

GENETIC GENEALOGY FOR POLICE DETECTIVES & CRIME LAB PERSONNEL

1 REDUCE COSTS

2 IDENTIFY FASTER

3 MAINTAIN CUSTODY

From Our 12-week, self-paced and live training

You'll Be Able To:

- Evaluate DNA evidence for investigative viability
- Choose and manage forensic labs effectively
- Upload and interpret results in GEDmatch & FTDNA
- Build accurate family trees to identify subjects
- Write clear reports & support prosecution

You'll Gain:

- Confidence handling real case data
- Control over evidence and chain of custody
- Speed—cut case timelines from months to days
- Proof of skill through case-based exercises
- Recognition as an in-house FGG expert

Detective Sam Hatley, Carson City Sheriff's Office

"Christine has been a wonderful resource. She's extremely knowledgeable and her past law enforcement experience helps steer the cases in the right direction. She's saved us time and money and solved one case for us in 48 hours using genetic genealogy. I would highly recommend her."

Civilian District Attorney Investigator

"...this was a very helpful training especially for those of us just getting our feet wet."

Next Class Starts
January 5, 2026

ATTEND VIRTUALLY

You don't have to sacrifice your workload with our self-paced training and once-weekly live calls.

BECOME COMPETENT

Complete real-world practical exercises to gain confidence in application after class.
