- ✓ Added: **Ground Spiders** (recommended for houses in moist areas, especially those with pets and young children).

FUNNEL WEB & MOUSE SPIDER - Scientists believe their venom is very toxic.

- ✓ Added: **Termite Inspection** (recommended for houses in moist and **bushy** areas).

Estimates by CSIRO and other leading bodies estimate that as many as 1 in 5 homes are likely to suffer a termite attack and this may be as high as 1 in 3 homes in high-risk areas.

- ✓ With our VIP Package, you get more than just a standard termite inspection. Experience the superior accuracy of our thermal imaging inspection, designed to detect hidden water leaks that other methods miss. Water leaks are one of the main reasons behind termite attacks. Upgrade to the VIP Package for one of the most comprehensive termite inspections available.).

### WHY?

#### Our 3 major limitations for this offer:

- **Small Team of Technicians:** We maintain a deliberately compact team of highly skilled technicians to ensure that each client receives the utmost attention and quality of service. This dedication to excellence limits the number of clients we can accommodate simultaneously.
- **Selective Office Administration:** Our commitment to clear and effective communication, both before and after service, is managed by a select group of office administrators.

This focused approach enhances service quality but naturally limits the scope of offers we can provide.

- **Upholding Our Reputation:** We are dedicated to maintaining our distinguished reputation by providing only the highest quality of services each time. This commitment to excellence necessitates a limit on the number of jobs we can undertake, ensuring that each client's experience meets our stringent standards."
