put “🔥” emojis in the chat!

This Masterclass is the real deal

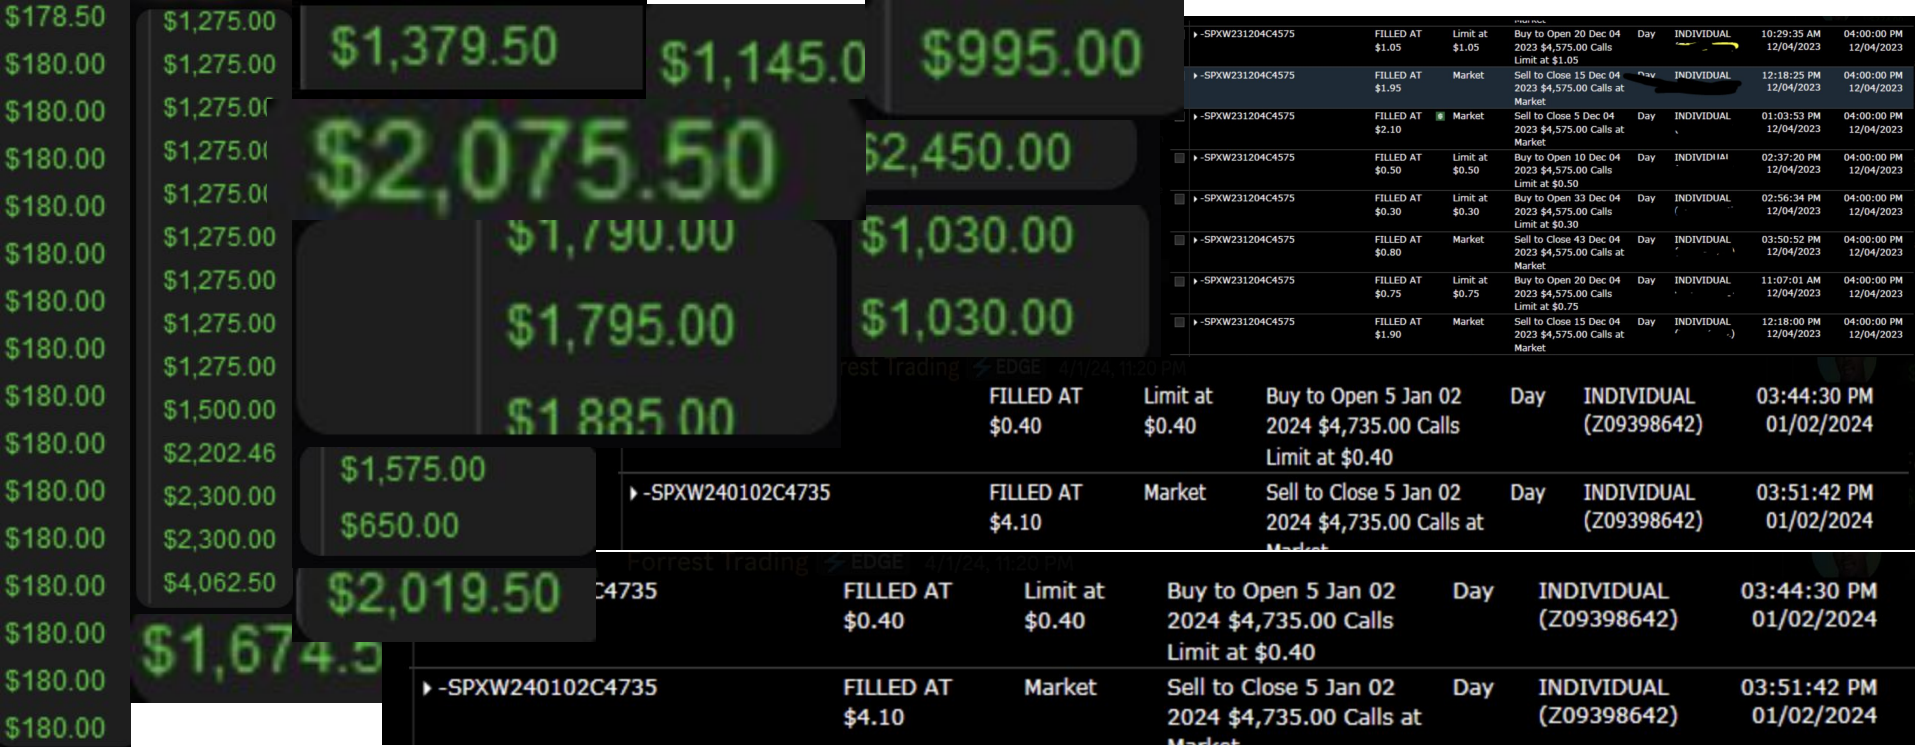

**This isn't just another “training”
with a bunch of surface level advice.**

The trading systems & strategies that you're about to discover...

are the exact same strategies that I used to personally scale my trading to more than **\$1,000,000** in just 5 years

Open my dream content studio in Miami

Travel the World

Buy my dream cars

The same system that's helped 1400+ traders finally become consistently profitable after YEARS of struggle and trial & error.

And here's the wild part...

**Most of them didn't even change
what they were trading.**

They just changed how they thought, how they executed, and followed a system that just works.

This is about mastering **one proven system
not jumping to the next shiny thing.**

So... If you stay with me for the next 90+ minutes, I promise this will be the **most valuable training you've ever seen on trading.**

**If you stay with me until the
very end of today's session...**

**I've put together something called
“The Trading With Forrest Toolkit” — and I'm
going to give it to you completely for free.**

Inside you'll find:

- Contains all Masterclass slides
- Daily trade plan template
- My VPE System™ checklist

This is ONLY for those who stay until the very end.

PLUS BONUS Q&A 📦

Now, who is this Trading Workshop actually for?

Who this Workshop is for:

1) You're a **9–5 Worker**... who knows you weren't built for a job

You've done everything “right” job, degree, steady income... But you wake up every day feeling like your potential is being wasted.

You don't just want more money you want freedom. Control. Purpose. A way to make income that actually gives you your life back. You want to wake up, open your laptop, and make your daily profit goal before most people even clock in.

This workshop will show you how trading can become your escape plan.

Who this Workshop is for:

⚠️ 2) You're the **Shiny Object Trader...** stuck in the loop of almost making it

One week it's order blocks. Next week it's ICT. Then it's DOM scalping on ES and NQ.. You've joined 3 Discords, 4 Telegrams, and your YouTube is full of trading strategies.

You've put in the hours but nothing sticks. You're overwhelmed, second-guessing everything, and wondering if you're just not cut out for this.

🧭 **This workshop will show you how to stop chasing and lock into one proven strategy you can master for life.**

Who this Workshop is for:

3) You're an **Unprofitable Trader**... and it's eating you alive

You've been in the game for months, maybe years... You've seen some wins but they never last. Every step forward gets erased by one bad trade, one emotional reaction, one over-leveraged setup you knew you shouldn't have taken.

You're smart. You're capable. But the results just aren't there and it's crushing your confidence.

This workshop will show you the missing piece to consistency and the exact process to finally trade like a professional.

Who this Workshop is for:

 4) You're the **Aspiring 6–7 Figure Trader**... who's ready to go all-in

You know what's possible. Consistent profits. Passing funded challenges. Scaling your own capital to \$100k, \$500k, even \$1M+.

This isn't a side hustle for you anymore, it's the path to total freedom. This isn't a side hustle for you anymore... it's the path to total freedom.

And you're not looking for hype... You're looking for a serious, rule-based trading system that can take you there.

 **This workshop will show you how I scaled my own trading past \$1M and how you can do the same.**

Whatever stage you're at...

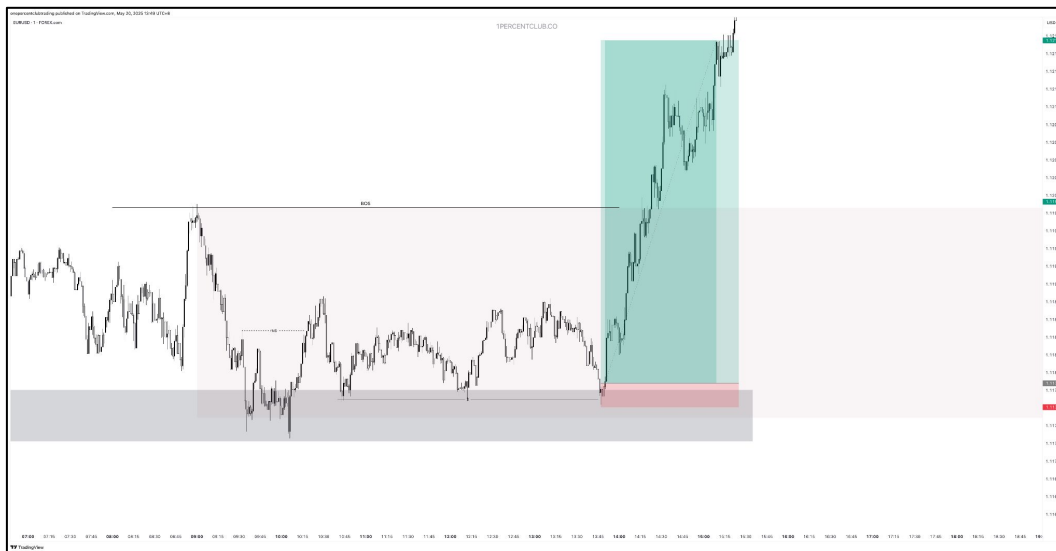

**This isn't about hype, luck, or
hoping your next trade is “the one.”**

**This is about mastering ONE
VPE trading system.**

**So you can trade confidently, consistently,
profitably, and with total peace of mind.**

Before we start, here's some house rules for today's webinar...

House Rules

✗ This is **not** a "get rich quick" scheme.

✗ This is **not** a magic button you click to make money overnight.

✗ This is **not** for people looking to cut corners, chase signals, or trade without doing the work.

The results you'll see — mine and my students' — are not typical. They come from real traders who showed up, put in the reps, and stayed disciplined.

⚠ **Your results will depend entirely on your effort, mindset, and commitment.**

Be present. Focus.

This is not the time to multitask, scroll TikTok, or reply to emails.

You showed up for a reason — give this your full attention.

💡 One insight today could change your entire trading career.

🔕 Mute your notifications.

💻 Close all your tabs.

📖 Take notes.

💭 Be here now.

If you can't stay focused for 90 minutes, how will you stay disciplined in the markets?

I'm **not going to promise you'll
make \$10k this weekend...**

But if YOU ARE willing to learn a real system... Put in the work... And treat trading like a **BUSINESS** — a real high income skill — not a slot machine...

Then this will be one of the most valuable trainings you'll ever attend.

A new way of thinking about trading that puts you back in control allowing you to **become consistently futures profitable, instead of riding the emotional rollercoaster of highs and lows, never making REAL progress.**

The World Has **Changed...**

Let's be brutally honest for a second...

The world is **NOT the same as it was 5 years ago
and it will never be the same again.**

 **AI is replacing jobs.**

Companies are slashing payroll.

**Entire careers are becoming
obsolete overnight... 🤖**

**The middle class is being
squeezed into extinction 🦖**

And the people who rely on “safe” jobs...

Thinking they have “time”....

**They're the ones who are
going to get hit the **hardest**.**

You can't outwork this. You can't out-save this.

You can ONLY out-skill this.

The scary part?

Most people won't see it until it's too late.

Here's why trading is the **BEST** opportunity right now:

- ✓ You **don't** need a team, a product, or even a business
- ✓ You can start with a **laptop**, Wi-Fi, and skill
- ✓ You can work from **anywhere** in the world
- ✓ You **control** your time, income, and growth in all areas

No 10-year grind to build a business or career.

Just one skill. One system.

**And you can extract money from the markets
and live your life **on your terms.****

**And there's never been a better
time to go ALL IN on trading**

**Because we're in the middle of the
biggest opportunity window trading has ever seen.**

The world is not just changing it's transforming.

Why?

**Because trading doesn't care about degrees,
resumes, or where you live.**

It only cares about skill.
Skill that ANYONE can learn... if they commit.

**Trading is one of the last true opportunities
to secure your freedom.**

**In trading, you don't get paid for how hard you work
you get paid for how well you decide.**

You're rewarded for your **skill, not your job title.**

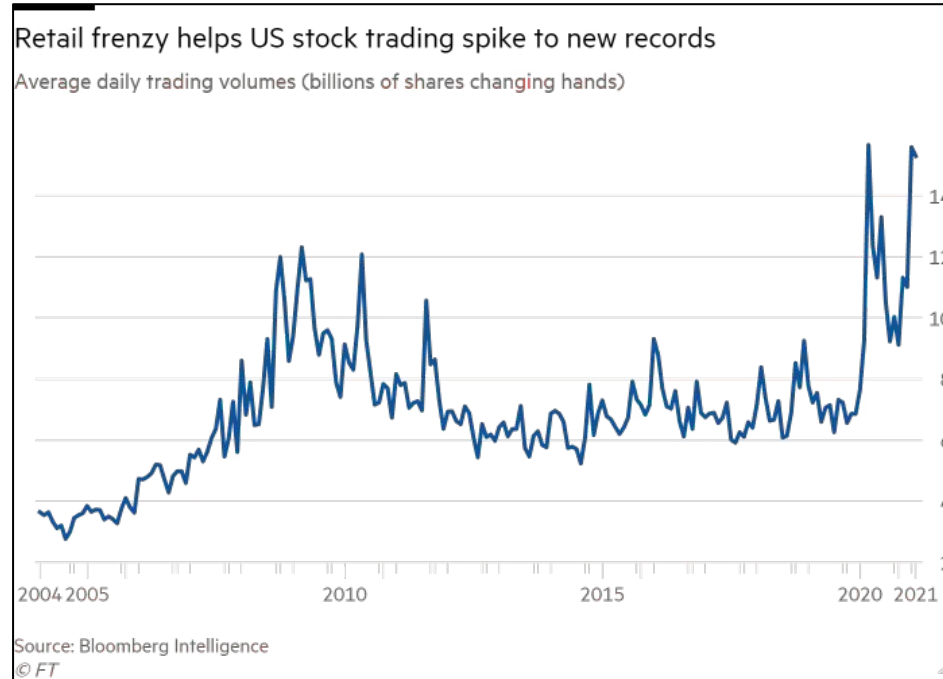

You can work from **anywhere with a laptop & internet.**

You can build capital **independently without begging for promotions, bosses, or clients.**

And it's not just hype. Retail trading volume has **exploded**.
It's **DOUBLED** since 2020 alone...

This isn't a trend it's a permanent shift.

But here's the thing...

**While millions are panicking over being replaced
& worrying about the economy...**

**Traders are mastering a high-income skill that scales,
automates, and compounds over time.**

They don't fear AI. They profit from it.

Volatility is high

 **Funding capital has never been easier to get**

**And capital is flowing to traders
who know what they're doing**

**Prop firms are literally handing people
\$100,000 to \$1,000,000+ accounts...**

But ONLY if you can prove you can trade profitably.

🔥 And that's exactly what you're going to learn today.

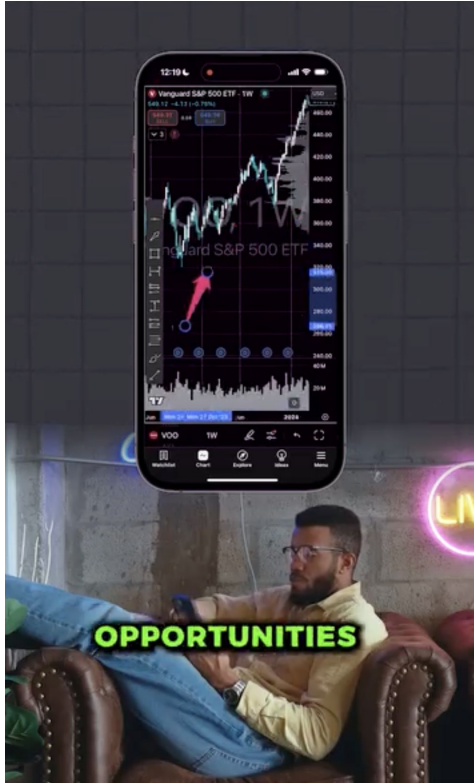

**I just want you to picture
your life 12-months from today...**

**You wake up in your
dream environment.**

You check your charts,
see a **high-probability**
trade set up.

\$1,275.00
\$1,275.00
\$1,275.00
\$1,275.00
\$1,275.00
\$1,275.00
\$1,275.00
\$1,275.00
\$1,275.00
\$1,500.00
\$2,202.46
\$2,300.00
\$2,300.00
\$4,062.50

You **profit \$10k** on the day.

Done for the day before
most people start their daily commute.

Your accounts are growing. You're **stacking profits with confidence. And you have complete freedom & control over your income & lifestyle.**

 That's not a fantasy.

 That's what happens when you stop gambling and start trading volume.

**Now before we get into the
meat & potatoes of today's Workshop...**

Let me tell you how I got here...

I grew up in Belleville, Illinois small town, Midwest the kind of place where everyone knows everyone, and ambition feels like something that happens somewhere else.

My parents were both in the Navy, so we bounced around a lot.

California. Hawaii. Washington State.

Eventually, Scott Air Force Base brought us back to the Midwest.

And we didn't have much.

We weren't poor in spirit but we were broke in reality.

**And I didn't realize it back then, but looking back
now...**

**the pants that never fit right, the old shoes, the
hand-me-downs yeah, we were struggling.**

Still, even as a kid, I was wired different

I didn't just want more money I wanted to understand things.

Math, science, physics, chemistry anything that made me solve a puzzle.

Even then, I think I was chasing structure... without knowing it.

Then things started to change

I got to college on a track scholarship and that's where everything flipped.

In high school, I had a 2.5 GPA.

In college, I was on the Dean's List every semester.

For the first time in my life, I realized

if I commit, I can be great at anything

That mindset changed me.

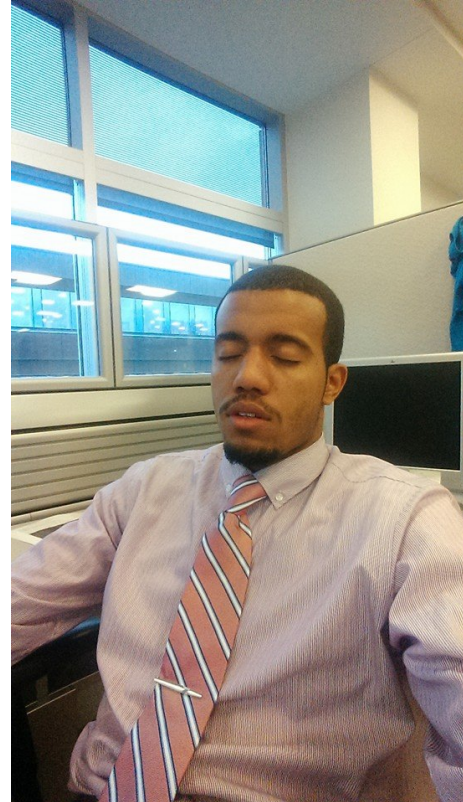

**became obsessed with systems, patterns,
logic how things work beneath the
surface.**

**After graduation, I landed my first job at
Edward Jones, a brokerage firm.**

Not flashy. Not Wall Street.

