

Carbon Accounting Solution for Beyond Net-Zero

About Us

Evaluate8 Sustainability (Evaluate8) was founded in 2019 with the mission of transforming organisations for a net-zero future. We deliver on this mission by empowering organisations to measure and lower their carbon emissions and demonstrate their progress.

Evaluate8 is a for-purpose social enterprise. We believe in the power of business to address climate change and by helping as many organisations participate as possible this will accelerate the transition, by increasing the adoption of new technology and reducing prices.

Historically, carbon accounting has been time consuming, labour intensive, and costly. We make what is a complex topic, simple and accessible to all businesses.

Evaluate8 matches information from your business' accounting software and other sources to automate carbon accounting.

Our application allows businesses to assess their carbon footprint and helps them move towards a zero-carbon future. We enable the important step of measurement to take place easily, effectively and at a fraction of the cost of traditional methods.

What We Do

Evalue8 empowers businesses with the ability to shape the future of our planet through technology. We do this by unlocking the value of carbon accounting to help organisations achieve genuine decarbonisation.

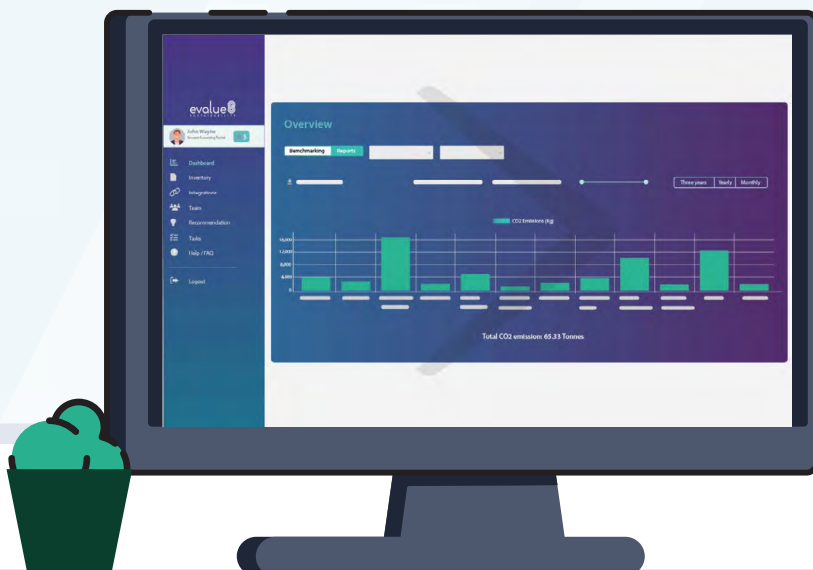

By automating the carbon accounting process and easily identifying cost and energy saving opportunities, Evalue8 allows you to track your emissions and demonstrate your progress.

Our application links to your financial accounts and other sources to enable the measurement of your carbon emissions and provides recommendations on how to reduce your organisation's impact.

We can help businesses achieve net-zero in a day or demonstrate clear progress over time towards their own reduction targets.

Customers want to see real emissions reductions and offsetting; that's why everything we do promotes measurable and accountable action.

We believe in making evidence-based decisions. Having access to data is critical to this outcome. Our application measures the impact of your business on the environment in terms of tonnes of carbon dioxide emitted, based on the specific activities of your business.

Why Measure Greenhouse Gas Emissions?

The first step to addressing the climate change is to measure and reduce greenhouse gas emissions, and yet fewer than one in ten companies do this.

Measuring your business' carbon footprint means you can actively reduce or neutralise your contribution to climate change and thereby:

