

# Automated Lead Generation in a Box

---- [www.liambarryonline.com](http://www.liambarryonline.com) ----

# What Kind Of Expert Are You?

Have you ever seen a gymnast in a boxing match?

Simone Biles at 4ft 8 vs Nicola Adams at 5ft 5. Both Olympic gold medallists, put them in the boxing ring and Nicola will win in the first round without Simone landing a punch.

Why, because Nicola is a boxing expert and Simone has no boxing experience and is trying to beat an Olympic champion, failure is inevitable.

You're a coach, an expert in your field, you help people overcome the roadblocks holding them back in life or business, so why are you trying to be the tech expert in your business as well?

Wouldn't it feel amazing to get over the tech roadblock and have the overwhelm in the past so you can get on and do what you do best.

Imagine having your marketing process automated with an out of the box solution that will save you time and money

This is what I'm offering you, right now

**'Automated Lead Generation in a Box'**

# Liam Barry

Liam is an experienced Engineering Manager and Technical Leader, over 18 years in the Automotive industry he has worked for Honda, Dyson and Rivian.

He has a Master's degree in Automotive Engineering and for the last 8 years he has specialised in Vehicle Simulation and Process Development.

Liam is now using his automation and systemisation skills to deliver an explosion in lead generation for busy business owners who either don't have the time or knowledge to implement the technology required.

While not working you will find Liam spending time with his friends and family, running around after the whirlwind that is his 2-year-old son and traveling.
