

# Cash Count Screen

For Bank Starts and all Cash Counts on the Closeout screens, the default screen allows you to enter a single number. If you'd prefer to count by denomination, we have a setting to use this Cash Count screen instead:

The screenshot shows a 'Cash Count' screen with a table of denominations and a numeric keypad. The table has three columns: quantity, denomination, and total value. The row for 0.25 is highlighted. The keypad includes digits 0-9, a decimal point, a clear button (C), a backspace button (<math>\leftarrow</math>), and an enter button (<math>\rightarrow</math>). A total of 515.44 is displayed at the bottom. There are also OK and Cancel buttons at the bottom right.

Cash Count		
14	0.01	0.14
7	0.05	0.35
22	0.10	2.20
<b>63</b>	<b>0.25</b>	<b>15.75</b>
27	1.00	27.00
12	5.00	60.00
9	10.00	90.00
16	20.00	320.00
0	50.00	0.00
0	100.00	0.00
Total		515.44

This screen works similar to Tips entry. Highlight the denomination you want, then enter the quantity. The <enter> button on the numeric keypad advances the highlight to the next row.

Click the OK button when done, a report is printed for your records:

The printed report shows the same data as the screen, but with a title and header information. The total is 515.44.