Reduce your energy costs

Improve employees' perceptions of your company

Attract more customers and capital

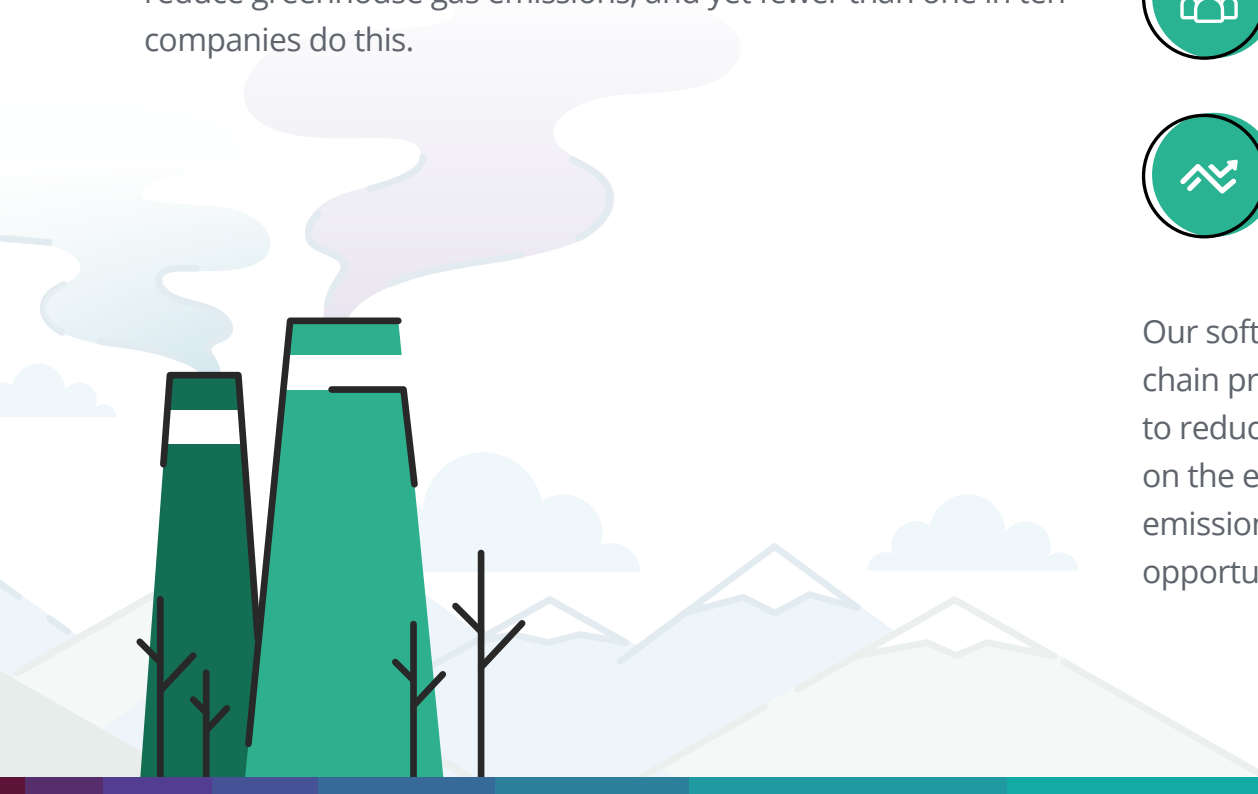

Improve your "social license to operate"

with key stakeholders such as communities, customers and governments.

Outperform your competitors on emissions performance

Our software helps you to meet the demands of investors, supply chain pressures, and increasingly concerned customers aiming to reduce carbon emissions, by providing reliable reporting on the emissions of your business, enabling you to track these emissions over time, and providing you reduction and offsetting opportunities to become carbon neutral.

