

Our Tokenized Kingdom

Two Tokens, One Mission — Liberation & Justice

Whitepaper v1.0

Dual-token economy • Decentralized Governance • Global Revival

In a time of systemic collapse, global corruption, and spiritual disconnection, The Kingdom presents a new model for civilization: built on Divine principles, governed by the people through blockchain, and powered by a just token economy.

This whitepaper outlines a comprehensive plan to establish God's righteous Kingdom, guided by divine principles and powered by a dual-token crypto system:

1 verified person = 1 vote

Kingdom Citizen Pass (KCP)

Gold-pegged, deflationary utility token

Khalifate Dinar (KDR)

Together with a DAO-based governance system and real-world use cases, The Kingdom proposes a complete societal transformation — financial, political, and moral.

The Holy Kingdom Alliance

3

As outlined in the Holy Kingdom Alliance Agreement, signatory nations pledge allegiance to a unified Divine order that:

Upholds Shariah law as the supreme legal framework

Upgrades exploitative economic systems with a just Islamic blockchain ecosystem

Guarantees religious freedom, environmental stewardship, and universal access to education and healthcare

Transitions governance to a Decentralized Autonomous Organization (DAO), removing corrupt politicians

Strictly prohibits riba, alcohol, gambling, propaganda, LGBTQ promotion, and unjust warfare

The Kingdom is not merely a nation—it is a global spiritual rebirth.

Phase 1

LAUNCH & FOUNDATION

Launch dual-token system:

- KCP – soulbound, 1 per verified citizen
- KDR – gold-backed utility & trade token

Phase 2

MASS DISTRIBUTION

- Get KCP and KDR into the hands of citizens globally

Phase 3

JUST VOTING

- On-chain democracy: citizens vote on laws, economics, and governance

Phase 4

TOKENIZED ECONOMY

- Citizens co-own assets & services via halal token systems (no banks)

Phase 5

ECONOMIC LIBERATION

- Replace exploitative platforms (Uber, Airbnb) with Kingdom-owned alternatives

Phase 6

FULL KINGDOM TAKEOVER

- A new sovereign civilization: financial, social, and political replacement of modern systems

1. Kingdom Citizen Pass (KCP)

- Soulbound (non-transferable)
- Represents verified identity and voting power
- 1 person = 1 vote
- Required to participate in DAO governance

2. Khalifate Dinar (KDR)

- Tradeable utility token
- Pegged to gold
- Used for payments, investments, staking, and rewards
- Built-in Zakat (2.5%) and Khums (20% on surplus) logic
- Deflationary via 0.05% auto-burn on each transaction

KDR Supply

- Fixed supply: 100 million
- No inflation or future minting
- Deflationary by nature

Spiritual Taxation

- Zakat (2.5% yearly) – for people above the nisab threshold. calculated via smart contract
- Khums (20% of one's surplus wealth after basic living expenses)
- 2.5% global emergency fund for healthcare - Overthrowing expensive insurances etc.

Token Utility

- Payments and commerce
- DAO participation (with KCP)
- Real estate ownership
- Peer-to-peer services
- Charity contributions
- Marketplace access

Allocation

- 55%– Citizen - Universal Provision
- 25% – Treasury (Bayt al-Mal)
- 10% – Governance & Leadership
- 5% – Developers & Labor
- 5% – Liquidity

The Kingdom builds a Divine Peer Economy to:

- End exploitation by corporations and banks
- Replace platforms like Instagram, Uber, Airbnb, Upwork, Amazon and PayPal
- Offer citizens 100% earnings from ride-sharing, freelancing, rentals - and from the ads they watch
- Tokenize real estate and infrastructure for fractional ownership
- Redistribute ad revenue from big tech to users (attention = income)

All platforms will be:

Smart contract enforced

DAO-owned

Interest-free

Transparent and accountable

Guided by the Qur'an and Prophetic Tradition, The Kingdom upholds:

No riba (interest), no injustice

Prohibition of harmful content, substances, and lifestyles

Environmental protection and earth stewardship

Sanctity of life, family, and gender roles

Modesty, morality, and truthfulness in media and governance

Freedom of religion within Divine law boundaries

Harsh punishments for corruption, injustice, and treason

Equal movement, residency, and trade rights across all member states

● Decentralized Autonomous Organization (DAO)

- Voting Power: 1 KCP = 1 vote
- Smart Contract Governance: Transparent, automatic enforcement
- Direct Participation: Citizens vote on proposals, budgets, laws
- Shura-based Decisions: Islamic consultation on all issues
- Corruption-Proof: No politicians, no lobbying — only verified citizens
- Public Dashboards: All transactions and votes are visible

● DAO Features

- Amendment via public consultation
- Zakat and Khums automation
- Smart contract judiciary logic
- System nullifies unlawful or non-Shariah actions

“Gold remains with the people — its power unlocked through KDR.”