**But it gave me a window into how money
really works.**

I got my Series 7 and Series 66 licenses.

I became a registered Financial Advisor.

**And it was there sitting in that cubicle surrounded by retirement accounts
that I caught the trading bug**

At first, I thought I was ready.

**I had no roadmap. No mentor.
And was trying to make 1% a day.**

It was a disaster.

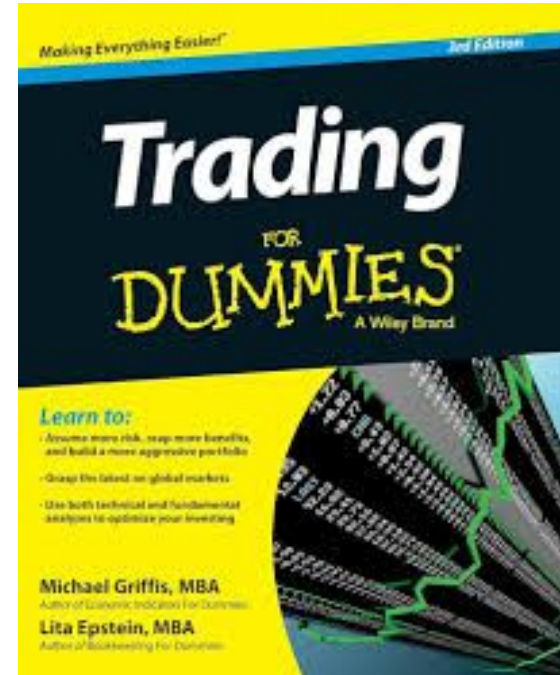

I lost money fast 💵

I thought I understood the markets...

but I only understood the textbook version.

**So I did what most new traders do...
I enrolled in YouTube University.**

Three years of bouncing between “gurus,” indicators, and conflicting strategies.

Every time I thought I'd found it, the next drawdown erased the whole belief.

Win → lose more → repeat.

**At some point I stopped
looking outward...**

And started looking inward.

I opened Notability on my iPad and went to war with the market on paper.

Every single day
Screenshots.
Notes.
What I felt.
What I saw.
What I missed.

I **tested** everything.

MACD. RSI. 3-minute. 5-minute. 7-minute.
If there was a way to squeeze clarity from chaos, I hunted it..

And through all the **chaos, I started noticing something**

The market wasn't random 🤔

It had a pulse. A rhythm. A story written through Volume.

That's when I realized

If you can identify the story where liquidity is building, where volume is shifting you can trade with precision instead of emotion.

That idea eventually became the VPE System™.

**But even with all that progress I had one
more painful lesson to learn**

At one point, I was on top of the world.

I'd made over seven figures trading GameStop and a massive swing trade that took months to play out.

**I was traveling in Egypt, trading from
my laptop between adventures,
feeling untouchable.**

Then came that trade.

I was up \$580,000 in unrealized profit

And instead of closing it, I got greedy.....

I wanted to see it hit a million.

I sat there and watched it fade.
\$580K → \$400K → \$200K → GONE

That moment broke me

Not financially

Emotionally.

Because it forced me to face the truth:

“I wasn’t trading to build **wealth. I was trading to feed my **ego**.”**

I realized money is a tool not a trophy.

**And if you use it to serve your pride instead of your purpose,
it will take everything from you.**

So I made a decision.

From that day forward, every part of my trading had to be mechanical.

Every entry.
Every exit.
Every risk
Every review.

No emotion.
No guesswork.
Just systems.

That's when it all clicked.

**The noise faded.
The charts started making sense.**

I stopped hoping... and started executing.

@rest_internet

Today, my mission is simple

To help traders cut the learning curve I had to crawl through.

To help them build clarity in a world full of noise

**To teach them to protect their capital, control their emotions,
and trade with confidence and precision no matter the market**

I've helped traders go from lost and emotional to passing prop challenges, scaling accounts, and hitting \$10K–\$30K+ months.

W-Dawg 8/1/25, 8:24 PM

Was technically 3 trades, it's just counting my MNQs separately. Longed the settlement open, and longed twice off the Friday POC

TOPSTEP

WELCOME

ON BECOMING A TOPSTEP FUNDED TRADER

Hi LaRon,

Congratulations on becoming a Topstep Funded Trader! This accomplishment proves your dedication to discipline and risk management. Now you have the opportunity to pay yourself up to 4 times a month!

Account Name: \$1May25

Account Size: \$50K Trading Combine

THE BEST TRADERS GET THE BEST BENEFITS

And now, I get to do what I love

**Trade. Teach. And help others find
the peace and freedom I fought for.**

Because the mark of a great trader isn't just profit it's consistency.

And the mark of a great teacher is when their students surpass them.

That's what drives me now.

That's why I'm here Today

**To help you become the trader I spent a decade becoming
without the pain, without the wasted years, and without losing yourself
along the way.**

Everything I have today I built from scratch.

No handouts.
No lucky breaks.
No “secret edge.”

**Just relentless obsession, ruthless discipline,
and one rule-based system that changed everything the VPE System™**

Now you might be thinking:

**“Okay Forrest, that’s cool for you...
...but will this **actually work for me?**”**

Totally fair question.

And that's why I want to show you this.

Because this isn't about my results anymore...

Meet Mark. A full-time nurse in his mid-30s not a finance pro, not a math genius. He'd been dabbling in trading for years, trying to figure it out on his own. But between work and life, he couldn't sit at the charts all day. Then he joined our community. Now, after a year and a half of applying the system consistently, he's confident, disciplined, and **consistently profitable**.

This server is no frills, no hype, no excess, run by traders who make money and focus on teaching. Here, you will get invaluable analysis and insights into the workings of the markets. You'll get framework for the mental game on what it takes to extract profits from the market and to sustain yourself and your account. To be frank, I work a full-time career as a nurse. So I'm not able to sit at the charts all day and practice(not that I would want to). I'm not old, but I'm not young. Firmly in my mid 30's so I'm not some young prodigy. I don't consider myself to be exceptionally smart or have some innate talent to read and trade the markets. I'm just a regular guy. But being in here has given me the tools, insights, and framework, which I have relentlessly worked at and applied, every single day for a year and half, to be a successful trader. Shout to [@Sul](#) and [@Forrest Trading](#) and company for running a great server.

The screenshot shows a trading dashboard with a table of trades and a calendar view. The table lists trades for ES, MES, and NCS with their respective entry and exit prices. The calendar view shows a grid of dates with performance metrics for each day.

 Conquestador 5/30/25, 4:30 AM

And that's another one! Self Funded my own account this week and passed another eval.
#VPE is where it's at!

The screenshot shows a mobile app interface with a welcome message and account details. The message congratulates the user on becoming a Topstep Funded Trader and mentions the opportunity to pay yourself up to 4 times a month. The account name is S1May and the account size is \$50K Trading Combine.

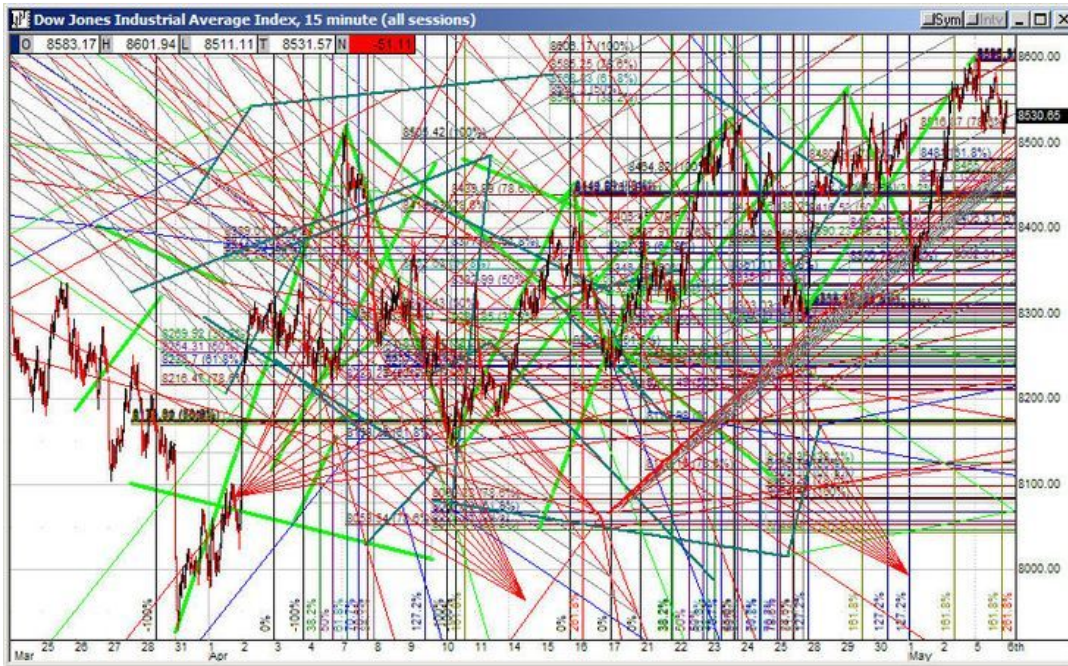

Most people think trading success means:

✗ 10 monitors

✗ 75 indicators

✗ Random signals from Telegram groups

✗ Hoping & praying the market magically “goes your way”

It's basically **glorified gambling...**

This is NOT trading.

This is noise. Distraction.
Disappointment waiting to happen.

Profitable trading success
looks very different:

✓ One clean chart
maybe two for higher
time frame perspective

✓ A simple, rule-based
VPE system you trust

✓ **Daily prep, trade journal, reviewing data, feedback loop**

✓ 60–90 minutes of
focused execution per day.
Walk away. Done.

It's boring. It's quiet. It's methodical.
And it's extremely profitable.

Because it's not about catching every move...

**It's about catching the right ones,
with confidence, consistency, and control.**

 **Having a clear, VPE system**

 **Mastering your mindset
and emotional discipline**

 **Managing risk like a professional
and scaling accounts the smart way**

The truth is, it's about doing less not more.

It's about focusing on 1 thing, not 20.

This is how the top 1% of traders win.

Going from a losing retail gambler to a profitable millionaire trader isn't about doing more it's about doing the right things.

It's about making 3 CORE UPGRADES
Master these, and everything changes...

There are only 3 things you need to become a **wildly profitable** trader:

Core Upgrade #1:

New Paradigm & Identity Shift —
becoming the profitable trader.

Core Upgrade #2:

VPE System — eliminate
emotion-based trading.

Core Upgrade #3:

Capital & Risk Management —
minimizing losses &
multiplying profits.

Core Upgrade #1:

**New Paradigm & Identity Shift —
becoming the profitable trader.**

**But, Forrest, what does this
have to do with trading?**

Have you wondered how I went from poor kid in the Midwest, too broke to even buy new clothes...

Too seemingly out of nowhere...

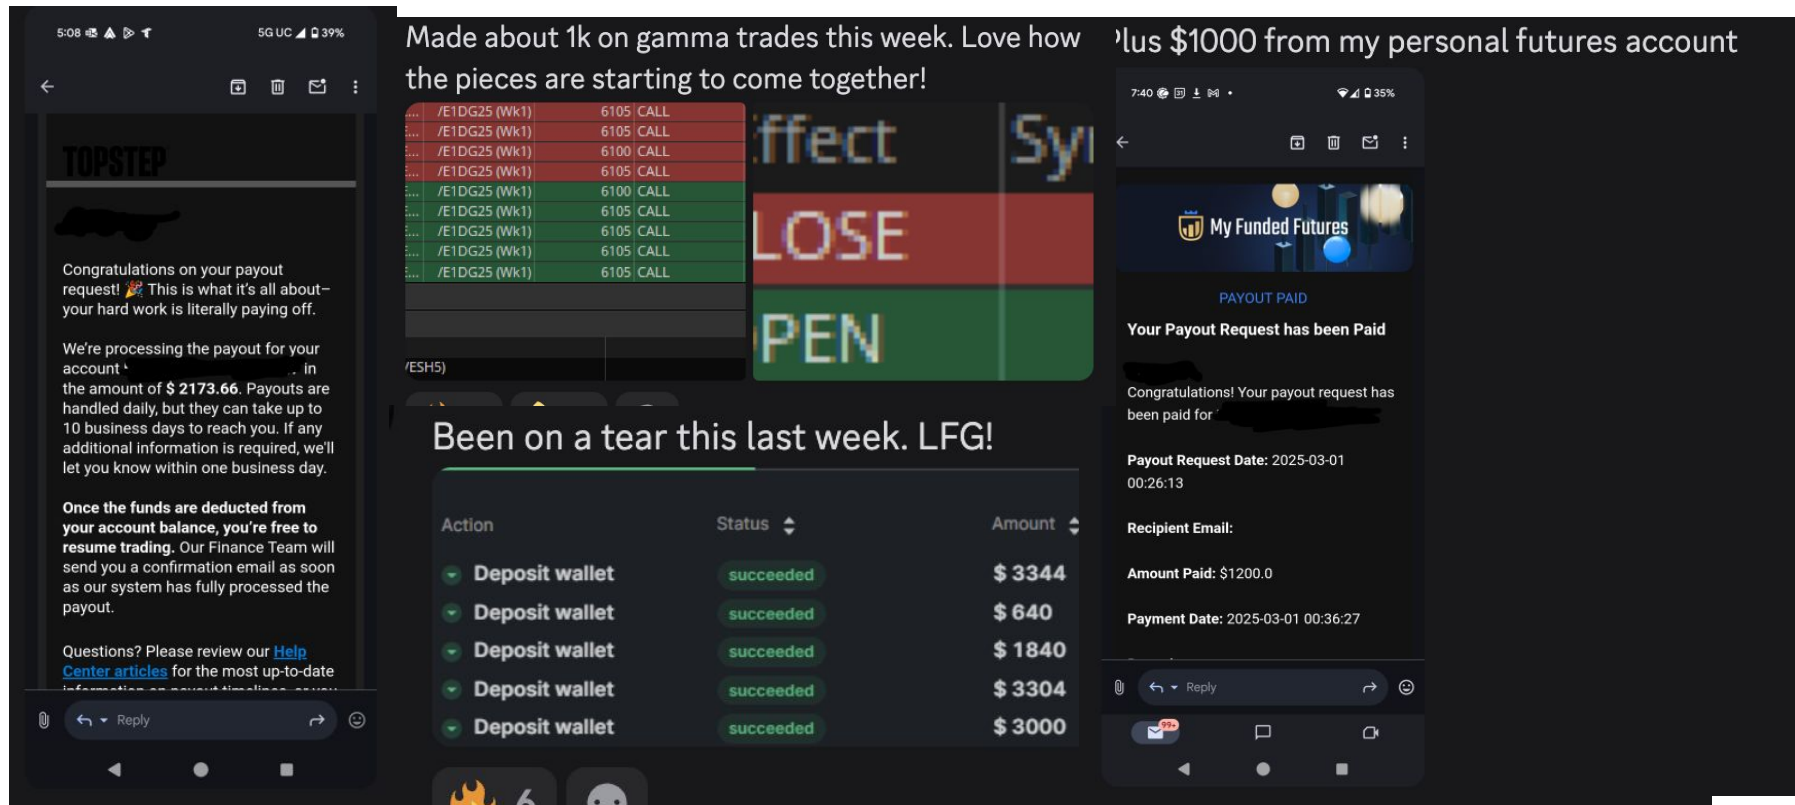

**Becoming a multi-millionaire,
7-Figure net-worth, owning
the biggest content studio in
Miami, and travelling world**

And out of nowhere again...

Helping record numbers of others achieve what's considered "impossible" in trading

So how did I really do it?

A full-page background image showing a person's silhouette standing on a rock, looking up at the Milky Way galaxy in a starry night sky. The text "I transcended myself." is centered in the middle of the image.

I transcended myself.

What does this mean?

**Well, I realized in trading ... the biggest
obstacle to my success was myself.**

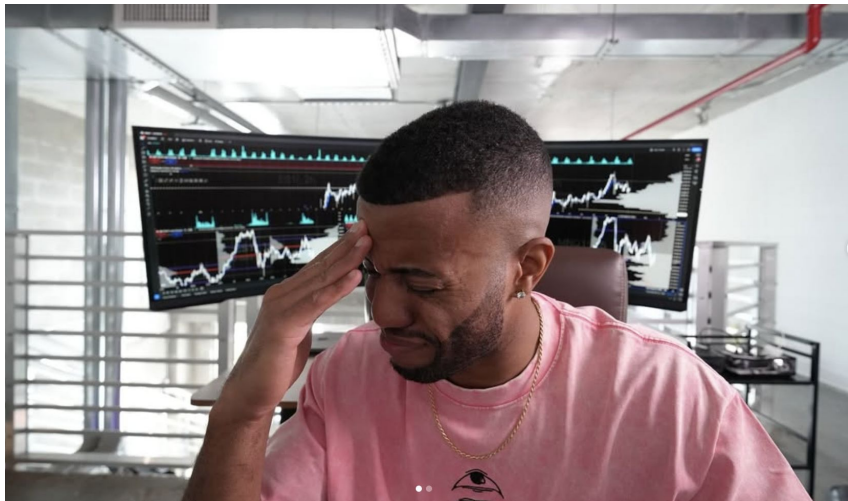

I was my own **worst enemy...**

Here's some of my personal struggles...

🧠 I used to think that “trading psychology” is not important because a profitable trading strategy is all you need to become successful at trading.

↩️ I had this perspective **until** I had lost over \$580,000 in a day because I was overtrading and overleveraging.

💰 Since young I have always thought that the only way to build wealth and get rich is by saving money until you're 65 and then retire using what you have saved up.

↺ Then I started meeting millionaires and realised that money is abundant.

🏋️ I used to see myself as a skinny guy who cannot gain weight no matter how much I ate and this perspective caused me to not exercise and not eating enough to gain muscle.

What's the point if I'm never going to get big?

🔄 This changed until I saw transformation stories of people who are skinnier than me becoming Greek gods.