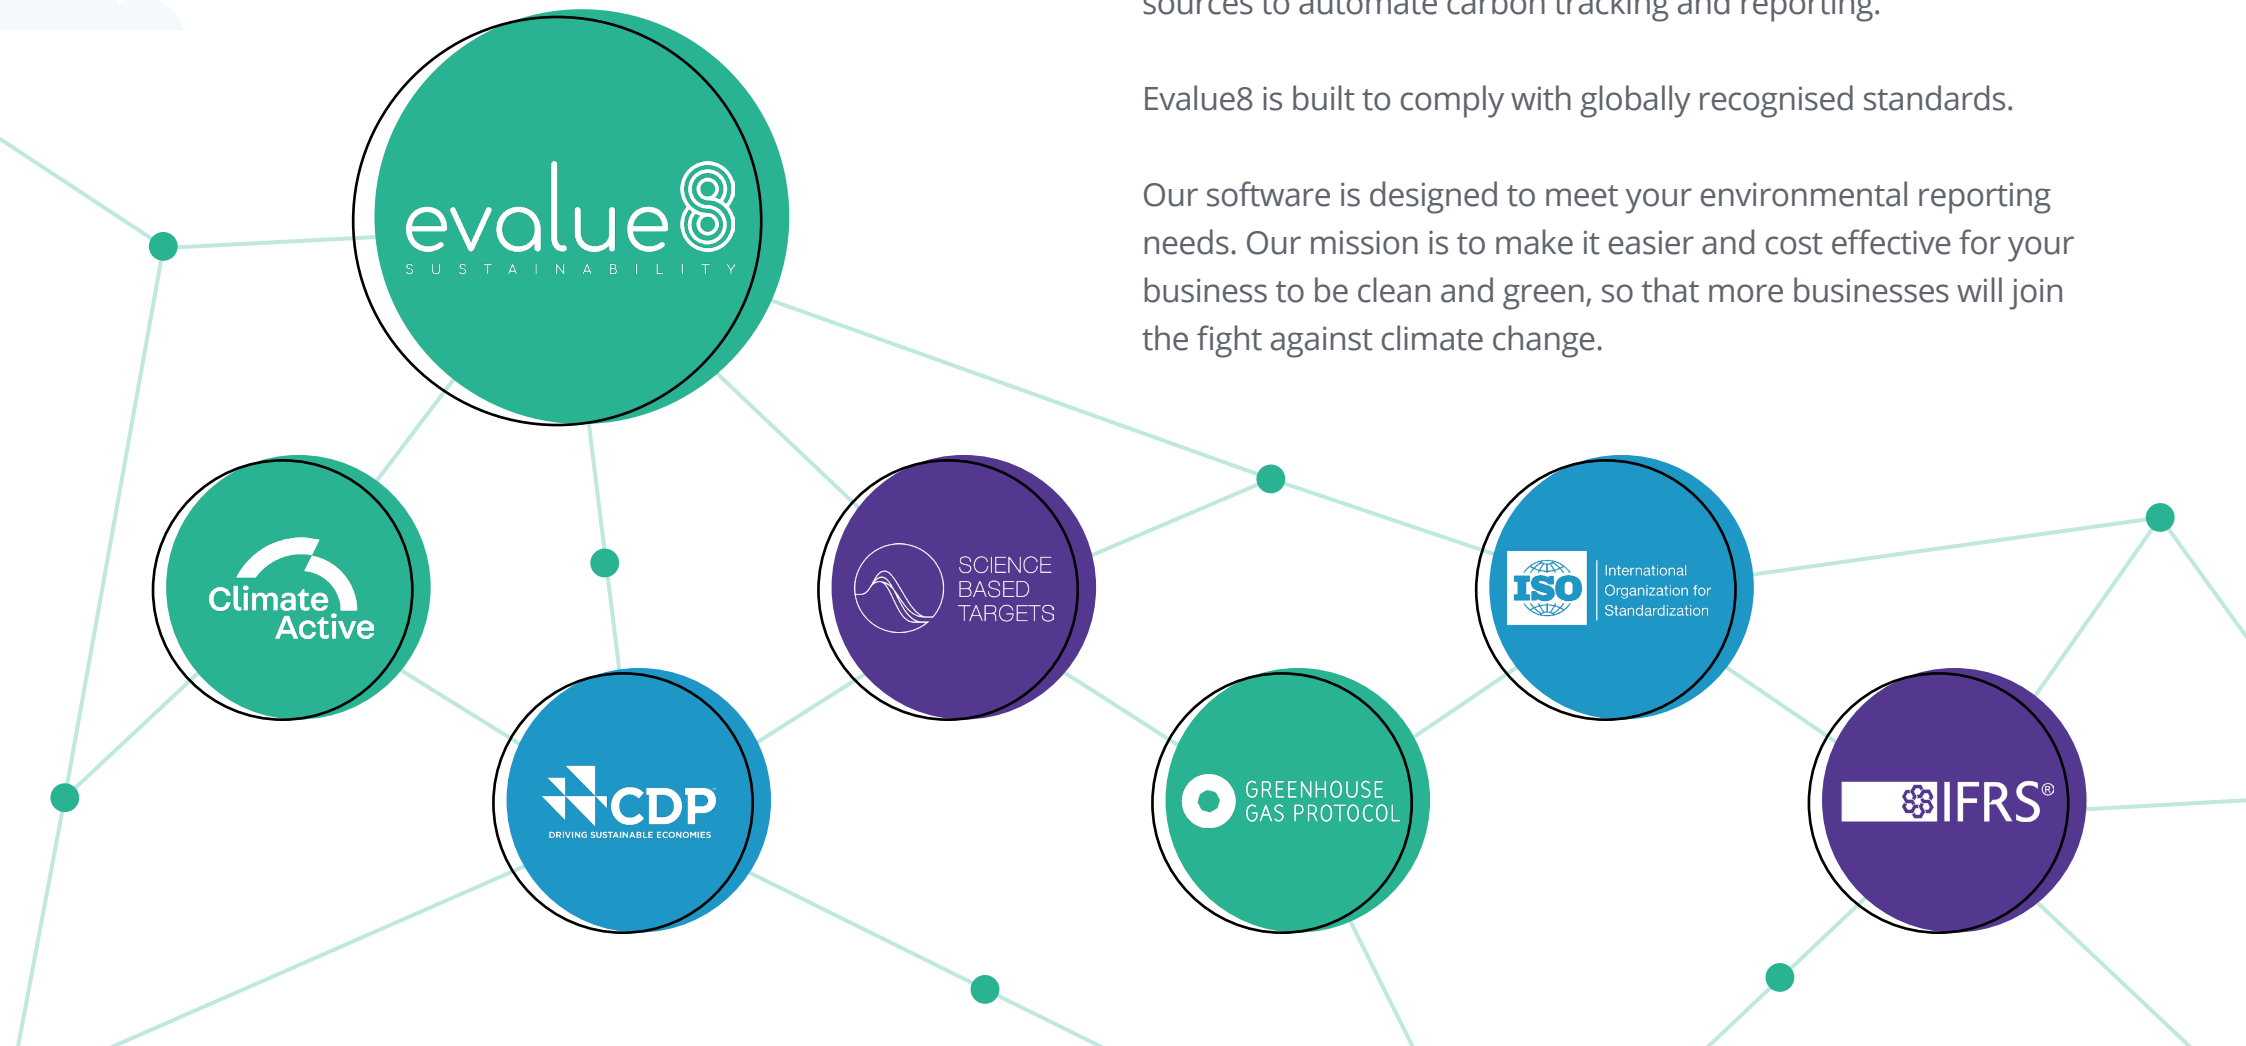

Product Overview

At Evaluate8 Sustainability, we know how complex, costly and time-consuming measuring and reducing your carbon footprint can be. That's why we built a carbon accounting solution that accurately matches information from your accounting software and other sources to automate carbon tracking and reporting.

Evaluate8 is built to comply with globally recognised standards.

Our software is designed to meet your environmental reporting needs. Our mission is to make it easier and cost effective for your business to be clean and green, so that more businesses will join the fight against climate change.

Awards

Evaluate8 was awarded the Corporate Vision 2021 Small Business Award: Best Zero Carbon Consultancy Business, Australia in December 2021, Best Carbon Accounting Solution 2022 (Australian Enterprise Award) in February 2022, and selected for the EY Foundry Program.