Kingdom Reserve Policy

The Khalifate Dinar (KDR) is designed to be the most trusted and stable currency in the modern world — because it is anchored in gold and silver held directly by the people.

How It Works

Citizens can tokenize their own assets, gold and silver — while still holding it themselves at home or in trusted vaults.

Each deposit mints a unique digital receipt (NFT), linking that gold to the Kingdom reserve and unlocking extra KDR benefits.

This creates a citizen-powered gold reserve, decentralized across millions of homes, not controlled by banks or governments.

Why This Matters

Your wealth is in your hands: Gold stays with you, but also works for you in the digital economy.

Protection from inflation: The KDR's value grows as more citizens connect real assets, creating a rising floor for the token.

Trust through transparency: Every piece of gold is registered on-chain, preventing fraud or double use.

Hard to manipulate: A reserve spread across the people cannot be seized, frozen, or devalued by elites.

Burn Mechanism = More Gold Per Token

The Khalifate Dinar has a fixed supply — no new tokens will ever be created.

When tokens are burned (permanently removed from circulation), the gold reserve stays the same.

Fewer tokens sharing the same gold means each token becomes backed by more gold over time.

Examples of Use

- At launch: 100M tokens backed by €8M in gold = 0.08€ gold per token
- After burns: 80M tokens backed by €80M in gold = 3.50€ gold per token

The Result

A currency that gets stronger and more stable every year — protected by divine economic principles, real-world assets, and transparent blockchain records.

• Token Distribution – Khalifate Dinar (KDR)

- Total Supply: 100,000,000 KDR (Fixed – No Inflation)
- Type: Gold-Pegged Utility Token
- Burn Rate: 0.05% per transaction (Deflationary)

Token Flows

BURN

0.05% auto-burn per transaction (permanent supply reduction)

ZAKAT

2.5% yearly on eligible wallets – distributed to Qur'an 9:60 categories

KHUMS

20% of DAO surplus –
10% needy,
10% public causes

REWARDS

Ongoing staking & participation incentives from the Community Rewards pool

Token Allocation Breakdown

Category	Allocation	Purpose	Islamic Justification
Citizen UBP (Universal Basic Provision)	55% (55M KDR)	Equitable mints available to all verified humans, weighted toward citizens.	Quran 59:7 ("Wealth circulates among all"), Imam Ali (AS): "No one should sleep hungry in your domain." Prioritizes adl (justice) over equality.
Public Treasury (Bayt al-Mal)	25% (25M KDR)	Funds halal infrastructure, healthcare, education, and emergency relief.	Quran 2:195 ("Spend in the way of Allah"). Managed by scholars as trustees (Hadith: "The ruler is a shepherd accountable to Allah").
Governance & Leadership	10% (10M KDR)	Salaries for elected scholars/stewards (capped at 5x UBP).	Quran 4:58 ("Entrust wealth to the competent"). Prevents elite hoarding (*Nahj al-Balagha, Letter 53*).
Developers & Labor	5% (5M KDR)	Vested over 4 years for builders (max 0.5% individual ownership).	Prophet (SAW): "Pay the worker before his sweat dries." Bans exploitative wages (Sunan Ibn Majah 2443).
Liquidity	5% (5M KDR)	Sharia-compliant market-making (e.g., Murabaha contracts).	Must avoid Gharar (uncertainty) and Riba. Approved by Shia oracles (e.g., Hawza audits).

The Process: Fee Splitting for Scarcity and Growth

A 0.05% fee is applied to every on-chain transaction. This fee is immediately and automatically split into three equal parts:

- 33.3% (0.0001667) is permanently burned (destroyed). This reduces the total supply, creating deflationary pressure.
- 33.3% (0.0001667) is sent to the Public Treasury - funds public goods, development, and community initiatives.
- 33.3% (0.0001667) KDR is distributed as staking rewards to Validators who secure the network.