**I tried to fix the problem by learning more
“technicals”, but it **didn't work**.**

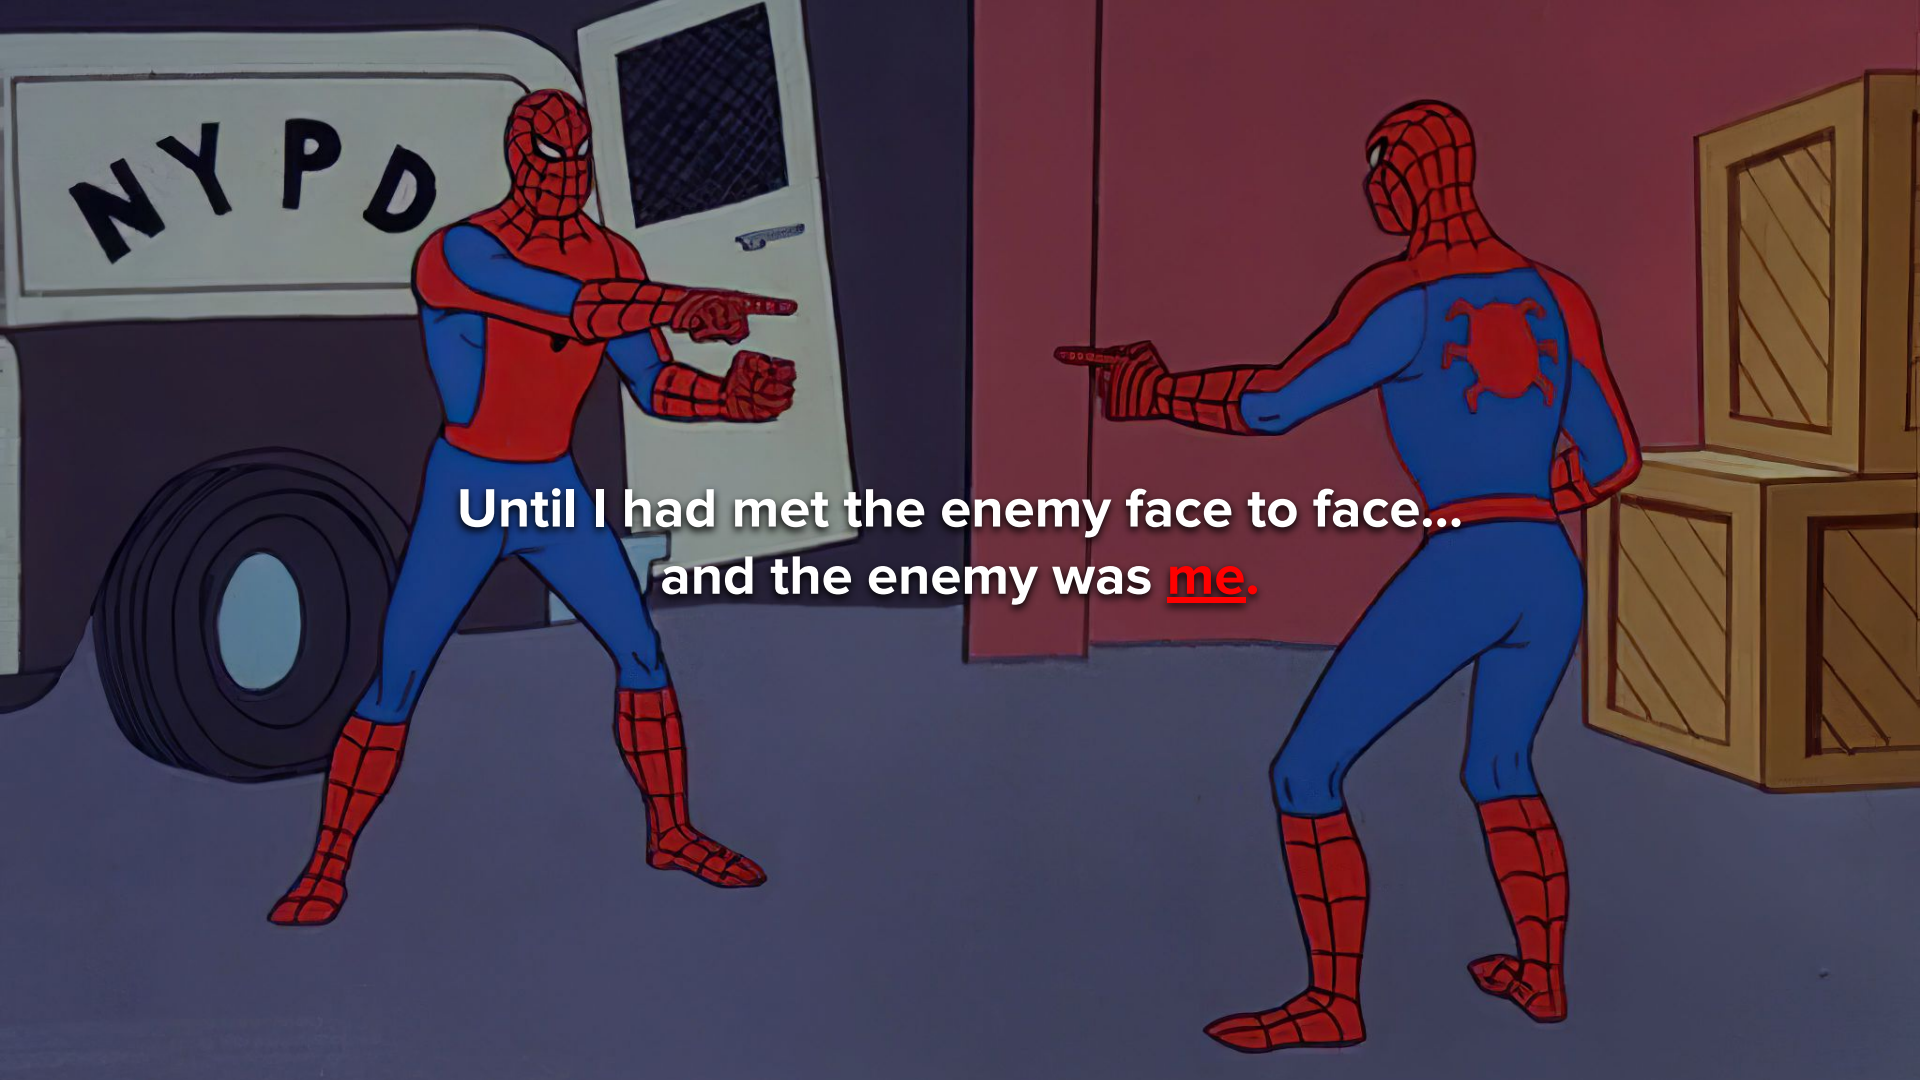

**It didn't matter how much effort I put, hours in front of the charts,
studying, learning... I was still spinning my tires, unprofitable &
nothing to show for it.**

**This had plagued my existence for years
... and I didn't know what it was...**

Until I had met the enemy face to face...
and the enemy was me.

Yes, this Workshop is about mastering VPE trading system to become a profitable trader...

But after witnessing 1400+ traders become wildly profitable & successful in a relatively short time...

I've realized this one profound truth...

**Most traders don't lose
because of “bad strategies”...**

They lose because they **haven't become
the Trader capable of executing them.**

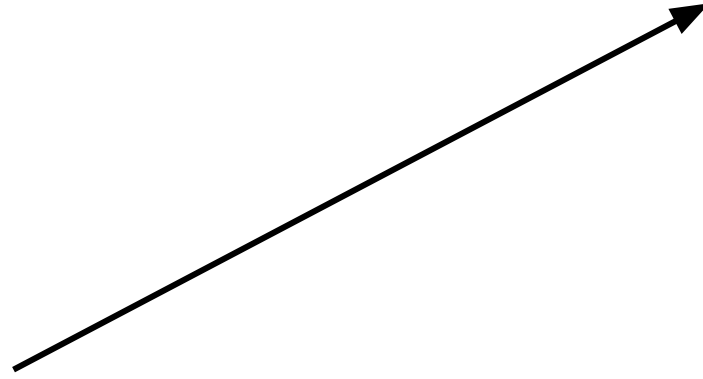

I'm not the same person I was before.

And neither will you.

Who you are right now is not who is capable or who you will be when you achieve your goals.

**Trading Success = 90% Paradigm + 10% Strategy
& Identity**

**Most traders think they need the “perfect strategy”...
so they keep learning more “technicals”**

But the truth is even the
BEST system will **FAIL** in the hands of
the trader with a flawed paradigm.

**That's why this first upgrade is NOT
about technicals. It's about YOU.**

**If you're not yet where you want
to be with trading it's not your fault....**

**You're probably stuck operating from a version of yourself that was
never designed to succeed at this level of trading.**

You need to **UPGRADE your
Paradigm & Self-Identity**

What is a Paradigm?

Paradigm = how you perceive reality and the world

- It's how you see things.
- It's the perception that you have of reality.
- It's a lens, a point of view - a perspective.
- Humans perceive and see reality and the world through their paradigms.

Your paradigm is a combination of the following:

Assumptions

Beliefs

Convictions

Principles

Ideas

Ideologies

Views

Understandings

Theories

Knowledge

Faith

Models

Hypotheses

Guesses

Stances

Positions

Axioms

Let's map it out so we can see how your current situation in life is a direct result of how you perceive life

Life (e.g. \$xx/month)

Sum of

Actions

Decisions

Options

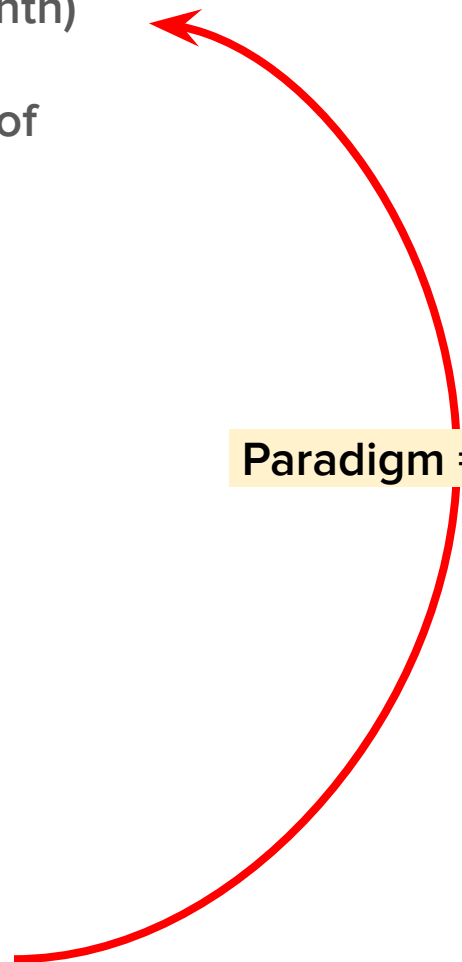

Thoughts

Paradigm

Paradigm = Result

A paradigm is how you see reality...

...how you see reality determines how you act...

...how you act determines what you get in life

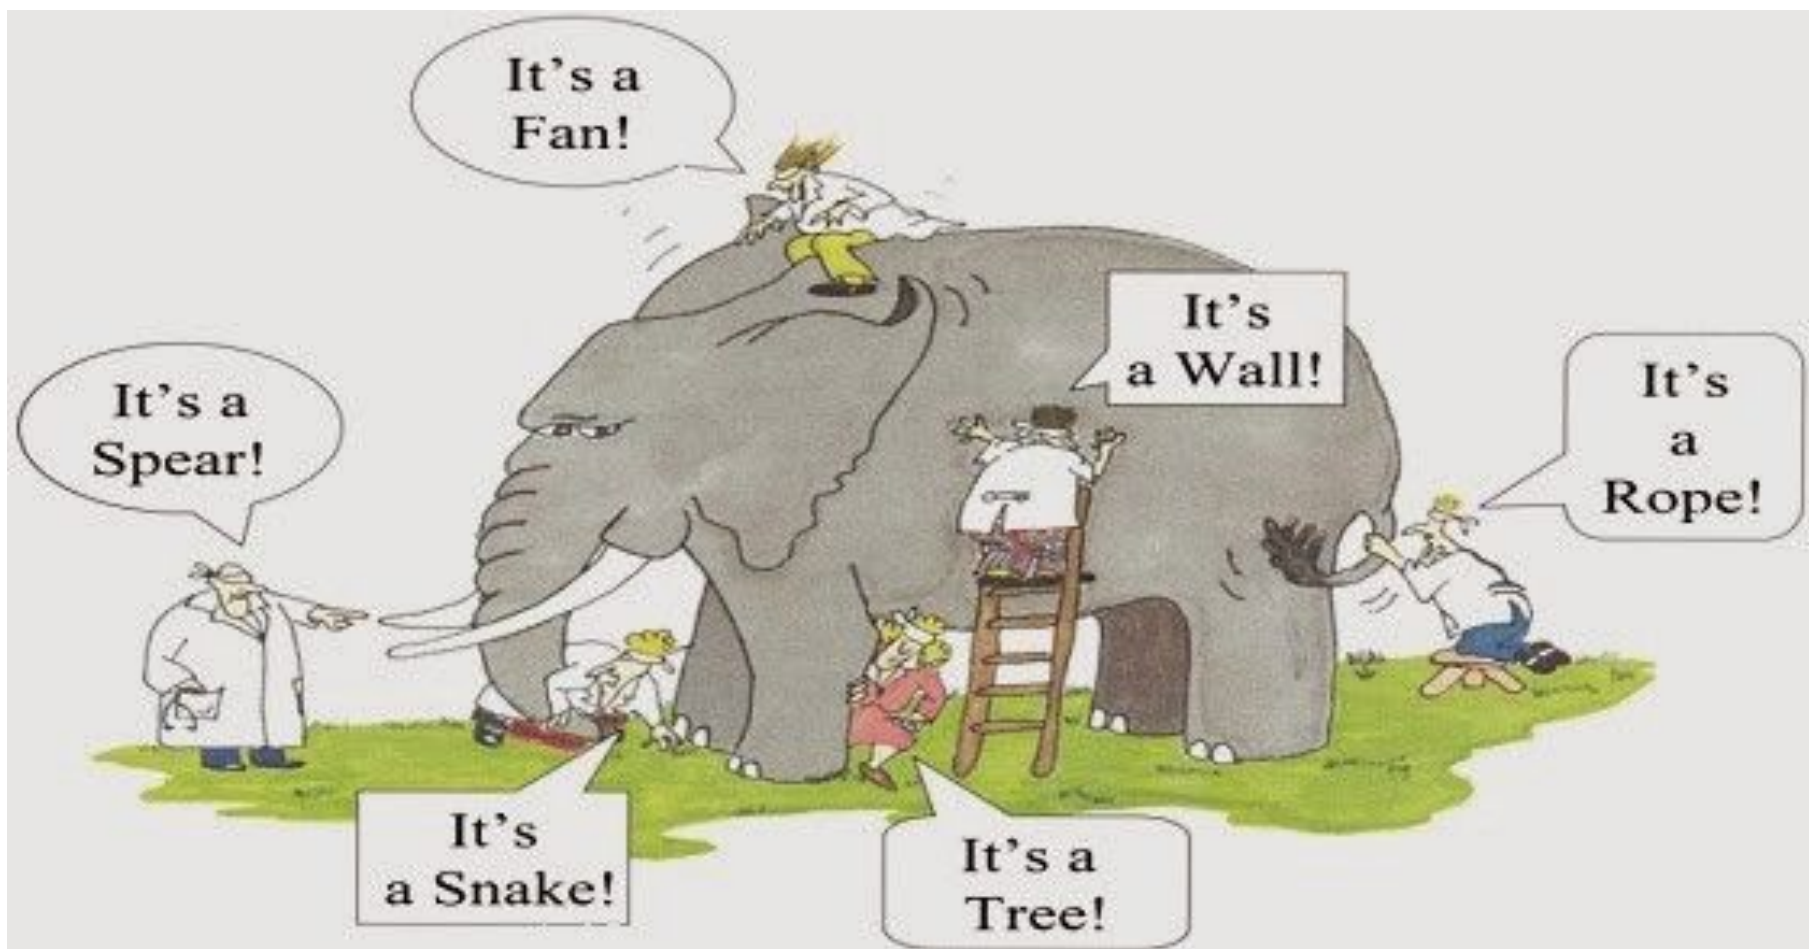

What is a Paradigm Shift?

- It's when you learn about new information that challenges your current perception of something.
- Paradigm Shifts are like the 'eureka' moment or lightbulb moment that changes everything and allow you to move forward in life and trading.
- They are integral turning points that help us grow and shed our old false paradigms.

Let me give you an example...

They have developed 6 totally inaccurate paradigms as to what an elephant is and they all believe that they are right since that's what these men experienced.

This is a major problem because how we see something determines how we act on it.

**To further illustrate how harmful false paradigms are,
let's use a simple example related to trading**

**“Using stop loss when trading will
only cause you to lose more money.”** 

Trader A

Stop losses are annoying. They cause me to lose a lot of money since I keep getting stopped out when trading.

I don't want to use them at all.

Trader B

Stop losses can be really annoying but they improve the chances of me becoming a consistently profitable trader since they do help to avoid big losses.

I will use them sometimes, when my trades go in my way.

Trader C

Stop losses are extremely important and they are non-negotiable because they protect my downside and this allows me to keep my risk consistent and reduce my losses, which in turn allow me to be a disciplined and profitable trader.

I must use them every time I trade.

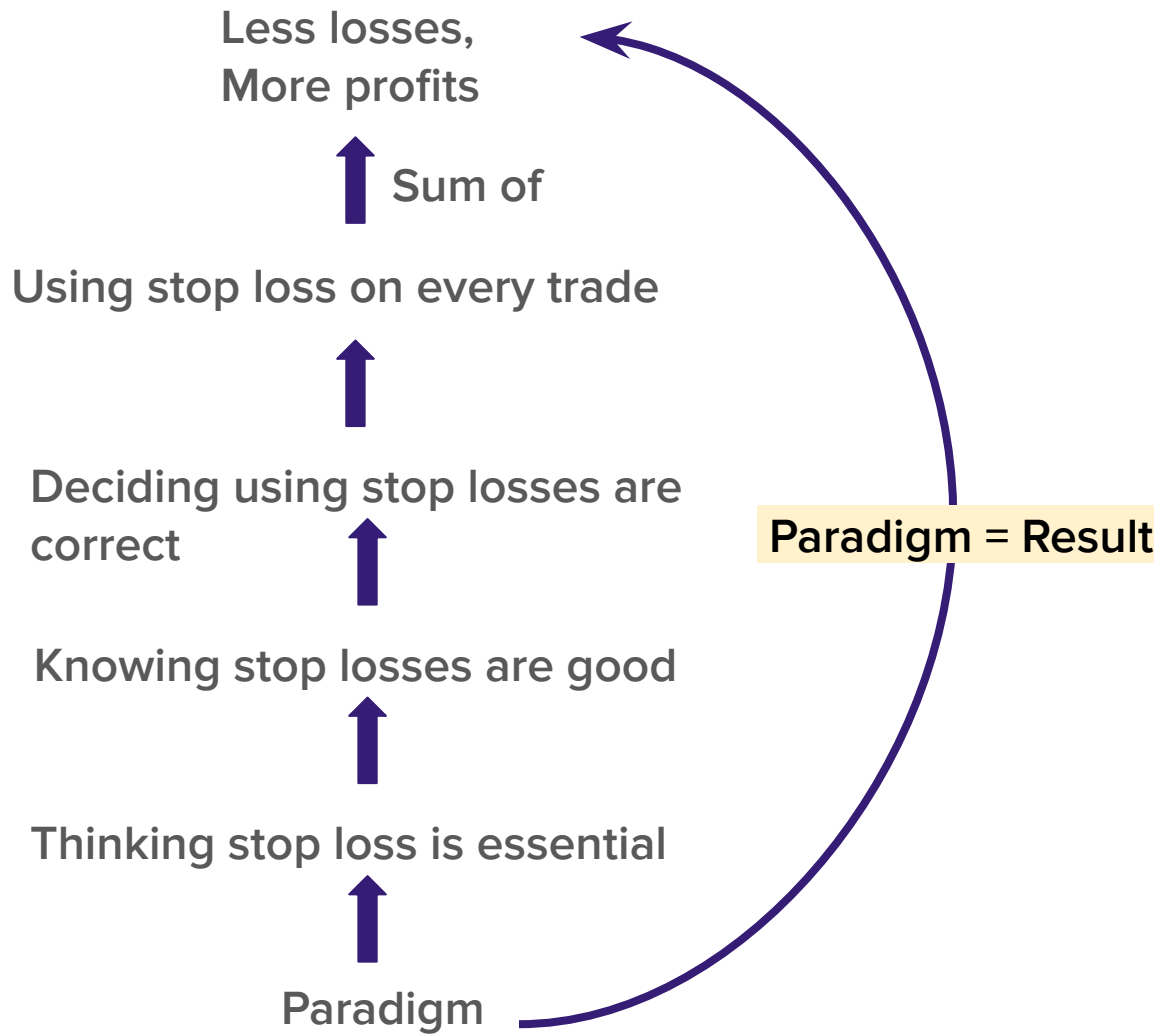

**Who do you think will make the
most amount of money in the long run?**

Obviously Trader C

Having the paradigm that stop losses are not necessary in trading is similar to walking up to an elephant blindfolded, stroking its leg and thinking an elephant is a tree.