Best Zero-Carbon Consultancy
Company 2021 - Australia

Supported by

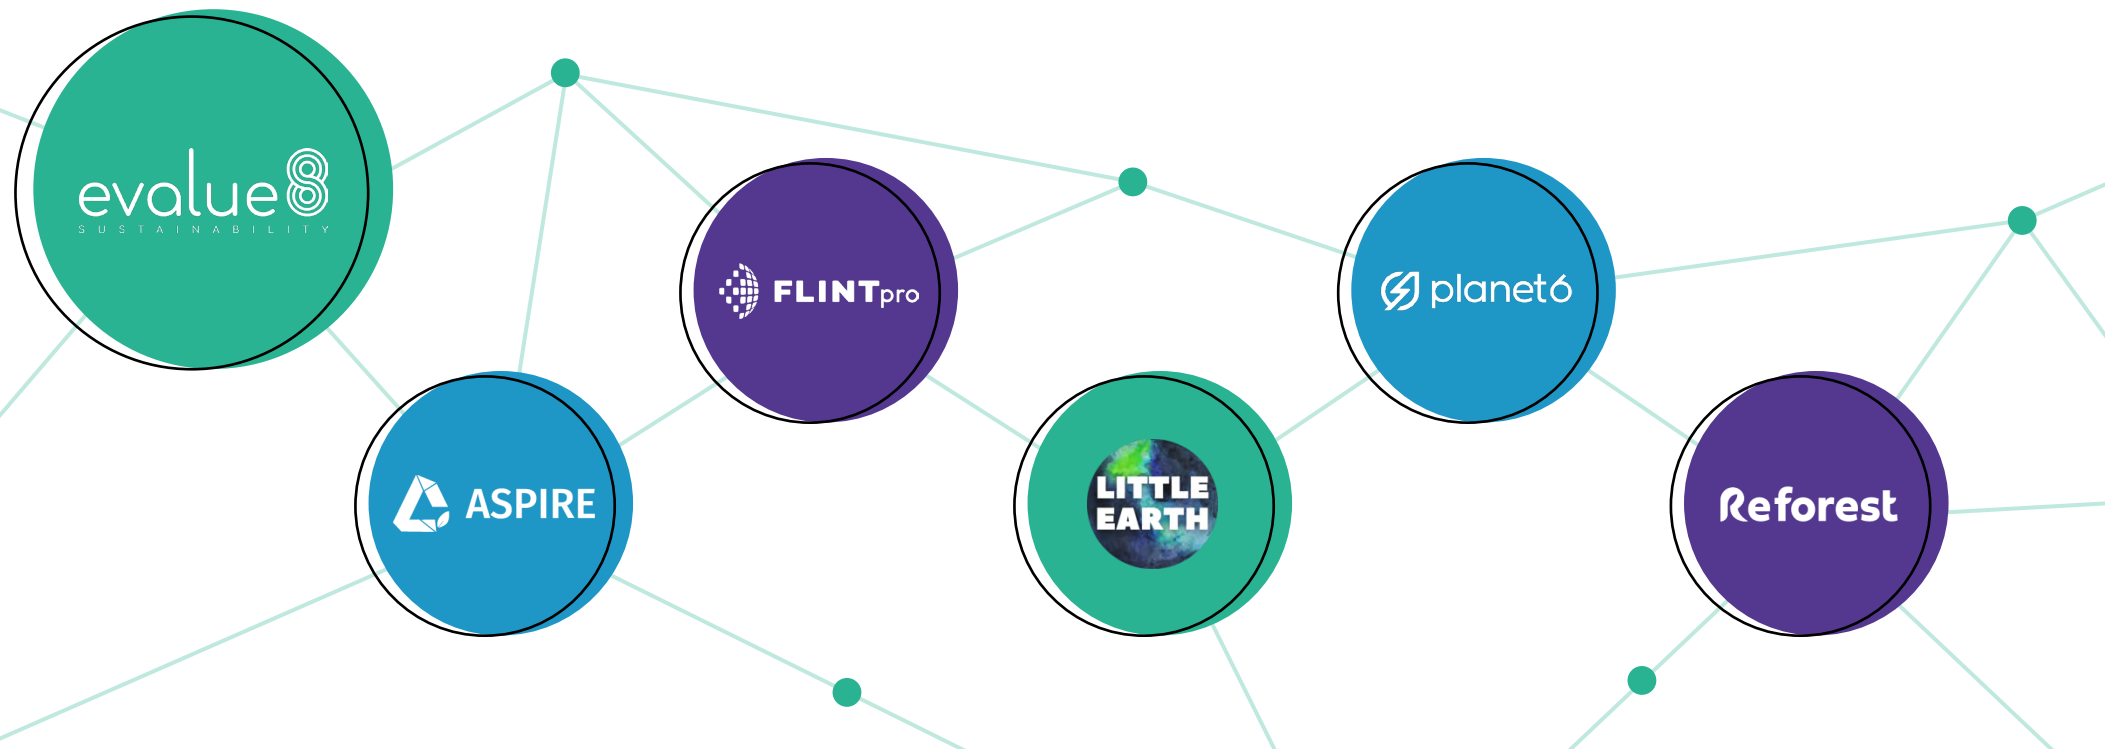

Partnerships

Evalue8 is Australia's first carbon accounting Xero Connected App.

