Our Projects

Commercial Projects

Since 2002, WindMar Group has been at the forefront of solar development. In addition to being one of the largest residential solar installers, **WindMar owns and operates 60+ Megawatts** of commercial and industrial solar projects.

Initially based out of the Caribbean and later Orlando, Florida, we have sold, designed, financed, installed, and serviced all segments of the solar industry.

Lake Nona, **Florida**

How does *The WindMar Home* work?

1

Roofing

Forget water leaks! We are dedicated to providing the best roofing experience for you and your home.

To find out more, see page 20.

2

Solar Panels

The photovoltaic panel receives energy from the sun and converts it into direct current (DC).

Qcells

We've installed close to 1 million solar panels since 2002.

3

Structure

First company in Latin America to be Platinum certified by the largest U.S. manufacturer of solar structures.

4

Tesla Inverter

This converts the direct current (DC) into alternate current (AC) used in your home.

5

Smart Meter

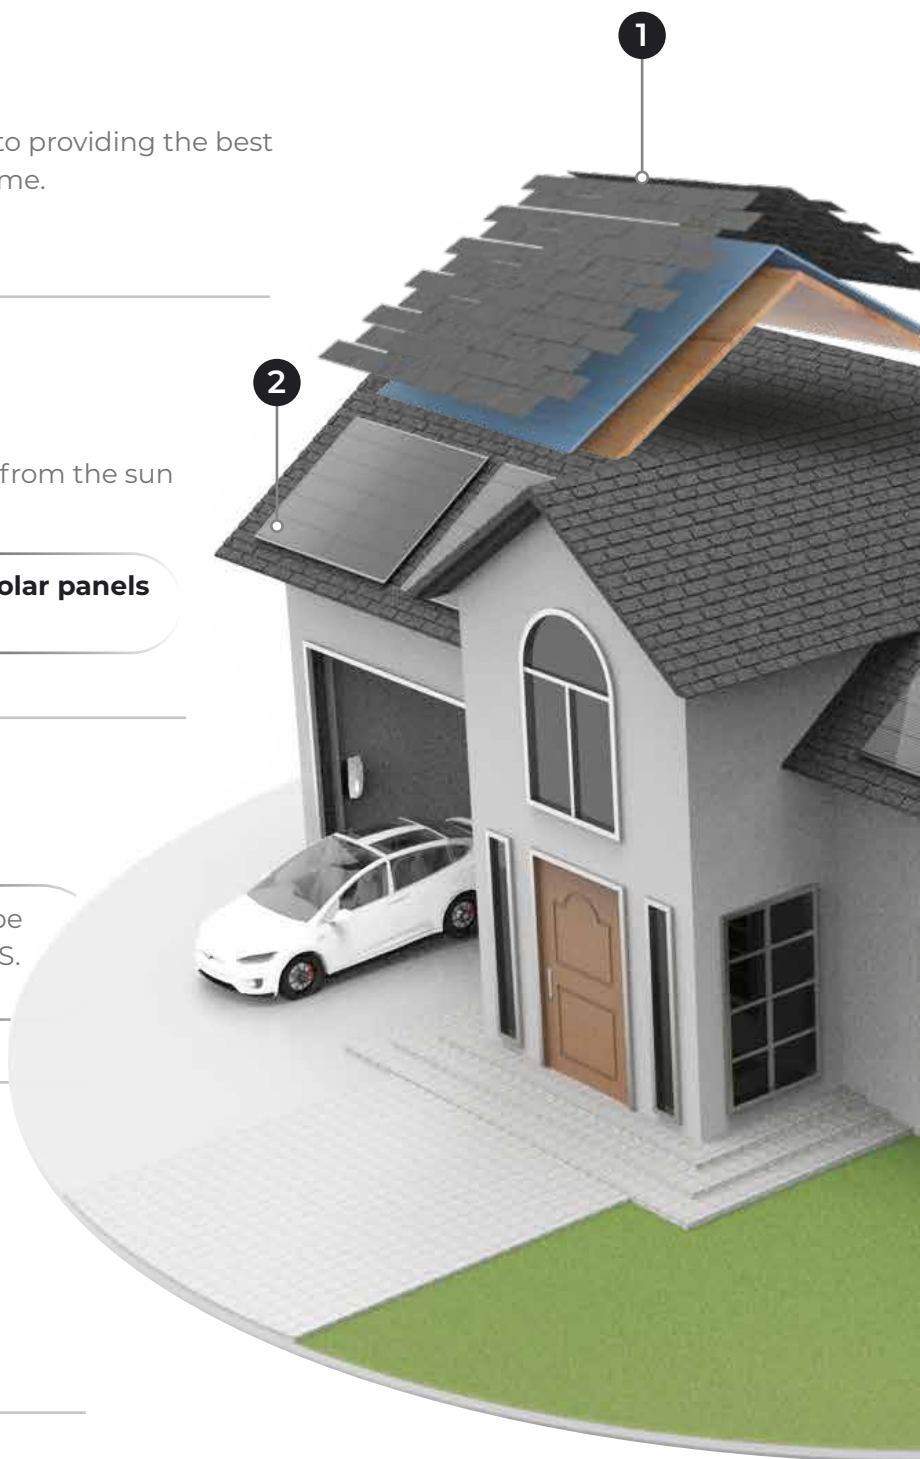

This meter records electricity flow in both directions. Excess solar energy produced during the day is credited with the power company for nighttime or future use.

6

Gateway

Device responsible for managing the distribution of energy transformed by the inverters in the home, battery, and utility (net metering).