**This applies to everything in trading:
VPE concepts, trading the news, risk per trade, journaling etc**

and also in life: relationships, health and wealth etc

Why so do many traders get different results?

**Why do some traders make \$50k/month after 1 year...
While others grind for 3 years and still can't clear \$500 in profit?**

**It's not just about strategy.
It's because how you **see** trading... shapes how you **show up**.**

Perception = Reality

If your mind is wired like a gambler — you'll trade like one.

Change how you see the game... and the results will follow.

Your paradigm is **the lens
you use to interpret reality.**

**It's your subconscious mental blueprint that dictates what you see,
how you feel, and what you do.**

Most traders never question the lens they're using. They just assume the market is “volatile”... when in reality, their **paradigm is outdated.**

Who you are **right now will never
create the results you desire.**

**Because you're trying to achieve
6-7 Figure trading results...**

**...while operating with 4-figure trading
habits, beliefs, and paradigm.**

This was me back then broke, emotional, limiting beliefs, scarcity thinking because I grew up poor.

And now?

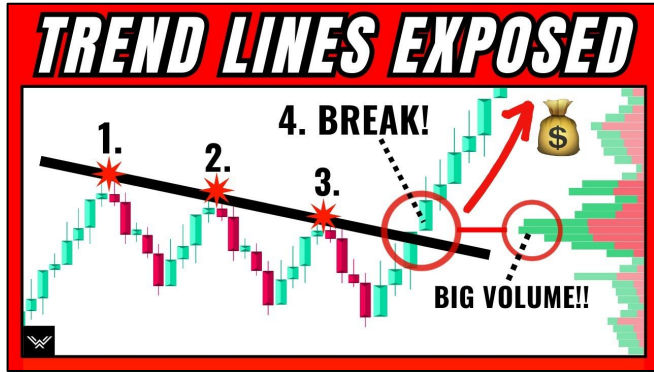

**I'm focused, calm, disciplined & abundance flows into my life,
NOT because of some “strategy”
but because I made the shift INTERNALLY.**

My biggest breakthroughs in trading always
came from **paradigm shifts**.

A major paradigm shift was when I switched from trading retail concepts to **VPE**.

**It's not about “faking it until you make it”
it's about **BECOMING IT NOW.****

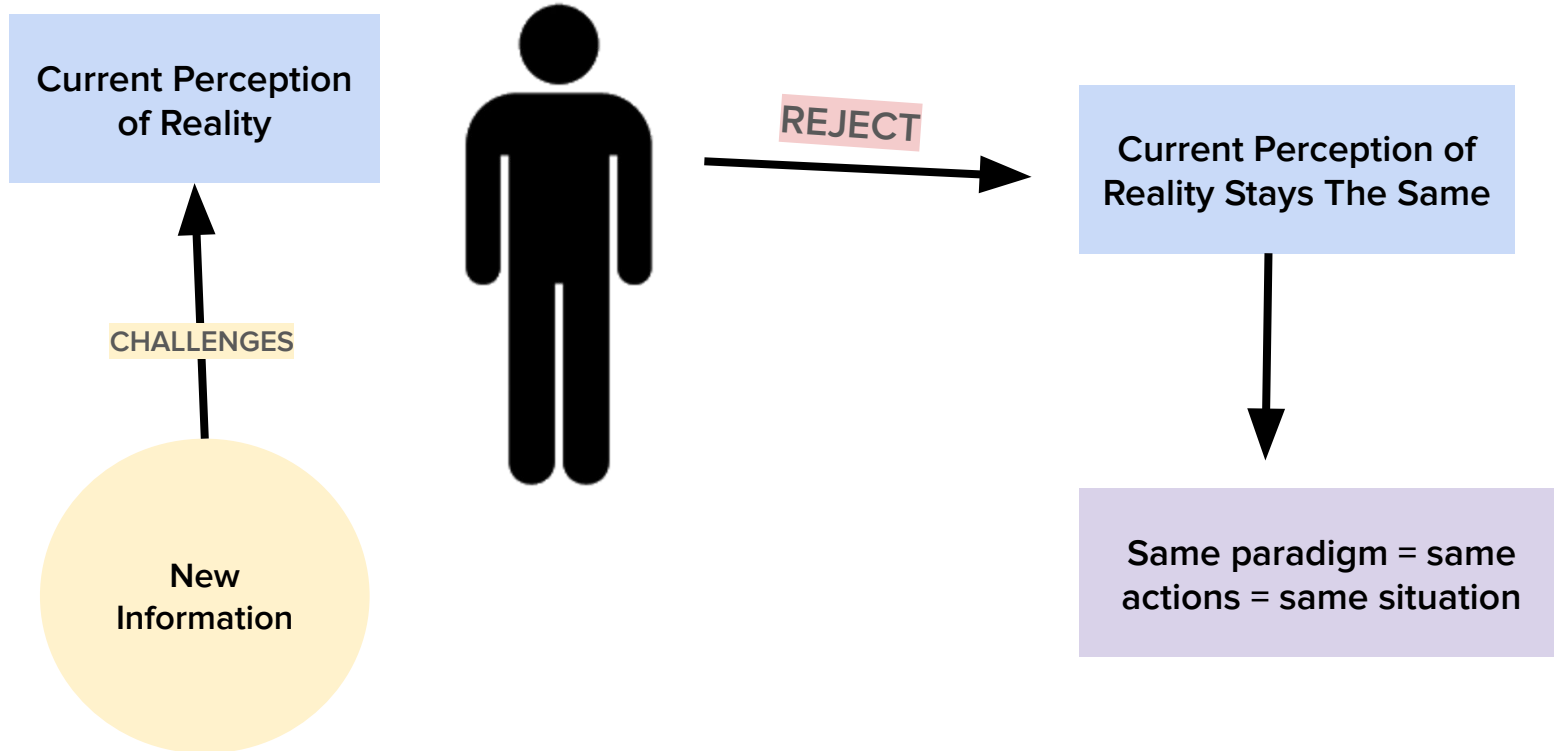

**You need to embody the profitable trader
identity BEFORE the results show up.**

**It sounds counter-intuitive, because it is ..
but this is how it works.**

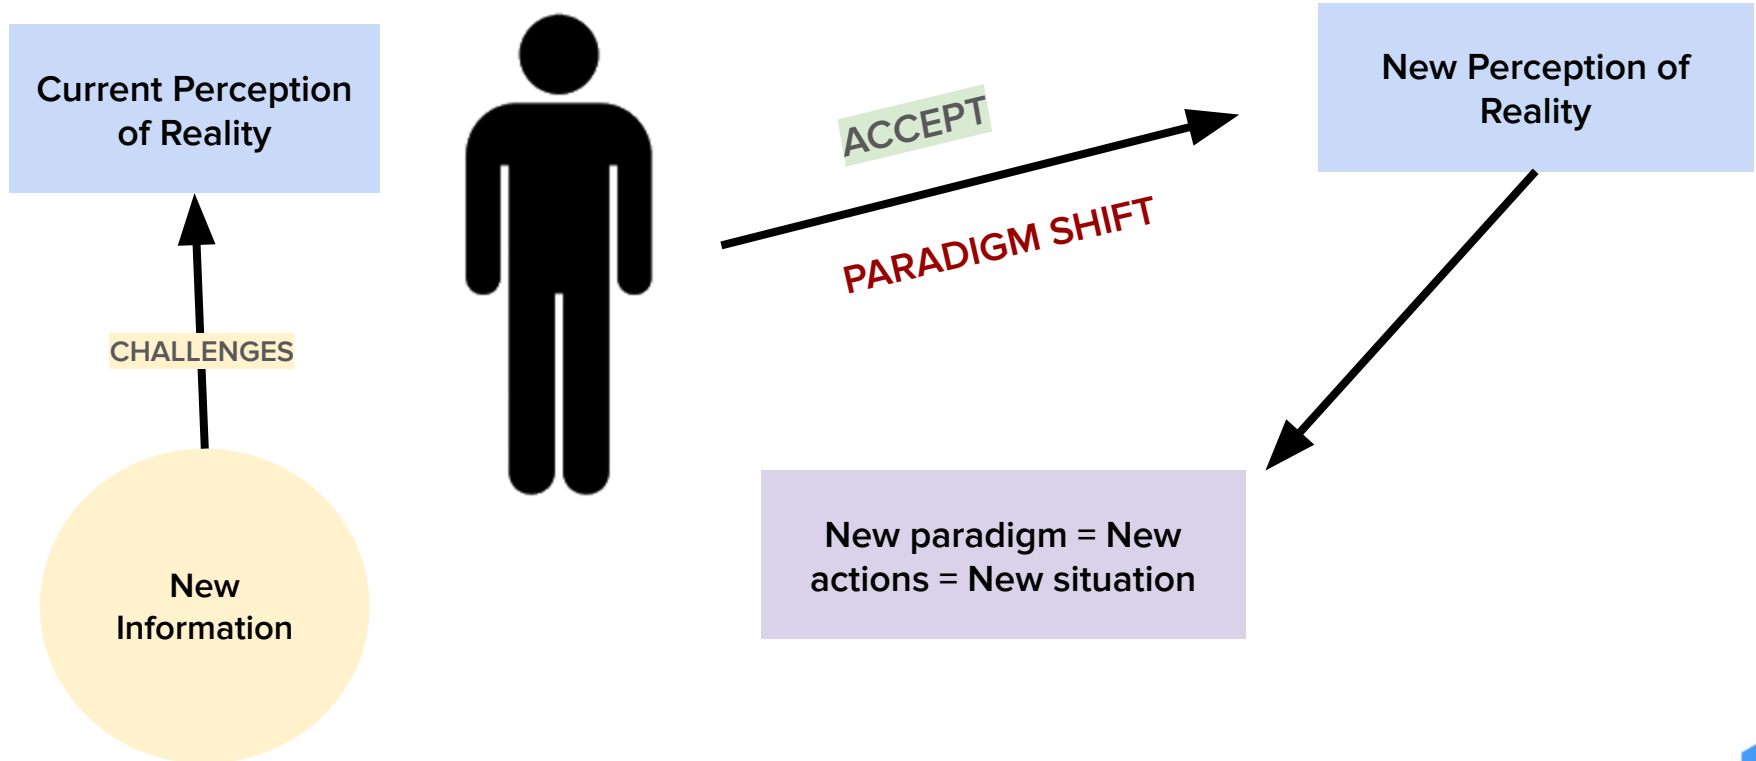

How do we have paradigm shifts?

OR

How do we have paradigm shifts?

Here's the **Flawed Paradigm that
is holding most traders back:**

Trading Paradigm Flaws

I've coached hundreds of traders and noticed a series of patterns and flaws in the paradigm of an average trader that holds them back from success. I used to have them as well, but I've spent the last 6 years getting rid of them. The reason why I am where I am today is because I became aware of them and **corrected** them:

1. **Self Awareness of Paradigm:** Not aware of what paradigms are -> Stuck in life/trading and getting same results
2. **Nature of Goals:** Setting the wrong goals -> Not hitting their goals
3. **Imposing Self Limits:** Limiting Beliefs -> Self Sabotage
4. **Pain Avoidance Mechanism:** Running away from pain -> Impossible to improve trading performance
5. **Self Design:** No real sense of higher self -> Can't become the person you want to be

If you can correct these 5 things, you will master your mindset and start making more money in trading than you can possibly imagine.

**If you don't upgrade your identity,
no strategy will save you.**

The biggest paradigm shift you can have is to realize the fact that **you can change your paradigm, you can design it however you want.**

Once you make the shift — trading starts feeling different & you get different results.

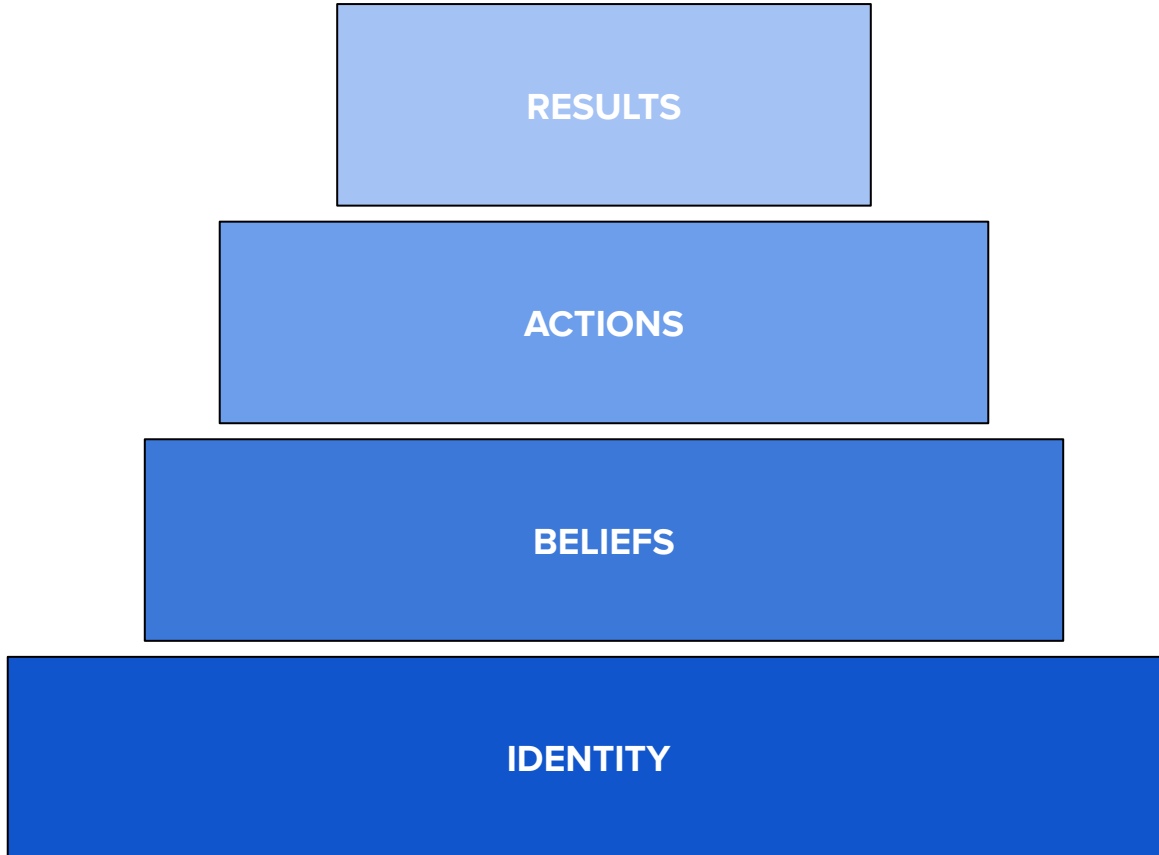

You're not chasing dopamine. You're not overanalyzing.
You become calm. Focused. Intentional. A sniper.

You have to upgrade your Paradigm (Your Internal **Operating System)
— and that starts with environment, mentorship, and identity.**

The Internal Operating System

Most traders try to change their actions —

**But actions are driven by beliefs.
And beliefs are rooted in **your identity**.**

You can't OUT-TRADE a flawed Paradigm.

That's why this first upgrade is all about reprogramming your from the **inside out.**

The biggest thing standing in your way is your perception of yourself.

Let me know if any of this resonates with you:

You **risk too much money** when you're emotional.

You **close out trades** when in a bit of drawdown.

You **fear** pulling the trigger on trades.

You **hesitate** and miss A+ setups.

You **second guess** yourself constantly.

You **self-sabotage** when you finally start winning.

One **big loss up often** wipes out the whole week or month's profits.

