Clear Energy Savings

Interior View

Ceramic Series benefits:

- Natural tone with amazing clarity
- High heat rejection provides energy savings and improves comfort
- Low reflectivity enhances views and overall beauty
- Significantly extends the life of furnishings by rejecting UV rays, the single largest cause of fading
- Non-metal technology eliminates corrosion
- Reduces glare and eye discomfort
- Comprehensive 3M manufacturers warranty

Performance results*:

Visible Light Transmitted	53%
Total Solar Energy Rejected	47%
Solar Heat Gain Coefficient	0.53
Infrared Rejected	68%
Solar Heat Reduction	35%
Visible Light Reflected Int.	10%
Visible Light Reflected Ext.	12%
UV Rejected	99%
Glare Reduction	40%

*Performance data generated for a typical film on 6mm glass using applicable industry test methods and standards. Infrared rejection measured from 900nm – 1000nm.