In October 2020, Evalue8 was chosen by Microsoft as one of 20 apps worldwide to be profiled as part of their #Buildfor2030 campaign, representing Sustainability Development Goal #13 on Climate Action. Our app was added to the Microsoft App Source marketplace.

How It Works

Get the insights you need to understand and measure your business' carbon emissions so you can ... your sustainability journey to net-zero and beyond in 4 steps.

Step 1: Measure

Calculate and quantify your business' greenhouse gas (GHG) emissions so you can understand your climate impact and set goals to limit your emissions.

Step 2: Reduce & Save

Implement effective carbon and cost reduction strategies and positive climate action.

Step 3: Demonstrate Progress/Report

Identify business specific opportunities for carbon and cost savings and provide recommendations to help you achieve reductions. You can make informed decisions when it comes to your carbon and mitigation strategies.

Step 4: Offset

Offset units are generated by projects that reduce, remove or capture emissions from the atmosphere such as reforestation, renewable energy or energy efficiency. They are sold to organisations that wish to compensate for some or all of their emissions.

Evaluate8 Sustainability helps its clients to purchase offsets and does not charge any fees or receive any commissions for this part of its service.

Features

Our software provides measurable and actionable, carbon reducing strategies that save you money. Evaluate8 helps you unlock the power of your climate data by providing:

1. Carbon Accounting
2. Automation and Data Importing
3. Reporting
4. Benchmarking
5. Recommendations
6. Simple Workflow and Permissions

1 Carbon Accounting

Maintain historical emissions data, storing it securely and providing you with a comprehensive emissions history that can be viewed online.

Our carbon accounting services are transparent and compliant with:

- ISO 14064-3: Greenhouse Gases – Specification with guidance for the validation and verification of greenhouse gas assertions.
- the Australian National Greenhouse and Energy Reporting Scheme (NGERS) legislation;
- the World Business Council for Sustainable Development and the World Resources Institute's GHG Protocol: A Corporate Accounting and Reporting Standard;
- the Climate Active Program - Carbon Neutrality Certification

Our software provides measurable and actionable, carbon reducing strategies that save you money. Evaluate8 helps you unlock the power of your climate data by providing:

1. Carbon Accounting
2. Automation and Data Importing
3. Reporting
4. Benchmarking
5. Recommendations
6. Simple Workflow and Permissions

Data match information from accounting software and other sources to automate carbon monitoring and environmental foot-printing.

The image shows a computer monitor displaying the evalue360 software interface. The background is a dashboard with a sidebar on the left containing navigation links: Dashboard, Inventory, Integrations, Team, Recommendations, and Logout. The main content area is partially obscured by a central modal window.

The modal window is titled "evalue360" and displays "evalue Sustainability" data for "Blaiss, Arctic Connected" as of "8 September 2022". It includes a "Refresh" button. The data is presented in a table with the following structure:

Linked Emission Types		Scope 1
Target	Actual	
Building Heat	Heat	
Travel	Travel - Airplane	
Food & Catering	Entertainment	
Professional Services	Consulting & Accounting	
General Transport	Motor Vehicle Expenses	
Professional Services	Rent Fees	
Professional Services	Subscriptions	
ICT Costs	Office Expenses	
Professional Services	Legal Expenses	
ICT Costs	Hardware & Internet	
Food & Catering	General Expenses	

At the bottom of the modal window, there are three buttons: "Close", "Disconnect integration", and "Delete integration".

Demonstrate your organisation's progress with clear visibility of emissions and energy saving opportunities.