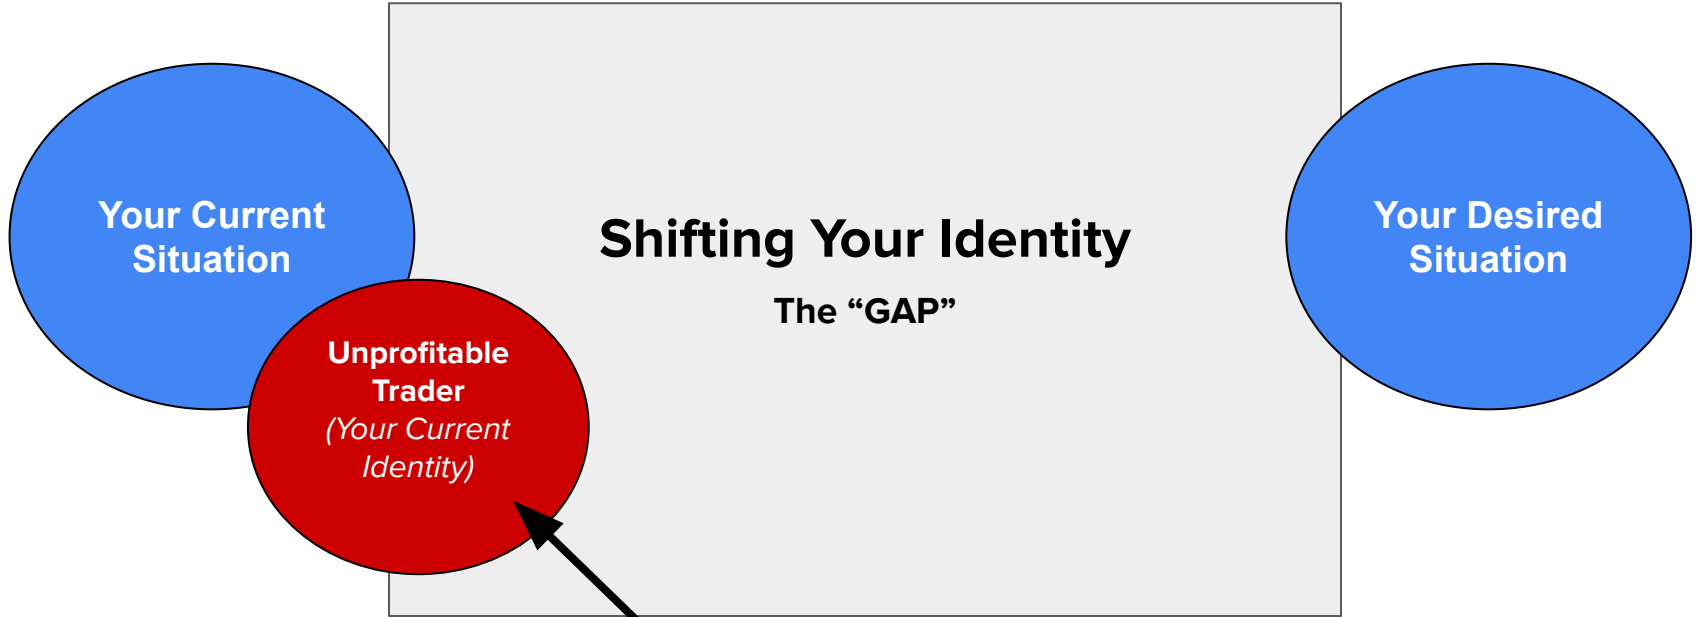

**That's not a market issue.
That's an **identity** issue.**

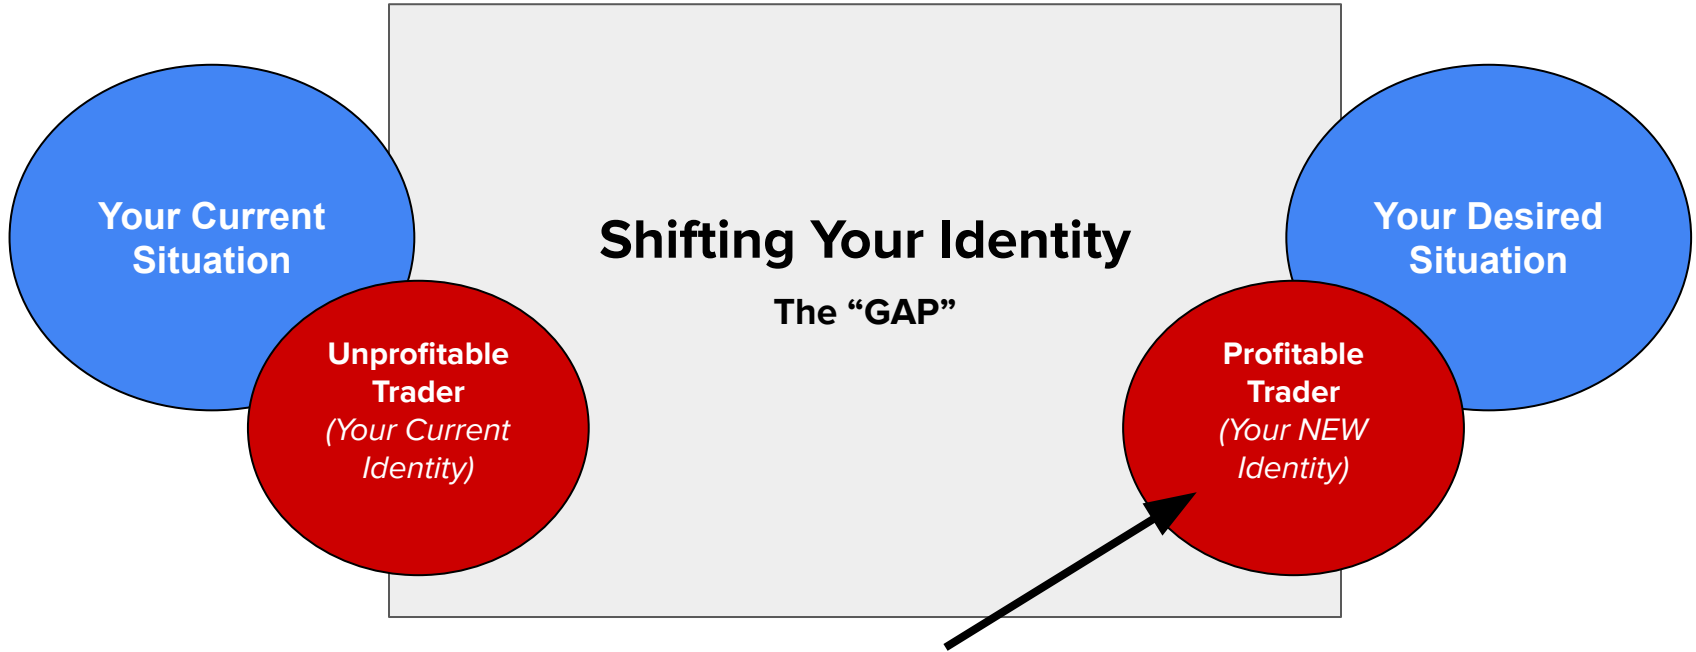

**And until that changes — no amount of indicators, signals, or
“strategy” will **ever fix it.****

You trying to become profitable & achieve your dreams as this Identity will only end in "self-sabotage" and the same results.

**You becoming your New Identity capable of becoming
a profitable trader and achieving your dreams.**

The Unprofitable Trader (**Old You**)

- ✗ Emotion-driven
- ✗ Overtrades due to FOMO
- ✗ Blows accounts
- ✗ Undisciplined in personal life
- ✗ Overtrading & overleveraging
- ✗ Trades like a hobby to “get rich”

Profitable Trader (**New You**)

- ✓ VPE & rule-based
- ✓ Waits for high-probability setups
- ✓ Compounds accounts & profits
- ✓ Disciplined in **ALL** areas of life
- ✓ Follows the plan & manages risk
- ✓ Trades like a business to build wealth

These two traders are trading the same market. But they get completely different outcomes — because they're operating from different identities.

Decide now —
WHAT Trader do you want to become?

Then HOW do you become this New Identity?

**To some of you this may sound like
“woo woo” type stuff...**

But it honestly **changed my life and my
students lives like nothing I have ever seen.**

And that's why the
NEXT upgrade is so powerful...

Because once you've upgraded your identity & you **BECOME the person you need to be a profitable trader you now need a VPE system that's as disciplined as you now are.**

There's only **3 things** you need to do
become a wildly profitable trader.

 **Core Upgrade #1:**

New Paradigm & Identity Shift —
becoming the profitable trader.

 **Core Upgrade #2:**

VPE Trading System — eliminate
emotion-based trading.

 **Core Upgrade #3:**

Capital & Risk Management —
minimizing losses &
multiplying profits.

Core Upgrade #2:

VPE Trading System — eliminate
emotion-based trading.

Most traders trade based off **emotion.**

Most traders are **inconsistent.**

Most traders are **guessing.**

**And that's exactly why
most traders are **unprofitable**.**

They'll say they have a “strategy”

**But when you ask them how they enter, exit, and manage risk —
their answer changes every week 😂**

They tweak indicators after every loss.

They hop between supply/demand, trendlines, or random YouTube concepts.

Their confidence isn't based on logic — it's based on their last trade.

That's NOT a system.
That's **survival mode**.

Here's WHY That's a Problem...

Because in trading,
if you can't replicate it, you can't scale it.

If you don't have a clear, Volume Profile process — you'll always:

- ⚠ **Overthink** your entries
- ⚠ Let **emotions** dictate your decisions
- ⚠ Exit too early or **too late**
- ⚠ **Doubt** yourself after every loss
- ⚠ Miss winning setups due to **hesitation**
- ⚠ Spiral into overtrading, revenge trading, and **blowing accounts**

- Let's say you entered for a **sell position** because you have done your analysis and price seems bearish and overbought
- A few minutes later, you start seeing a **bullish candlestick**, signaling that the trade is going against you.
- **Your brain registers this as a threat to your winning trade.**

- When this happens your brain will create a rush of hormones which produces the impulse for you to close the trade early.
- One candle moving against us and you start panicking as though you are going up on stage to speak to a million people
- You worry that you're about to lose your hard earned money and this **fear caused you to close your trade early**

- An hour later, you open up the charts and you saw price ended going in your way and you start regretting getting out early.
- **“I COULD HAVE MADE \$1000 IF I DIDN’T GET OUT EARLY”**
- Now you start thinking that the market is against you somehow and maybe trading isn’t for you. Maybe you should just go back to working at McDonalds, at least they provide you with a fixed paycheck right?

Here's What You **Need To Do Instead...**

Use the **VPE System**

a rule-based trade plan that removes emotion from the equation.

The right trading system should:

- ✓ Tell you exactly when to enter
- ✓ Have fixed stop-loss & take-profit levels — with predefined R:R
- ✓ Remove guesswork completely — so you execute like a machine

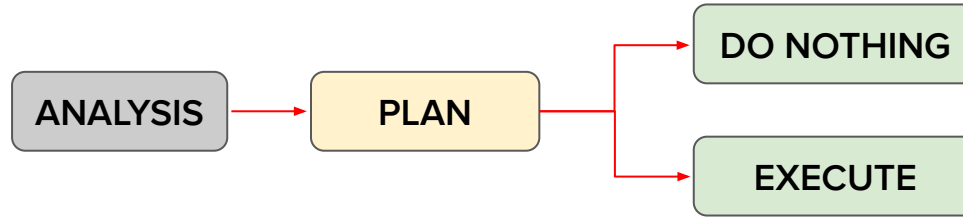

In other words:

**You don't make decisions.
Your **system** does for you.**

Think of your trading like an “algorithm”:

Simple. Scalable. Repeatable.

A+ Mean Reversion Setup

1. **Higher Volume Doji, Shooting Star, Hammer Candle**
2. **D Shape Volume Profile.**
3. **Small to little accumulation of volume outside of VAL/VAH**
4. **Candle in the direction of session mean**
5. **Entry: Close of Signal Candle**
6. **Exit: Point of Control**

Let's break it down Step by Step

Now let me show you exactly how I trade (step-by-step)

This is a **simple** mechanical trade plan that anyone can follow 🙌

Clear rules. Zero guesswork.

Let's break it down on

Higher Volume Shooting Star, Doji, Hammer Candle

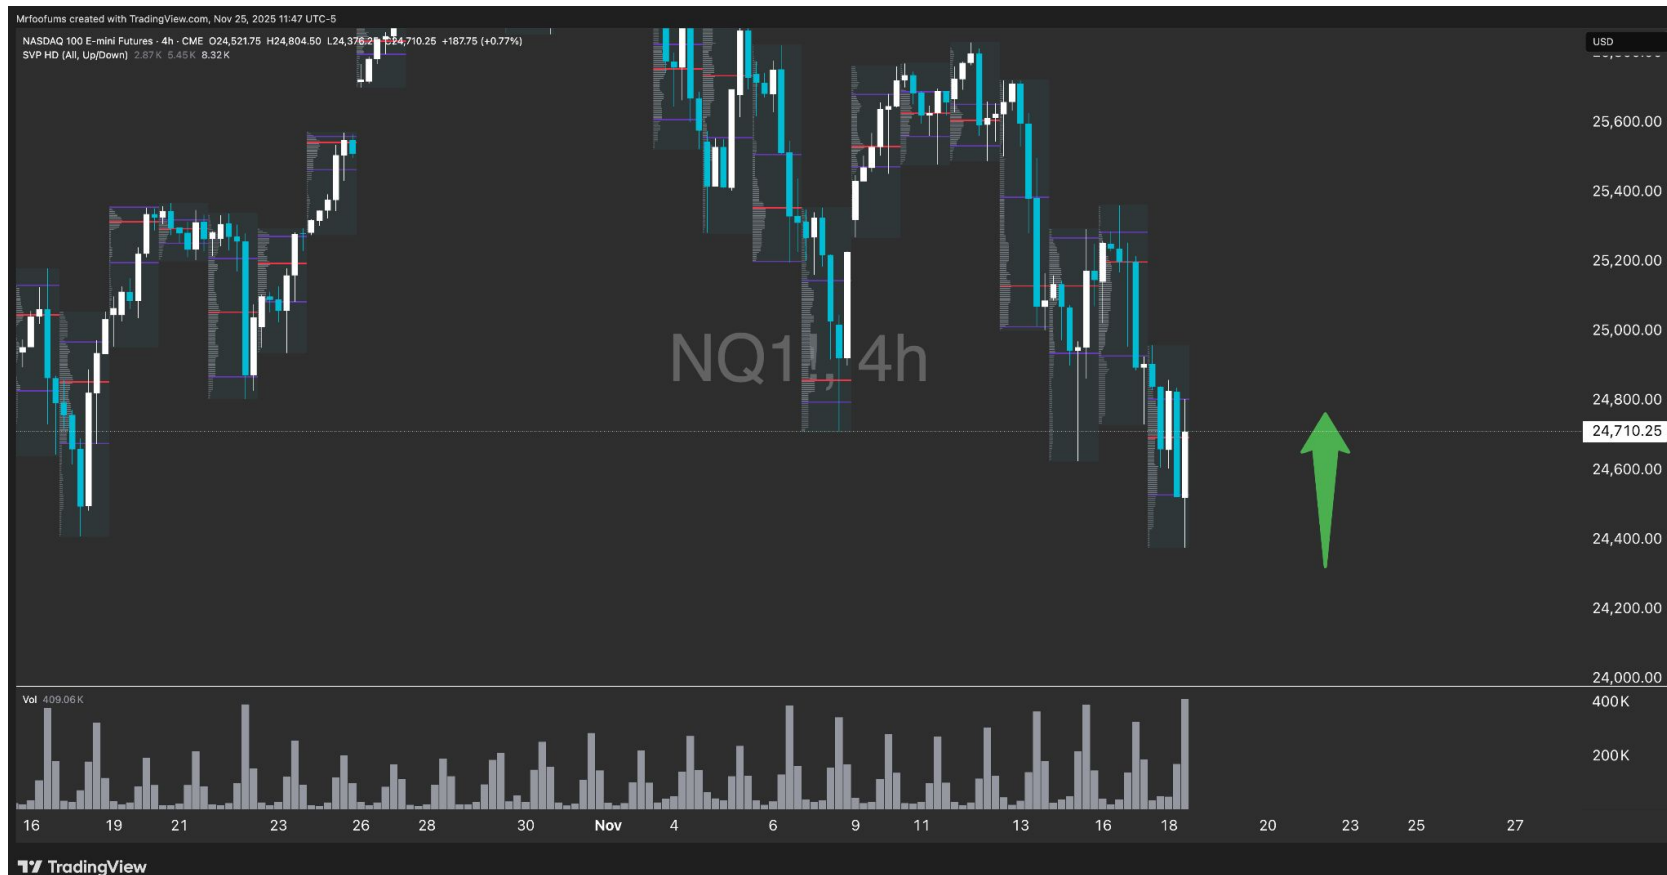

D Shape Volume Profile

Little to no accumulation outside of VAL/VAH

Candle in direction of session Mean

Entry: Close of Signal candle

Exit: PoC or Naked POC

My VPE Trade Plan handed out at the end

- Contains all Workshop slides
- Notes of everything we will discuss
- Swipe files & templates referenced

Once you're trading VPE:

-  You **stop** hesitating and overthinking
-  You start taking only **high-probability setups**
-  You enter off of **Volume Profile** and trust in your system
-  You actually stick to your **trade plan**

And for the first time ever...
you become in control.

**Knowing how to trade based off rules, not emotions,
completely transformed my trading...**

And it transformed my students as well...

Now here's the thing...

Even the best strategy in the world **will still fail
if you **don't manage risk** like a professional.**

**Because without risk management, all it takes is
1 bad blow up day to erase 3 months of progress.**

And that's why in the next upgrade I'm going to show you how the top 1% of traders...don't just win more, they lose better.

Sounds counter-intuitive, right?

Well, what I'm about to show you is SO powerful as you can be **WRONG 70%** of the time and STILL be **wildly profitable**.

There's only **3 things** you need to do become a wildly profitable trader.

🔑 Core Upgrade #1:

New Paradigm & Identity Shift —
becoming the profitable trader.

🔑 Core Upgrade #2:

VPE Trading System — eliminate
emotion-based trading.

🔑 Core Upgrade #3:

Capital & Risk Management —
minimizing losses &
multiplying profits.

Core Upgrade #3:

**Capital & Risk Management —
minimizing losses &
multiplying profits.**

Here's the Problem...

**Most traders treat risk management
as an afterthought.**

**They enter trades emotionally, position size
inconsistently, and scale recklessly.**

**They think the money is made in
the entry when in reality...**

**Money is made through controlled, strategic,
and repeatable **risk minimization**.**

**Without mastering this, even the
best strategy can't save you.**

Here's Why It's a Problem...

When you don't have a risk management system:

- 🚩 You **risk too much** on losses... and too little on winners.
- 🚩 You feel emotionally hijacked when a trade **goes in the red**.
- 🚩 You revenge trade, overtrade, and spiral into **unprofitability**.
- 🚩 You never build real **trust** in your system... or in yourself.

**This is how traders blow accounts, destroy confidence,
and stay stuck in the loop for years.**

Here's What to Do Instead...

Let's break this into
actionable frameworks:

Step 1: Fixed % Risk per Trade (This Alone Can Save You)

- **Use a fixed % risk model on every single trade — based on current account balance.**
 - This is the foundation of professional trading.
- **Example: You're risking 0.5% per trade.**
 - On a \$100K funded account, that's \$500.
 - If you **lose** a trade, your account drops to \$99.5K — now your risk = \$497.50.
 - If you **win**, the account grows — and so does your next position size.

This creates two superpowers:

1) Automatic **compounding on wins**

2) Automatic **risk reduction on losses**

Recommendation To Start:

- **Risk:** 0.25-0.5% per trade (1% max)
- **Target Win Rate:** 30%+
- **R:R Minimum:** 1:5
Example: Risking —10 ticks to make 50 ticks.

Step 2: Position Sizing with Precision

- **Never guess or “eyeball” your risk.**
- **Use a position size calculator before every single trade**
- **Input:**
 - Futures Contract
 - Risk Ratio %
 - Stop loss (in ticks)
 - Current account balance
- **Output:**
 - Exactly how many contracts to trade

Step 3: Your Daily Capital Protocol

- **Battle-tested rules:**
 - Limit trades: Max 3 trades/day
 - No opportunity/high-probability setup = no trade
 - Only enter when all rules align
 - Use a pre-trade checklist

This framework **eliminates errors,
inconsistency, and emotion.**

**Congrats you're now operating like a
disciplined hedge fund manager
not an online casino gambler.**

“Simple scales. Complex fails.”

Why this changes the game:

- ✓ You **protect** your downside
- ✓ You stay **calm** in the storm, even in drawdown or losing series of losing trades
- ✓ You scale **responsibly & profitably**
- ✓ You actually start **compounding** your capital

**This is how I became highly profitable, and
scaled up to \$150k+/month in profits**

And it's not just me... it's my students too..