In Simple Terms:

If a transaction incurs a 1.00 KDR fee:

0.0001667 KDR is sent to a burn address and permanently removed from circulation.	0.0001667 KDR is deposited into the Bayt al-Mal to fund public goods and development.	0.0001667 KDR is distributed as staking rewards to Validators who secure the network.
---	---	---

This ensures that every single transaction on the network simultaneously increases the scarcity of the token and contributes to the common good.

Technical Implementation:

This is a protocol-level rule, enforced by the network's smart contracts. The split, burn, and transfer happen automatically within the same transaction, ensuring fairness, transparency, and no possibility of manipulation.

Purpose & Justification:

Burning (1/3): Creates a deflationary model that rewards long-term holders by gradually increasing the scarcity of the token.

Validators (1/3): Rewards stakers for securing the network, ensuring decentralization and long-term stability.

Treasury (1/3): Provides a sustainable, automated, and transparent funding stream for the Bayt al-Mal. This ensures the treasury grows organically with network usage, funding everything from infrastructure and security to charitable endowments (Zakat) and public works, without ever raising taxes or diluting holders.

This mechanism aligns individual transaction activity with the collective health and prosperity of the entire community.

The People's Path to Circulation

The Khalifate Dinar (KDR) belongs to the people. To ensure justice, every citizen can mint KDR directly from their phone — without expensive machines or wasted energy.

How it works

- One Human = One Minter → Verified through the Kingdom Citizen Pass (KCP), ensuring no duplicate accounts.
- Proof of Engagement → Citizens mint by daily check-in, voting, learning, or contributing to the community.
- Simple and Accessible → Anyone with a smartphone can mint KDR in just a few taps.
- Scarcity Over Time → Minting rewards halve every 2 years, making KDR more valuable the longer you hold it.

Minting Schedule (7 Years)

Phase	Years	Daily Reward	Notes
1	1–2	0.02 KDR/day	Early pioneers
2	3–4	0.01 KDR/day	Growing adoption
3	5–6	0.005 KDR/day	Global expansion
4	7	0.0025 KDR/day	Final phase

Why This Matters:

“Man will have nothing but what he strives for.” — *Qur'an 53:39*
Minting ensures wealth is earned through effort, not privilege — circulating fairly among all people.

Total Pool: 55M KDR allocated for citizen minting.
Unminted tokens → zakat, khums, and treasury.

Our Ultimate Objective: The Decentralization of Human Destiny

This project is more than a blockchain. More than a currency. It is the blueprint for a new societal covenant—a return to a sacred trust between the individual, the community, and the Divine. By tokenizing your real assets - we aim to trigger Metcalfs Law - and achieve global adoption through a perfect just world built upon Divine principles and the new web 3.0.

Simple & Powerful

- **The Problem:** Centralized Control. Modern Slavery. Riba.
- **The Solution:** A decentralized, global Islamic blockchain system.
- **The Action:** Tokenize all assets and interactions.
- **The Result:** Economic justice, spiritual freedom, and a balanced world.

We are building the protocol for a post-government world, liberating humanity from financial slavery and uniting the global economy on a righteous, Islamic blockchain.

Tokenizing The Kingdom - Everything in One Place:

- **Real Estate:** Own a percentage of any property with a small investment.
- **Projects:** Fund local businesses and startups directly, for a share of their profits.
- **Your Assets:** Tokenize your car or home to become the shareholder, not the platform. Be your own Airbnb or Uber, keeping 100% of your earnings.
- **The Result:** You invest directly. You earn directly. We cut out the middlemen taking a share of your pie.

The Decentralization of Humanity. From Communications to Business. You own your Own Kingdom!

Build a tokenized real estate empire, launch your own Uber-style business, rent out your home, or invest in farmland—all from one decentralized platform. The End of the Middleman.

Step into a world where you trade freely and live fully—decentralized, simple, and just. A society where citizens and communities govern themselves, without bowing to higher authorities.

A kingdom of fairness—where power doesn't monopolize but liberates. Where justice replaces exploitation. Where your attention isn't stolen by tech giants—but rewarded, directly to you.

The Kingdom is not just a crypto project.
It is a Divine civilization in code,
a new societal blueprint for humanity,
built on faith, fairness,
and futuristic technology.

We call upon:

- Citizens seeking economic freedom
- Nations seeking Divine order
- Builders, developers, believers, and pioneers

Join the Holy Kingdom.
Observe. Deploy. Evolve.