8

Power Grid

7

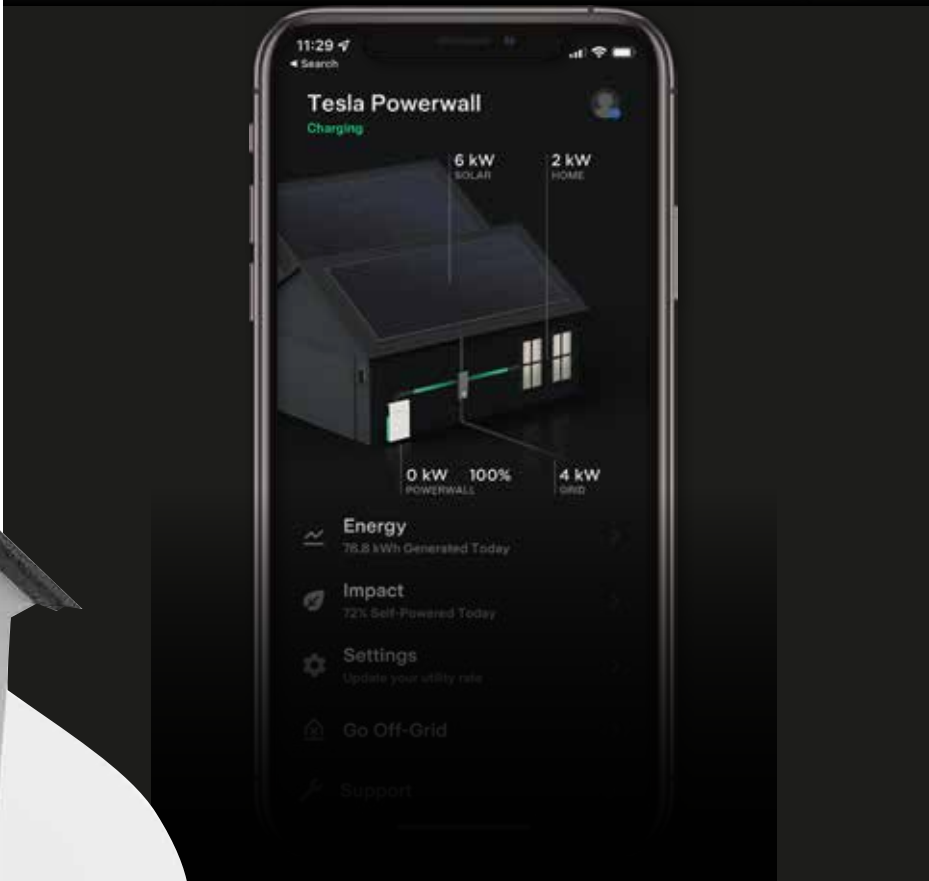

Powerwall 3 (Optional)

This battery will keep the home energized during a power outage or whenever needed.

We are the largest Tesla Certified Installer in the world, with over 50,000 PowerWall batteries installed.

Monitoring

All our solar systems can be monitored online in real time.

You can track solar production, consumption, and battery charge at any time.

To find out more, see page 19.

Control over your power costs

By powering your home with solar panels, you are stabilizing your energy costs.

The cost of doing nothing

Did you know that if you pay a utility \$185 a month, it will cost you more than \$150,000 over the next 30 years?

Safe power

Create a micro-grid at home by bundling a battery with a solar power system.

Windmar offers the best warranties in the market

We have employees devoted to the monitoring and maintenance of all solar systems 24/7. Also, we have the most experienced service team in the industry.

What is Net Metering?

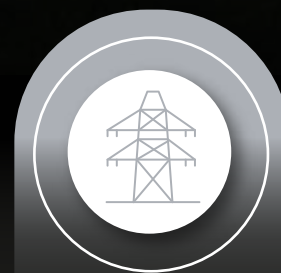

Net metering is an excellent way to regain your investment in a shorter period of time. It offers the advantage of **exporting surplus energy generated during the day and accumulating credits** that can be utilized in the future.

Your panels **collect solar power** to generate electricity.

Your meter **measures consumption** to export surplus power to the grid.

Your surplus is **exported to the power grid** and you receive credits on your utility bill.

Your Electric Bill

BEFORE **\$280.33**

Roofing Solutions

Peace of mind under one roof

Take advantage of the benefits of doing your roof with us

- **Comprehensive Expertise:**
One-Stop Shop for roofing and solar installations.
- **Streamlined Process:**
Avoid the hassle of coordinating with separate contractors.
- **Simplified Warranty:**
Single point of contact for both roofing and solar warranty claims.
- **Guaranteed Workmanship:**
We take pride in our craftsmanship and we stand behind the quality of our work.
- **Enhanced Property Value:**
Investing in a roofing and solar system from our company can increase the value of your property.

Roofing Components

- Waterproofing Underlayment in the valleys
- Synthetic Water Resistant Underlayment
- Starter Shingles
- Architectural Shingles
- Hip and Ridge Caps
- Roof Vents

Our Roofing Process

STEP BY STEP

1. Tear-Off

Remove existing shingles down to the deck. Renail decking as per FBC.

2. Underlayment Application

Install waterproof underlayment in valleys. Install synthetic underlayment on all the roof.

3. Drip Edge Installation

Remove and replace drip edges

4. Vents and Flashings

Install new roof vents and pipe flashings.

5. Shingle Installation

Install starter shingles, architectural shingles, and ridge & hitch caps.

6. Clean-Up

Clean up all debris.