When you do master this...

You gain the power to grow any size account, with precision, discipline, and peace of mind and become consistently profitable, month after month.

The biggest question I get from beginner traders is...

“How do I make \$10,000/month trading?”

So now let's talk about the math to making **\$10k+/Month trading**

Most traders **falsely believe** making \$10k/month trading requires:

- ✗ Insane leverage & lot sizes
- ✗ 100% win rates
- ✗ Staring at charts 12 hours a day
- ✗ Getting lucky on some crypto meme coin
- ✗ Going full margin on a Jerome Powell news event

**This is simply not true &
part of the **flawed paradigm**.**

Let me show you how it's actually done using pure math, smart capital management, and a proven **VPE trading system.**

✨ Here's the magic formula:

Number of trades × Win rate × RR-Multiple × Capital = Profit

Let's break this down:

The Formula To \$10k+/Month Trading:

Number of trades × Win rate × RR-Multiple × Capital = Profit

- **Trades/month:** 10 high-quality setups (2–3/week)
- **Win rate:** 30% (yep, just 3/10 wins)
- **Risk per trade:** 0.5%
- **Account size:** \$100,000 (funded)
- **RR ratio:** 1:5 (risk \$500 to win \$2.5k — on 0.5% risk)

Here's how it plays out:

The Formula To \$10k+/Month Trading:

Number of trades × Win rate × RR-Multiple × Capital = Profit

- You take 10 trades/month at 30% win rate, risking \$500/trade (0.5%):
 - ✗ Lose 7 trades: **-\$3,500**
 - ✓ Win only 3 trades at 1:5 RR: **+\$7,500**
 - **Net profit: +\$4,000/month**

**But here's where the power
of compounding kicks in...**

If you compound monthly profits and reinvest into your growing account:

- **Month 1: \$100k → +\$4k = +\$104k**
- **Month 2: Risking 0.5% of \$104k → +\$4.16k**
- **Month 3: Risking 0.5% of \$108.1k → +\$4.32k**

You start **making more money** with the
SAME system — without increasing risk.

**By Month 6, you're easily on
pace for \$10k+/month.**

You can still be **WRONG 70%** of the time and **STILL** be **wildly profitable** & make **\$10k+/month trading**.

Here's WHY this works (even with a low win rate):

- ✓ Fixed % risk reduces losses when you're in a drawdown
- ✓ High R-multiples let your wins make up for all the losses
- ✓ Compounding makes the profits exponential over time
- ✓ No need to take 100 trades/month — just 1–2 quality trades/week

Here's what this means for YOU:

If you're following **this proven
capital & risk management system...**

If you're **not** overleveraging...

**If you're focusing on
high-probability setups only...**

**If you're consistent
following it over time...**

**You don't need to “hope” & “pray”
your way to \$10k+/month.**

**You just need to stick to the system,
manage your risk, and let the math work in your favor.**

Then once you have proven it, you can get more funded accounts, and **scale up your capital.**

Now what happens if you have \$500,000 in funding?

You keep the **SAME** numbers:

- Win rate: 30%
- Risk per trade: 0.5%
- RR ratio: 1:5

Here's How It Breaks Down:

0.5% risk of \$500,000 = \$2,500 risk /trade

-  7 Losses = \$2,500 x 7 = **-\$17,500**
-  3 Wins = \$12,500 x 3 = **+\$37,500**
- **Net Profit** = **\$20,000 /month**

And that's not even aggressive...

This is low risk, high reward, mechanical execution.

This is **incredibly effective.**

**This framework has helped me make over
\$1,000,000+ in profit from the markets...**

**And helped my students get over
\$5,000,000 in total funding** 💰

Seen a big move down after hour grabbed a trash evaluation account and went Deep... grabbed 3000 grand on a negative 1500 account was up 1500, Sul said it was gonna keep going, went back in for the rest...he was right....funded. 🙌 (edited)

And that's another one! Self Funded my own account this week and passed another eval.

#VPE is where it's at!

So at this point...

You've seen the system.

You've seen exactly how I trade — and how I've helped 1400+ students scale to \$10K/month and beyond using:

 **New Paradigm** — how trading really works

 **Identity Shift** — from retail gambler to professional trader

 **VPE System** — clear rules, zero emotion

 **Capital Management Framework** — protect downside, scale upside

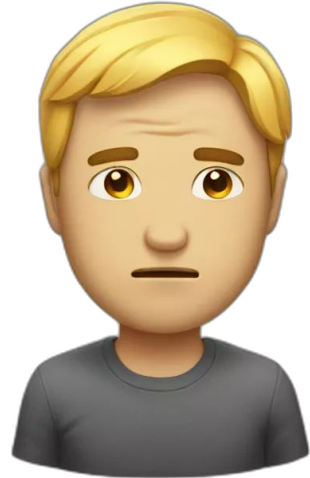

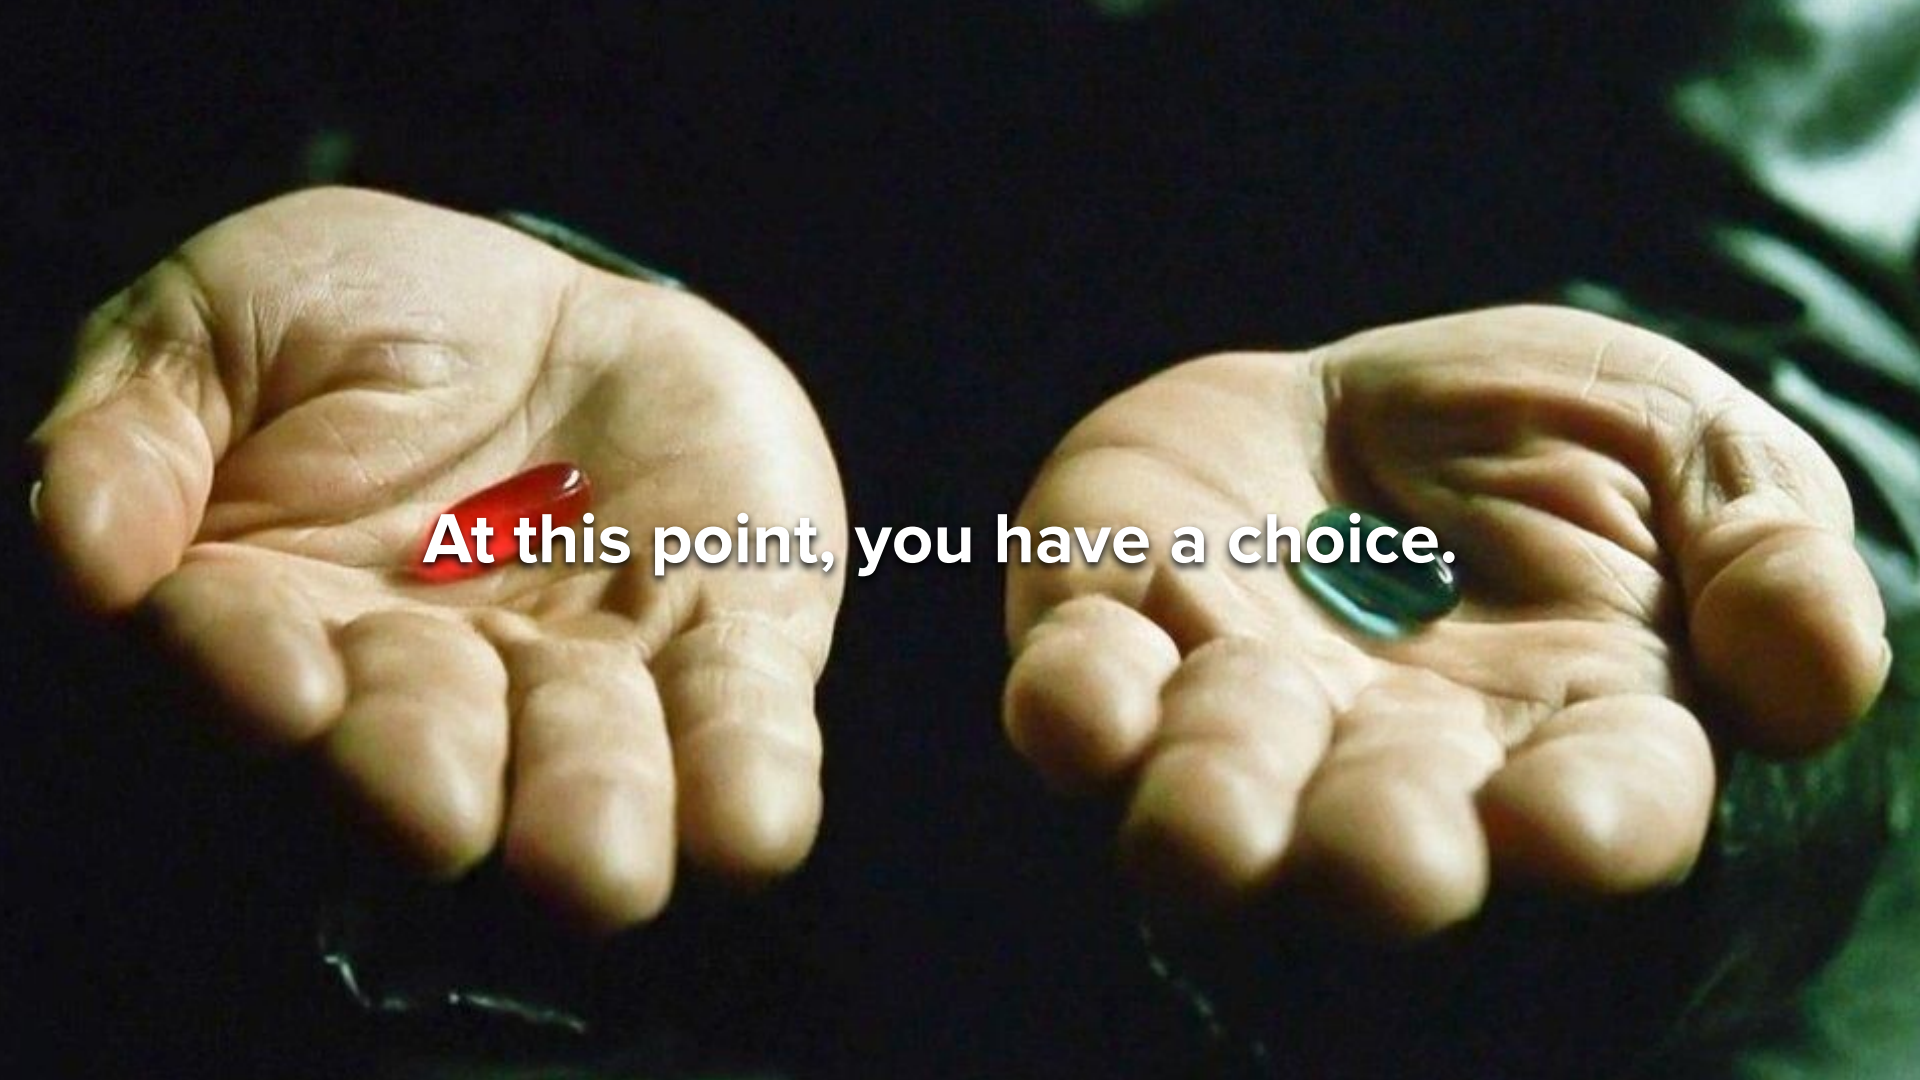

Right now, you're at a **turning point**.

One that's either going to completely
transform your trading &
change your life

Or keep you stuck in a constant loop of
unprofitability and failed dreams.

A close-up photograph of two human hands, palms up, against a dark background. The left hand holds a single red, oval-shaped pill. The right hand holds a single green, oval-shaped pill. The text "At this point, you have a choice." is overlaid in white, bold font across the center of the image, with the word "At" partially overlapping the red pill.

At this point, you have a choice.

2 paths lie ahead...

✗ Path #1 — Keep doing what you've been doing.

You can leave this Workshop with the new found insights I've shared with you today, and you can go back to doing what **you've always done.**

Keep **gambling**.

Keep relying on hope.

Keep watching YouTube videos, trying random signals, **switching strategies** every week...

Keep **feeling that anxiety** in your gut every time you enter a trade.

You'll stay stuck in that **loop where you win some,
lose some ... but never really **gain traction**.**

Keep **over-leveraging**.

Keep **blowing accounts**.

Keep telling yourself, “This time will be different”...

Only to be back at **zero or worse**...

Keep wishing & dreaming about becoming the trader you know you're capable of being... instead of actually becoming them..

Another **missed opportunity.**
Another year of **wasted potential.**
Another version of yourself **left behind.**

That used to be me too.

So I say this with love...

That path? It leads to years
and years of **pain & suffering.**

**And if you're honest
with yourself, **you know it too.****

OR ...

Take the **red** pill.

 **Path #2 — Follow the Proven
VPE Trading System**

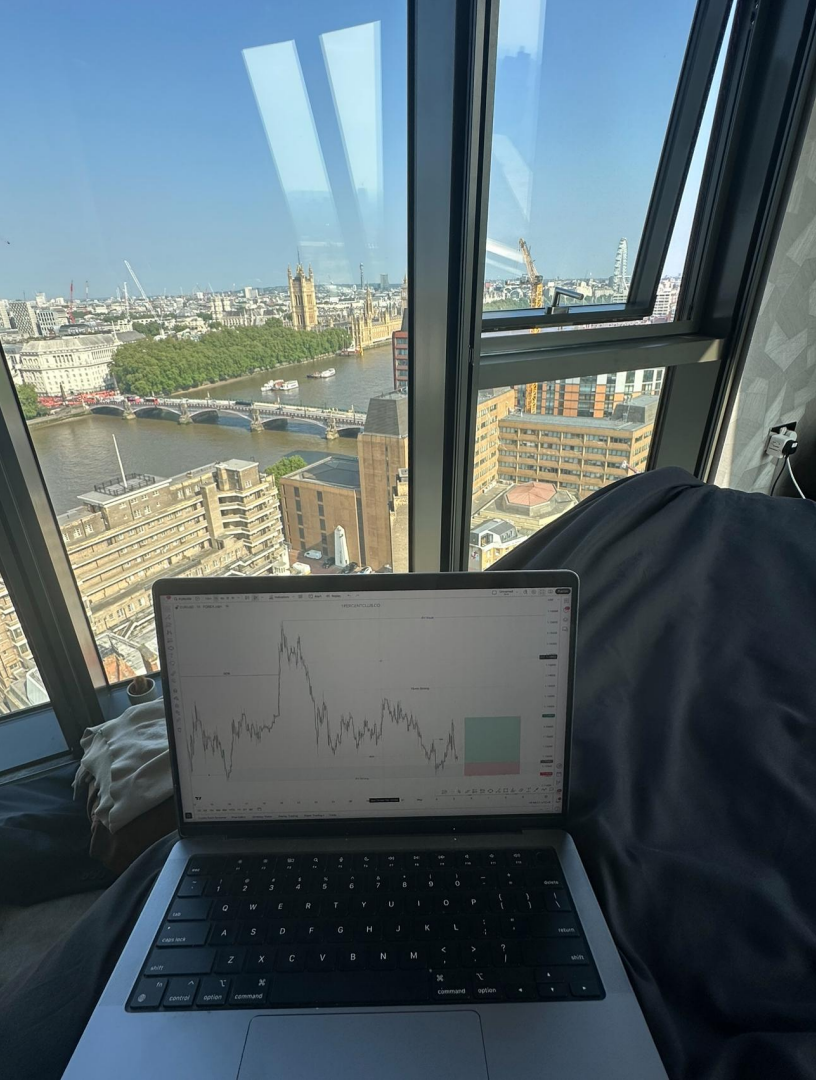

You can take the **smarter path** — and shortcut **YEARS** of trial and error, and pain & suffering.

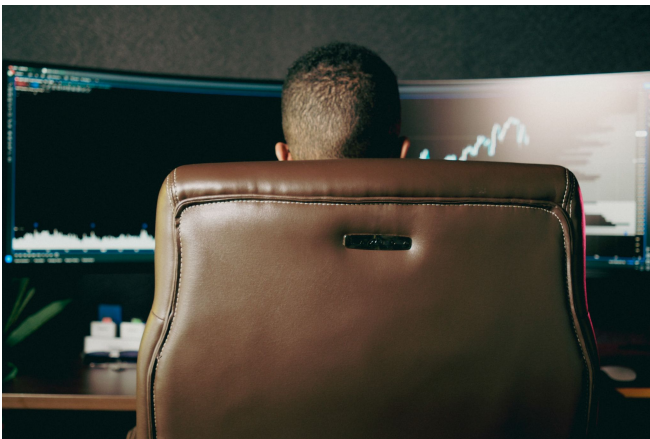

Just imagine this...

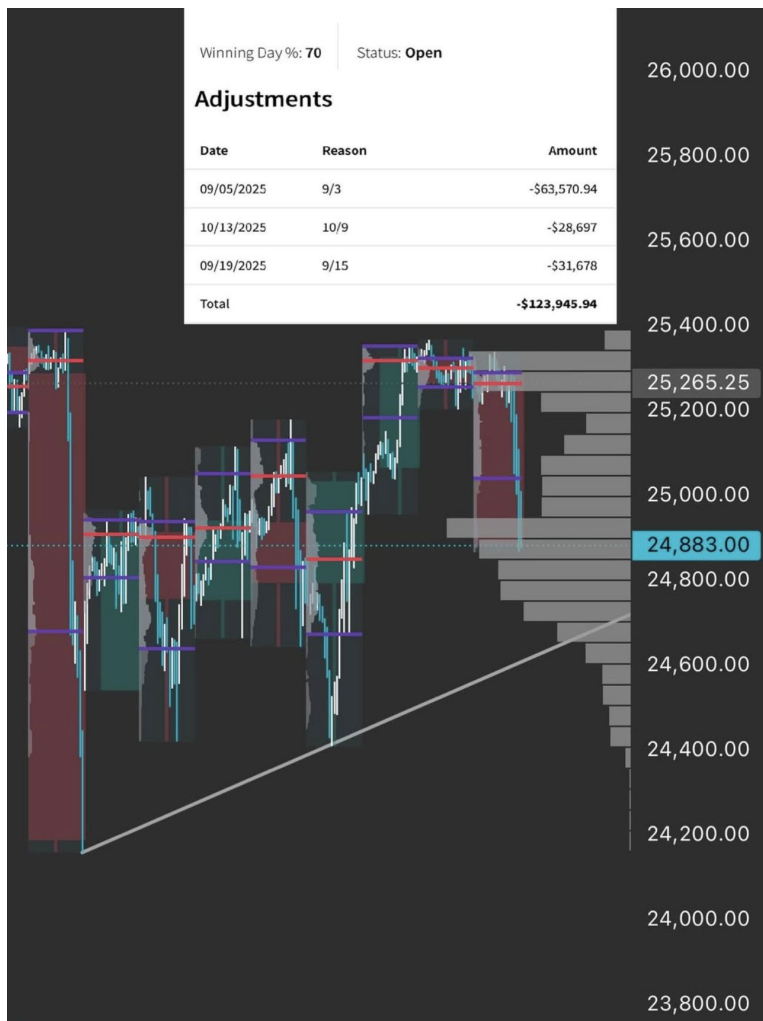

**You wake up in the morning as a
full-time trader,
completely free and in control of your day,**

You sit down at your charts **absolutely dialed in.
No noise. No second-guessing. Just **execution.****

**You grow your funding accounts
from...**

\$100K.

\$250K.

\$500K.

\$1M+

You don't trade from fear you trade with conviction.

Because you've got a proven edge, a risk framework, and mentors in your corner who've done it.

You're no longer “**hoping**” for success.
You’ve **engineered** it every day.

You're inside a private **circle of elite traders...**

People who are **scaling funded accounts**,
stacking withdrawals, and holding
themselves to a higher standard.

And suddenly...

**The identity of who you *used to be*, the version that
hesitated, doubted, overtraded, blew accounts?**

That version is gone.

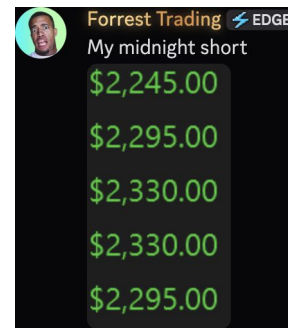

**Replaced by a new, elite, professional version of you who's in the
top 1% of traders mentally, emotionally, and financially.**

You start seeing the wins stack up:

- ✓ 1:5 R:R trades hitting TP
- ✓ \$7,500 withdrawal
- ✓ Multi-6-figures in funded accounts
- ✓ You're finally consistently profitable.

**And you finally feel like you're
getting ahead in life, not falling behind.**

✗ This *isn't* just about money.

- ✓ It's about **freedom**.
- ✓ It's about taking back **control of your time & your future**.
- ✓ It's about proving to yourself, once and for all, that you **have what it takes**.

And every single win you collect along the way?
That's just confirmation of *who you're becoming*.

So, now you've got **2 options...**

You can keep doing what **hasn't worked for you...**

**...Or you can let me walk you through the exact system that got me
and my students to **consistent, scalable trading profits.****

A year ago, I asked myself:

“If I could go back in time and build the perfect environment for myself the one that would’ve helped me master this trading game and scale to \$10k, \$30k, even \$100k+ months from trading...”

... What would that look like?”

And that's exactly what I've built...

VPE MASTERY

What is VPE Mastery?

The #1 Mentorship Program For Traders Who Want To Go Full-Time, Get Funded & Scale To \$10k-\$30k+/Month

- **The “VPE Mastery”** — is an elite-level mentorship built for existing & aspiring traders who want to master a proven mechanical trading system, get funded, and build real wealth through trading.
- **It's designed to take you from** → confused, inconsistent, and unprofitable
- **To** → funded, confident, consistently profitable, scaling accounts, and making 6 & 7-figures within 6-12 months or less.

This is **NOT some course or
“one-size-fits-all” signal service.**

**This hands on [mentorship program](#) is unlike
anything you've ever seen...**

Here's what makes it different...

The Perfectly Engineered Trading Transformation

Proven VPE System

We stripped away the guesswork, noise, and emotion from trading... And replaced it with a precision-based, rules-driven system designed to produce elite-level consistency. Most traders gamble. Our students engineer asymmetric outcomes using a process built on logic, edge, and execution. If you follow it, you compound accounts, certainty, profits and identity.

New Paradigm & Self-Transcendence

This isn't just strategy — it's inner evolution. You're not just upgrading your skills... you're upgrading *yourself*. We rewire how you think, how you feel, and how you perform under pressure — from emotional, scattered, amateur...to poised, elite decision-maker. What takes most traders years (or never), we help you install in weeks through structured identity work, mindset calibration, and psychological rewiring.

Winning Community of Elite Traders

Changing your life in isolation is near impossible. That's why our students join an *elite inner circle* a tight-knit community of serious, funded traders pushing for more. Inside The Traders edge dreams aren't laughed at they're normalized. You're surrounded by people who think bigger, execute sharper, and demand more from life... and hold you to the same standard.

Expert Coaching & Mentorship

There's levels to this. Inside, you're coached daily by 6 & 7-figure traders and liquidity experts who've been through the fire and forged real results. We're not YouTubers. We're active Traders. From live calls, live trading rooms, and real-time execution feedback — to one-on-one guidance and strategic reviews — you're never left guessing. Just executing with confidence.

1.

Proven VPE Trading System

**Traders edge includes 40+ in-depth, step-by-step lessons —
all created by me personally.**

**Inside, I break down every single aspect of becoming a 7-figure
trader from scratch.**

The program is broken down into 9 phases.
(from beginner to advanced)

Phase 1: Foundations

Everything you need to start your trading journey — the right way:

- Understand futures trading
- Learn trader lingo without the confusion
- Discover your ideal trading style: scalping, swing, or intraday
- Follow clear step-by-step tutorials to set up your platform

Why this works:

Without this clarity, you're just gambling.

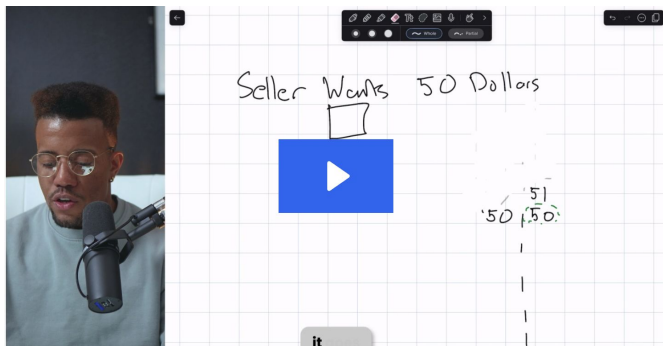

We build you a rock-solid base from Day 1.

Phase 2: Understanding Market Theory

This is where everything starts to click. You'll stop guessing and start seeing the market for what it really is a live auction between buyers and sellers.

You'll learn:

- Why Auction Theory is the foundation of all price movement
- How Double-Sided Auctions reveal where value is being built or broken
- How to identify imbalances, liquidity zones, and key transitions

Why this works:

Most traders chase candles pros read context. When you understand how the auction drives price, you'll trade with clarity, precision, and confidence every single day.

Phase 3: Volume Analysis

The most in-depth technical analysis training you've ever seen.

You'll stop guessing where price might go and start seeing where institutional money has to go.

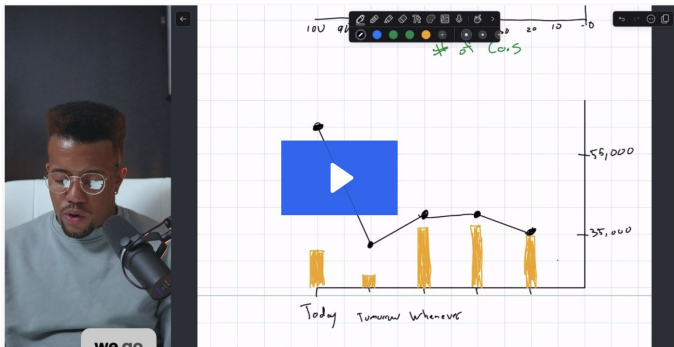

You'll learn:

- Why Volume is the Key Signal
- How to use Horizontal Volume (Volume Profile) t
- How to analyze Vertical Volume and the Volume Histogram
- How to mark Daily Liquidity Levels

Why this works:

Futures markets run on volume it's the heartbeat of price discovery.

When you can read volume correctly, you'll know exactly where traders are trapped, where smart money is active, and how to position yourself before the move happens.

Phase 4: Technical Analysis Techniques

Master the Art of Reading Market Structure

This is where your charts stop being noise and start telling a story.

You'll learn:

- Why Technical Analysis still matters
- How to draw Trend Lines
- How to plot Support & Resistance zones
- How to spot Consolidation Patterns
- How to use Measured Moves
- Candlestick Analysis with SuL
- How to identify Pattern Repetition to anticipate the next setup

Why this works:

Once you can read structure like this, every chart becomes a roadmap, every setup becomes mechanical, and every decision becomes clear.

Phase 5: Risk Management

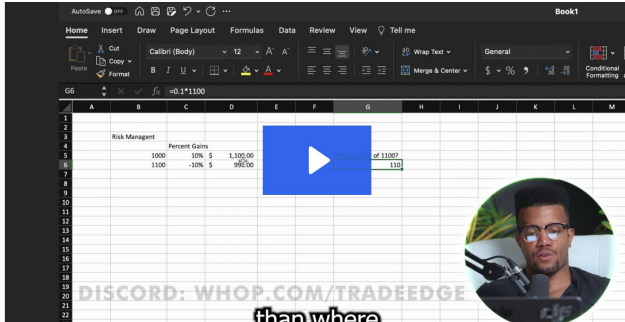

Protect Capital. Trade Like a Professional.

You'll learn:

- The real Importance of Risk Management
- How to identify and respect your Personal Risk Threshold
- Step-by-step Risk Management

Why this works:

Without a risk system, even the best setups fail.

Phase 6: Mean Reversion Trades

Profit From Market Exhaustion With Precision

This phase teaches you how to spot and execute high-probability mean reversion setups using the VPE System™.

You'll learn:

- Introduction to Mean Reversion
- How to Understand Mean Reversion
- Step-by-step setups for catching reversals with tight risk
- How to analyze and refine your trades to maximize consistency

Why this **works**:

Most traders get trapped chasing trends. It's calm, calculated, and one of the most reliable edges in futures trading.

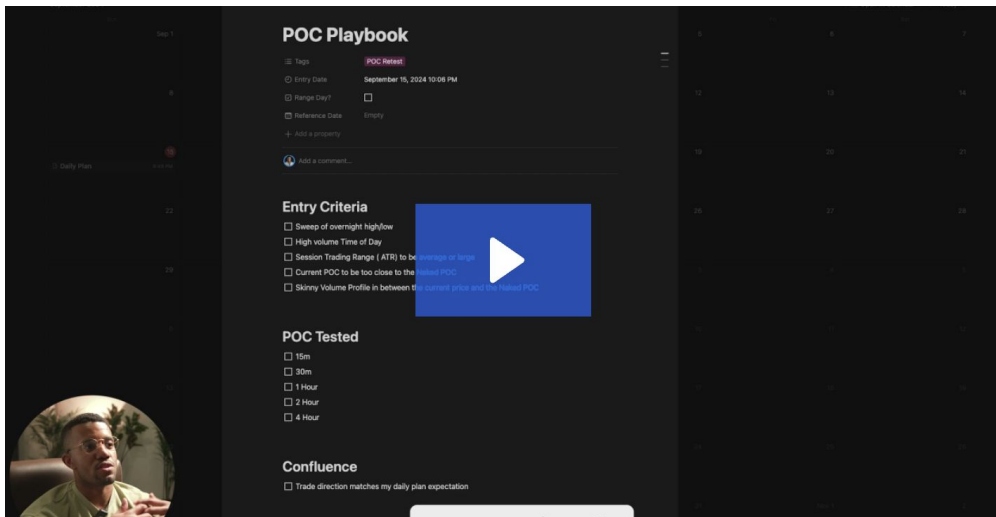

Unlock My 7-Figure Trading System

This is where you get full access to the exact VPE trade plan I personally use the one that's generated over 7 figures in trading profits.

This trade plan breaks down:

- My exact entry criteria down to the candle formation, liquidity sweep, and zone interaction
- What I avoid so you stop forcing bad trades and start waiting for the real ones
- Precise rules for confirmation, execution, trade management, and exit
- Timeframes I use, market conditions I filter for, and how I adapt across sessions

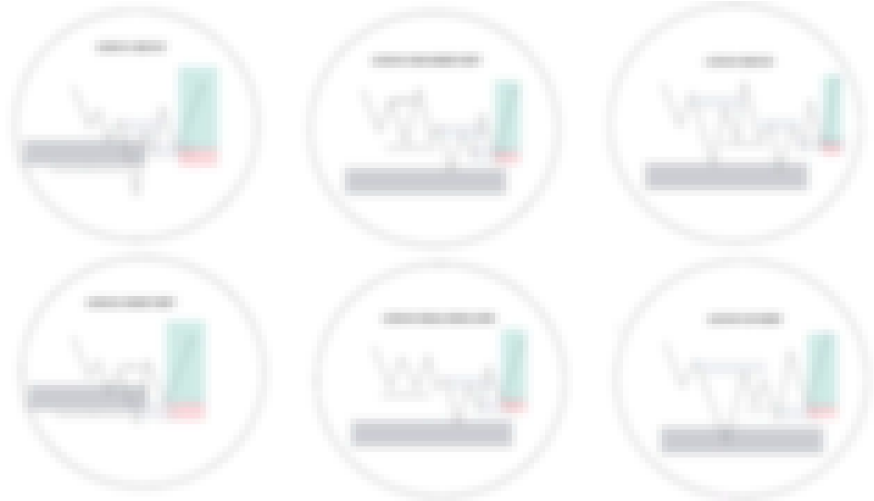

Unlock My Proven Entry Models

These are the same precision setups our students use to consistently hit 1:5, 1:10, even 1:20 R trade

Every model includes:

- Real trade breakdowns and chart walkthroughs
- Visual cheat sheets and execution checklists
- Designed to work with the VPE system

Phase 7: Fundamental Analysis

Understand the global forces that move markets and how to stay ahead.

- Key economic indicators & how they affect currencies
- Interest rates & central bank impact
- Real-world fundamentals behind price moves

Why this works:

When you understand the “why” behind price moves, you stop trading blind.

Phase 8: Trading Psychology

Master the mental game — because emotions makes or breaks performance.

- Think like a professional trader, not a retail gambler
- How to Get into the Zone when Trading
- Build discipline, mindfulness, and emotional control
- Eliminate fear, greed, and hesitation in live markets

Why this works:

Even the best strategy fails if your mind isn't ready.
This phase ensures it is.

Phase 9: Scaling Accounts

Turn everything you've learned into a clear path to funding and consistency.

- The exact blueprint to get funded
- Your personal 1% Roadmap
- End-of-day review process for peak performance
- Step-by-step game plan to profitability in 6–12 months

Why this works:

This is where it all comes together. And it's why our students win, become full time traders, and make 6-7 Figures in profits.

"I finally feel like I can hit my goal of 1000 dollars a day."

Damien Grant

That's just scratching the surface...

**Let's talk about another massive component
of leveling up and becoming a profitable trader...**

The Perfectly Engineered Trading Transformation

Proven VPE Trading System

We stripped away the guesswork, noise, and emotion from trading... And replaced it with a precision-based, rules-driven system designed to produce elite-level consistency. Most traders gamble. Our students engineer asymmetric outcomes using a process built on logic, edge, and execution. If you follow it, you compound accounts, certainty, profits and identity.

New Paradigm & Self-Transcendence

This isn't just strategy — it's inner evolution. You're not just upgrading your skills... you're upgrading your *self*. We rewire how you think, how you feel, and how you perform under pressure — from emotional, scattered, amateur...to poised, elite decision-maker. What takes most traders years (or never), we help you install in weeks through structured identity work, mindset calibration, and psychological rewiring.

Winning Community of Elite Traders

Changing your life in isolation is near impossible. That's why our students join an *elite inner circle* — a tight-knit community of serious, funded traders pushing for more. Inside The 1% Club, dreams aren't laughed at — they're normalized. You're surrounded by people who think bigger, execute sharper, and demand more from life... and hold you to the same standard.

Expert Coaching & Mentorship

There's levels to this. Inside, you're coached daily by 6 & 7-figure traders, trading psychologists, and liquidity experts who've been through the fire and forged real results. We're not YouTubers. We're active Traders. From live calls, live trading rooms, and real-time execution feedback — to one-on-one guidance and strategic reviews — you're never left guessing. Just executing with confidence.

Most people join communities, telegram signal groups, or buy courses ... But then **never see any results...**

Why is that?

Most people join a program and attempt to change their life/trading but their **current environment is not setup to assist that transformation.**

Their friends, family, wife/husbands, etc. all doubt them.

**They speak different languages and
they live in **different worlds**...**

**When you go against your environment, things are
challenging beyond belief and **most people give up**
because it's just too hard alone.**

I experienced this myself for years...

**I sat in this pain and it plagued my existence for years until
I figured out what **the problem** was...**

You need to be in a community that is on the same wavelength as you, speak the same language as you and have the same life mission as you to become a **wildly profitable trader.**

**You need to be around people who build you up
instead of break you down...**

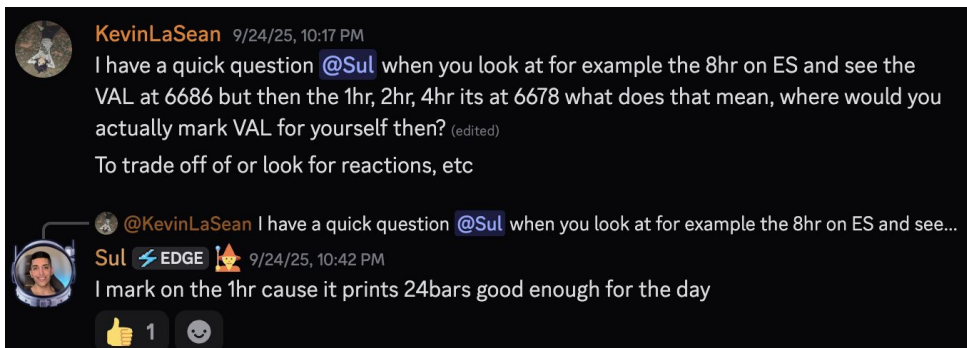

That is exactly why I built the
“The Trading Floor”

The Trading Floor

Private network for highly motivated & like minded traders

Discuss trade ideas

Network with other traders

Request instant feedback & support

Celebrate your wins and milestones

Ask ANY questions & students will be more than happy to help you out.

QUESTION 

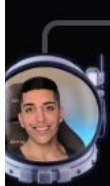

COMMENTS 

KevinLaSean 9/24/25, 10:17 PM

I have a quick question **@Sul** when you look at for example the 8hr on ES and see the VAL at 6686 but then the 1hr, 2hr, 4hr its at 6678 what does that mean, where would you actually mark VAL for yourself then? (edited)

To trade off of or look for reactions, etc

@KevinLaSean I have a quick question **@Sul** when you look at for example the 8hr on ES and see...

Sul   9/24/25, 10:42 PM

I mark on the 1hr cause it prints 24bars good enough for the day

All live sessions are **recorded** for you to rewatch anytime

And is **NOT** some “course” that I recorded over a weekend...

**It's the byproduct of 10 years of work, absolute mastery in trading,
multiple iterations, millions in personal investments
and it's like nothing else that exists today....**

Let's put this in perspective and do the math...

Here's the **disturbing cost** of doing this alone...

Let's just be **fully real** for a second...

**If you try to figure this all out on your own, it could
cost you years of your life. And I mean years.**

I spent over half a decade building this system.
Blowing accounts. Burning out.
Ripping apart every aspect of my identity to finally figure this out.

You want to learn trading? Cool.

But who's teaching you to think like a professional hedge fund trader? Who's rewiring your mindset, execution, psychology, and system into one complete machine?

**If you don't have that, then here's
what you're really signing up for:**

The **Disturbing Cost** of Doing This Alone

- 3-10+ years of trial and error trying to “figure it out” and still feeling stuck at square one.
- 1,000’s of hours wasted testing random YouTube strategies that look good on a backtest but blow up under pressure.
- Expensive mistakes that could cost you 5-figures or more before you even get consistent or profitable.
- Psychological trauma from tilt, over-leveraging, revenge trading, and stacking shame on top of shame because no one taught you how to master yourself.
- Trying to build a high-level circle... when you’re surrounded by noise, gamblers, old friends/family and wannabe “traders” who treat this like a hobby not a profession.
- Burnout. Confusion. Emotional breakdowns. And a trading account that stays stuck on demo or never gets past \$1K

That's what “**doing it alone**” actually looks like.

And maybe you're thinking...

**“Well Forrest, I’ll just try to piece this together,
I’ll figure it out on my own .. and if it doesn’t work I’ll come back.”**

But here's the truth:
The longer you wait, the more it costs you.

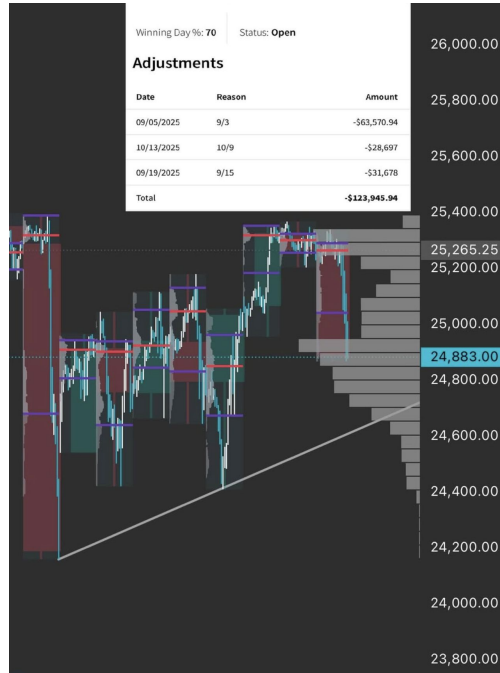

**NOT just in money & lost capital,
But **emotional turmoil** within.**

**Because while you're out there spinning your wheels,
there are [traders inside VPE Mastery](#)...**

Scaling **6 & 7-figure** accounts

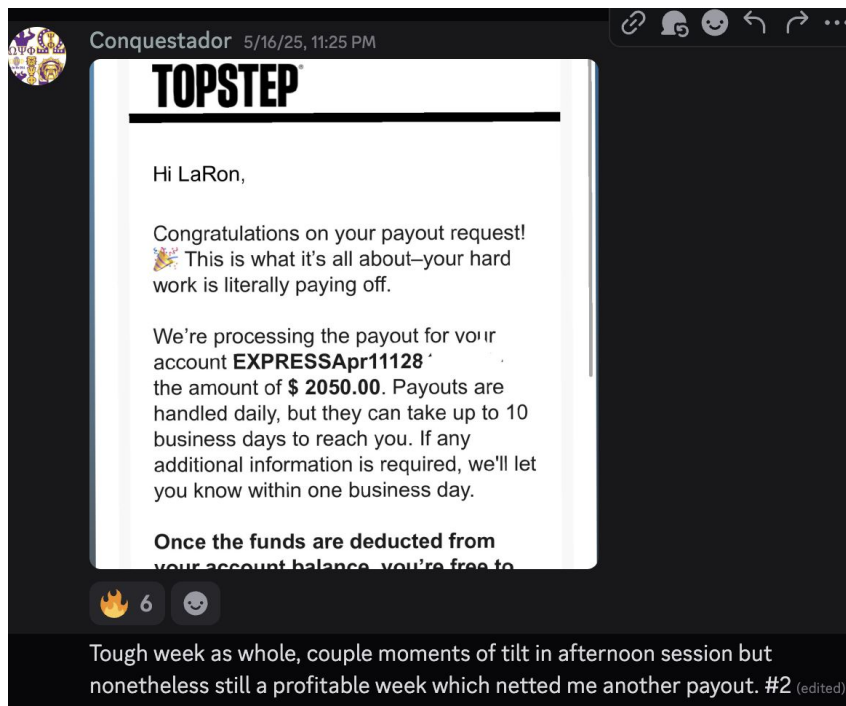

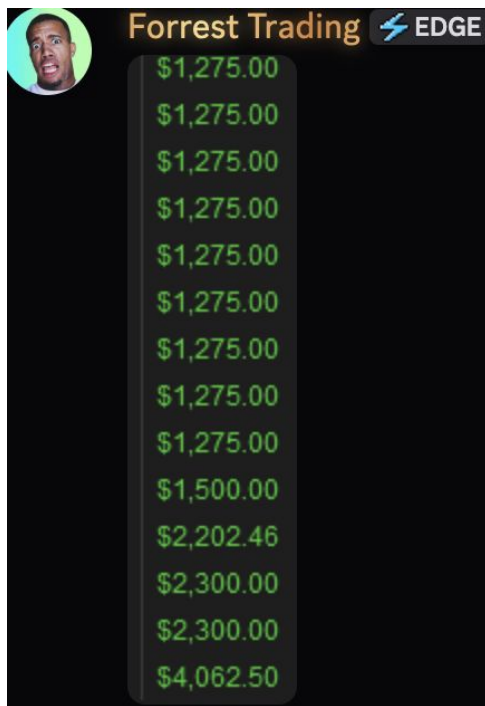

and filter results. Refer to your Statements for

Getting funded in 1-6 months or less

 **Hitting consistent profits, withdrawals & payouts**

Wanted to wait a couple months to leave this testimonial. Traded with Sul and the wonderful mods in another Disco for about 6 months. Noticed that all the value I was getting out of the discord was from the members. Sul, Balenci, Dallon (with the paper hands) Internet dad better known as bocoso. I felt like I was already getting [REDACTED] a month worth of value out of them in the other disco so I signed up for this disco immediately after finding out it existed. My inconsistencies have become few and far between and my consistency is going up. Getting an inside look at the psychology of accomplished traders w/ proof is worth a whole lot more than [REDACTED] I have now passed 6 PA accounts and working on another 4 demo accounts. Taking it slow and one step at a time building towards being the accomplished trader these guys are.

**And rewiring their identity for
performance, **freedom**, and mastery**

Time is the **most expensive cost of all.**

The only question is **how long** are willing to suffer
& **how much** are **you willing to pay** for it?

Let's break down exactly what's inside **VPE MASTERY — and why it's the most complete trading transformation on the market...**

Full In-Depth Training Program

📁 Welcome To The Course

📁 Understanding Market Theory

📁 Volume Analysis

📁 Technical Analysis Techniques

📁 Risk Management

☰ Mean Reversion Trades

📁 Prior POC Trades

📁 Developing and Executing a Trading Plan

📁 Trend Days

📁 Trading Psychology W.I.P

📁 Extras

This is the step-by-step training roadmap with over 40+ up to date video lessons for every stage of where you're at in your trading journey.

Showing you exactly how you can go from:

- Complete beginner, unprofitable, emotional, losing trader.
- To confident, professional, funded & consistently profitable trader

Everything we do. In detail. On demand. You don't need more information. You need a system that actually works. And that's exactly what this is.

Live Trading Sessions With Me Directly

This is the shortcut most traders will never get.

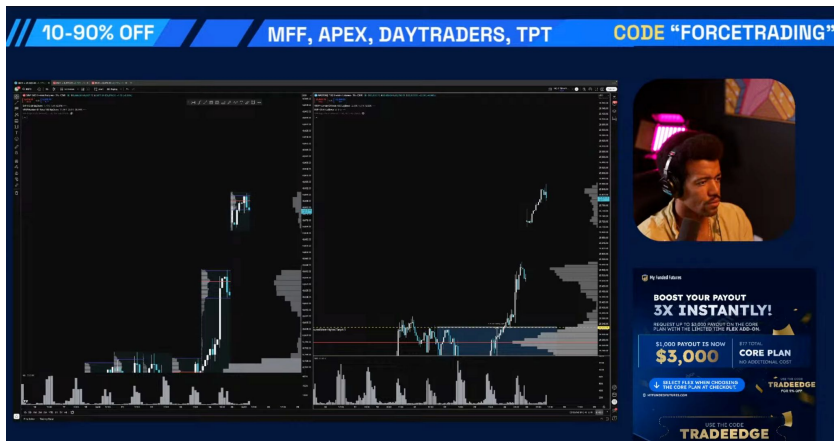

You'll see exactly how I enter, manage, and exit trades in real-time.

You'll see:

- The setups I take and which ones I skip & why
- My mechanical execution logic in real-time
- How I manage emotions and adapt on the fly

You're not guessing anymore. You're plugged into the source.

It's like having a 7-figure trader sit next to you whispering in your ear what to do, what not to do, and how to build real skill under pressure.

Inner Circle Trading Community

Join

Join 2,062 members

You become who you're surrounded by.

Inside, you'll be surrounded by:

- Traders getting funded
- Traders scaling 6- and 7-figure accounts
- Traders doing the WORK every single day

This isn't Twitter. This is a high-performance, no-BS environment built to sharpen you.

Inside, momentum becomes inevitable.

Professional Trading Dashboard & Tools

Elite traders track. Amateurs guess.

Inside, you'll use our custom-built dashboard:

The entire curriculum, structure, and coaching system is designed around **one mission:**

Turn you into a **consistently profitable futures trader**
who can get funded, scale to 6-7 figures, and become an elite trader.

You'll eliminate guesswork, gain control of your performance, and unlock an **entirely new level of freedom.**

In Summary... here's what you're getting:

Here's Everything You Get When You Join VPE Mastery

- ✓ Coaching & Accountability Calls
- ✓ Weekly Live Trading Session with Me (Forrest)
- ✓ Weekly Technical Mastery with Sul
- ✓ Access to Elite Inner Circle Community
- ✓ 40+ Video Training Lessons
- ✓ Trade Walkthroughs + Charting Exercises
- ✓ Trading Dashboard + Performance Tools
- ✓ Risk Management Frameworks
- ✓ My Proven VPE Trading Strategy
- ✓ 1:3+ RRR Trade System

**This is everything you need to become a calm,
funded, consistently profitable trader in one place.**

Now, let me be crystal clear about something:

I don't want you to “hope” this works.

I don't want you guessing.

I want you walking in with **absolute certainty the same certainty I have every time I execute on my plan.**

**I stand behind this 100%,
So here's my promise to you...**

Backed By The Funded Trader Guarantee

- If you join **VPE Mastery**, follow the roadmap, attend the calls, execute the plan, and do the work...
- We guarantee you **will** become a funded trader within 12 months,
- And if, for some reason, you don't **we'll work with you for free until you do.**
- We've helped hundreds do it and we're betting on your success.
- That's how confident we are in this process. This isn't a course. This is a proven mentorship and execution system that's already transformed hundreds of traders.

That's how confident I am in what we've built.

You're **not just buying a course.
You're **not** just “learning how to trade.”**

You're entering a system that's already helped 1,400+ traders go from stuck to profitable and we're putting our skin in the game with you.

Because when you win, we all win.

So now, the only real risk... Is **doing nothing
and letting another 6 months, 6 years slip by.**

Sul and Forrest have taught me how to sustain a live account and grow it everyday in the markets. I am extreme grateful for everything these guys do day in and day out. i also took part in their masterclass~ i would highly recommend this to anyone whos looking to learn how to take this lifestyle and job seriously. your ceiling can be so high, and these guys can truly help you get to that next level.

EL Hairston

"I can't recommend this day trading group enough! The insights, strategies, and support provided are absolutely top-notch. Whether you're a beginner or an experienced trader, the group offers valuable tools and supporting community that helps you stay ahead of the market. The founders @Forrest and @SUL are knowledgeable, transparent, and genuinely care about helping members succeed. Joining this group has been a game-changer for my trading journey—thank you for helpful insights and strats No cap. EL1

TradinFarmer

This trading group is the best! Forrest and Sul are masters of the Volume Profile and overall market analysis. These guys are looking to teach you how to fish instead of calling out entries. If you listen and do your daily activities even when you don't think it makes sense you will start to see the light!!

I want to be straight up with you...

This IS NOT some \$99 course you buy, binge, and forget about.

This is NOT cheap and it's not supposed to be.

**Because the traders edge isn't 'information' it's transformation.
And real transformation requires real commitment.**

It's Not a Cost It's an Investment

- As a trader, you understand capital allocation. You know the goal isn't to *spend* money... It's to invest capital in a way that gives you an exponential return.
- And that's exactly what this is. When you join The Traders Edge, you're not spending you're investing in the only asset that matters: **YOU**.
- An investment in your skillset. Your psychology. Your ability to become disciplined and a mechanical system you can print money for life.

What's the ROI of Becoming Funded & Profitable?

- Let's just do the math for a second...
 - One \$100k funded account.
 - 0.5% risk /trade.
 - Catch a few high-RR trades a month — and you're pulling in \$5k–\$10k+/month.
- And that's **just the beginning...**

Most of our students scale to \$200k, \$400k, \$600k, \$1M+ in capital within 6–12 months.
- Now think it — What's that worth to you over the next 1, 2, 3, 5 years of your life?

Compare that to the investment you'll make...

**And honestly, not joining us becomes
a **FAR MORE expensive** decision.**

Personalized & Customized Roadmap

- The reason we *don't* drop prices on trainings like this is for **one very important reason** Because we ***custom-tailor the enrollment personalized*** on where you're at in your trading journey.
- If you're brand new to trading, need foundational support, and are looking to pass your first \$100k challenge That's a **very different path** than someone who's already managing \$100k+ in funded accounts, and needs elite 1-on-1 support to scale to 7+ figures.
- **So instead of giving you a one-size-fits-all number,**
 - We actually go *deeper* with you on your **Enrollment Call** 📞
 - We diagnose exactly where you're at, what you need to reach your goals,
 - And then we show you the *best-fit* with the exact support, access, and accountability **YOU** need.

**Fast action in life leads to momentum.
In trading. In results. In all areas.**

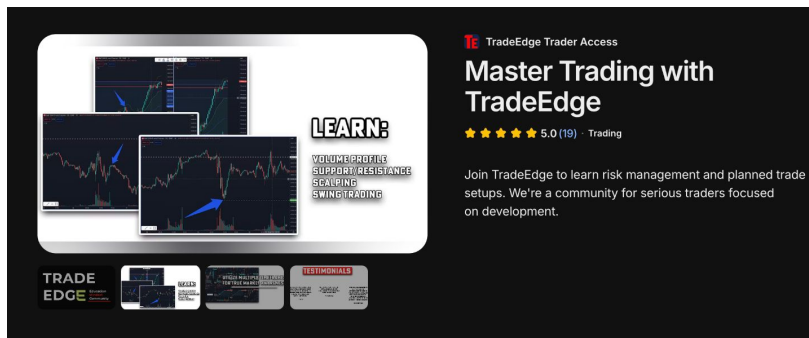

If you apply & you're accepted in to **The VPE Mastery** within the next **72 hours**, you're not just getting the full mentorship and roadmap...

You're getting these **EXCLUSIVE BONUSES**
that **will never be offered again:**

 **BLACK FRIDAY BONUS #1 — 12 Months FREE Access to my Private Discord Community “Trade Edge” (\$1,200 Value)**

The screenshot displays the TradeEdge website interface. At the top left, there's a section titled 'LEARN:' with a list of topics: VOLUME PROFILE, SUPPORT/RESISTANCE, SCALPING, and SWING TRADING. Below this, there are three small video thumbnails. To the right, the text 'TradeEdge Trader Access' is visible, followed by 'Master Trading with TradeEdge' and a 5-star rating from 19 reviews. A brief description invites users to join the community for risk management and trade setups. At the bottom left, the 'TRADE EDGE' logo is present, and at the bottom right, there's a 'TESTIMONIALS' section with a testimonial from a user named 'JAMES'.

- Get one full year inside my **premium trading community**, where you'll connect daily with other serious traders, access exclusive market breakdowns, and stay sharp with live updates and accountability.

If All This Did Was...

- ⚡ Get you to finally stop overtrading, forcing setups, and blowing accounts
- ⚡ Give you the tools to take sniper trades with total clarity and confidence
- ⚡ Help you pass that first prop firm challenge and hit \$10k+/month trading
- ⚡ End the emotional rollercoaster... the anxiety, revenge trades, FOMO, fear and doubt
- ⚡ Plug you into a high-performance environment surrounded by funded traders, expert mentors, and a system that actually works

Would it be worth it?

Because for most traders...

**Just one of those wins would completely
shift the trajectory of their life.**

But with the Traders Edge

You get all of it and MORE.

At the end of the day...

**The real decision isn't really whether to join [VPE Mastery](#) or not
It's not about money. It's **not even about trading**....**

It's about who you're becoming.

**Because there are 2 types of traders
watching this right now...**

Trader A:

😞 They've been dabbling for years in trading or “make money online” opportunities.

😞 Jumping from YouTube video to video... Chasing random signals... Hoping something sticks.

😞 They keep saying “next month”... But deep down, they're afraid. Afraid of failing. Afraid of going all in. Afraid of what would happen if they actually tried.

😞 They'll leave this event, tell themselves they'll “think about it”... And a year from now, they'll be in the same spot. Frustrated. Stuck. Unprofitable.

😞 Still wanted more from life. Still asking, “Why hasn't it worked yet?”

Or there's...

Trader B — The 1%:

🏆 They see the opportunity. They feel the nerves. They hear the voice saying to stay in their comfort zone. But they do it anyway.

🏆 They know the greatest risk... Is staying where they are, or worse, regressing in life.

🏆 They're not looking for shortcuts — they're looking for mastery & willing to do the work, and whatever it takes to become a profitable trader.

🏆 They're the type to burn the boats. To raise their standard. To become the person who wins — not just hopes to.

🏆 They're done playing small. And they're ready to take their seat at the table.

So the ONLY real decision is:

Which trader are you going to **decide to be?**

**Because this is more than a mentorship.
This is a mirror, a portal in the future you deserve.**

And it's showing you **who you could be if you just had the right system, the right environment, and the right mentors & coaches backing you.**

So you don't have to.

I've spent thousands of dollars, hundreds of hours, and years of setbacks figuring this all out.

**I've blown accounts. I've sabotaged funded challenges.
I've made all the painful, expensive mistakes...**

**I built this mentorship to be the shortcut I wish I had.
And now I'm sending the elevator back down so you can ride it up.**

 **Sometimes It's the Smallest Decisions
That Change Your Life Forever**

That moment you say “F* it. I’m all in.”**
That one decision to apply. That one risk that turns into your freedom.

This is one of those moments.

**If you ready to become 1% Trader, become
consistently profitable & rise to the 1%,**

**We're reviewing applications this week
and only accepting a **limited group of traders**,**

So I want to invite you right now...