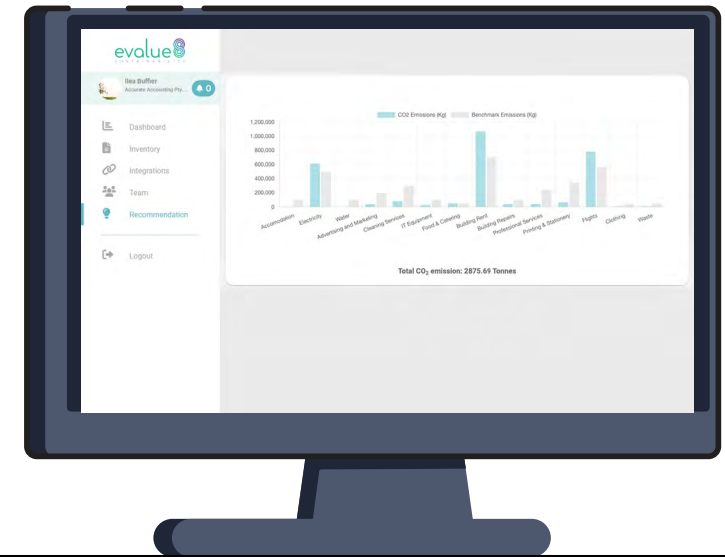

Features

Our software provides measurable and actionable, carbon reducing strategies that save you money. Evaluate8 helps you unlock the power of your climate data by providing:

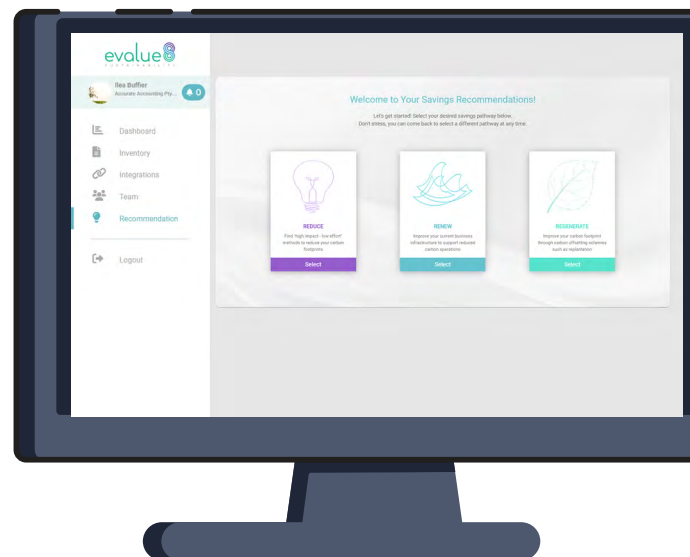

1. Carbon Accounting
2. Automation and Data Importing
3. Reporting
4. Benchmarking
5. Recommendations
6. Simple Workflow and Permissions

4 Benchmarking

See how your business's emissions performance compares to other businesses.

5 Recommendations

Learn ways to reduce your carbon and save costs.

6. Simple Workflow and Permissions

6 Simple Workflow and Permissions

Delegate collection of activity data to appropriate people while providing a friendly user interface that guides and educates users. You can set user Permissions with varying levels of access for different user types.

Why Choose Us?

Simplicity

Automates your emissions tracking allowing you to demonstrate your progress. Leverage technology to unlock the value of the data you already have.

You can achieve net-zero in a day then go beyond.

Carbon accounting is becoming standard practice in business. Our frictionless approach means you can use your carbon position as a resource to help with your strategic priorities.

Our solution is available to all sizes of business. Keeping it cost effective and simple means organisations of any size can get to net-zero. Our approach is integrated, easy and affordable.

Transparency

Provides an audit trail with a consolidated, clear, trusted source of emissions data across your value chain that is fully auditable with consistent approach and aligned to globally recognised standards.

By extending this throughout a value chain, you can guarantee to your stakeholders that you are delivering a low emissions product or service, giving you a competitive edge.

Benchmarking enables you to compare your business's emissions performance with your peers across industry and business size.

We can help you unlock the value of your data to achieve net-zero without unnecessary costs.

Responsibility

Empowers you with actionable insights to measure your impact on climate change and implement effective reduction strategies to reach net-zero and beyond. Our solution identifies areas for potential savings in carbon and cost by providing business specific recommendations.

Our passionate team can help you take responsibility for your organisation's environmental impact. With positive climate actions, you can do more than just a declaration, demonstrating progress and results.

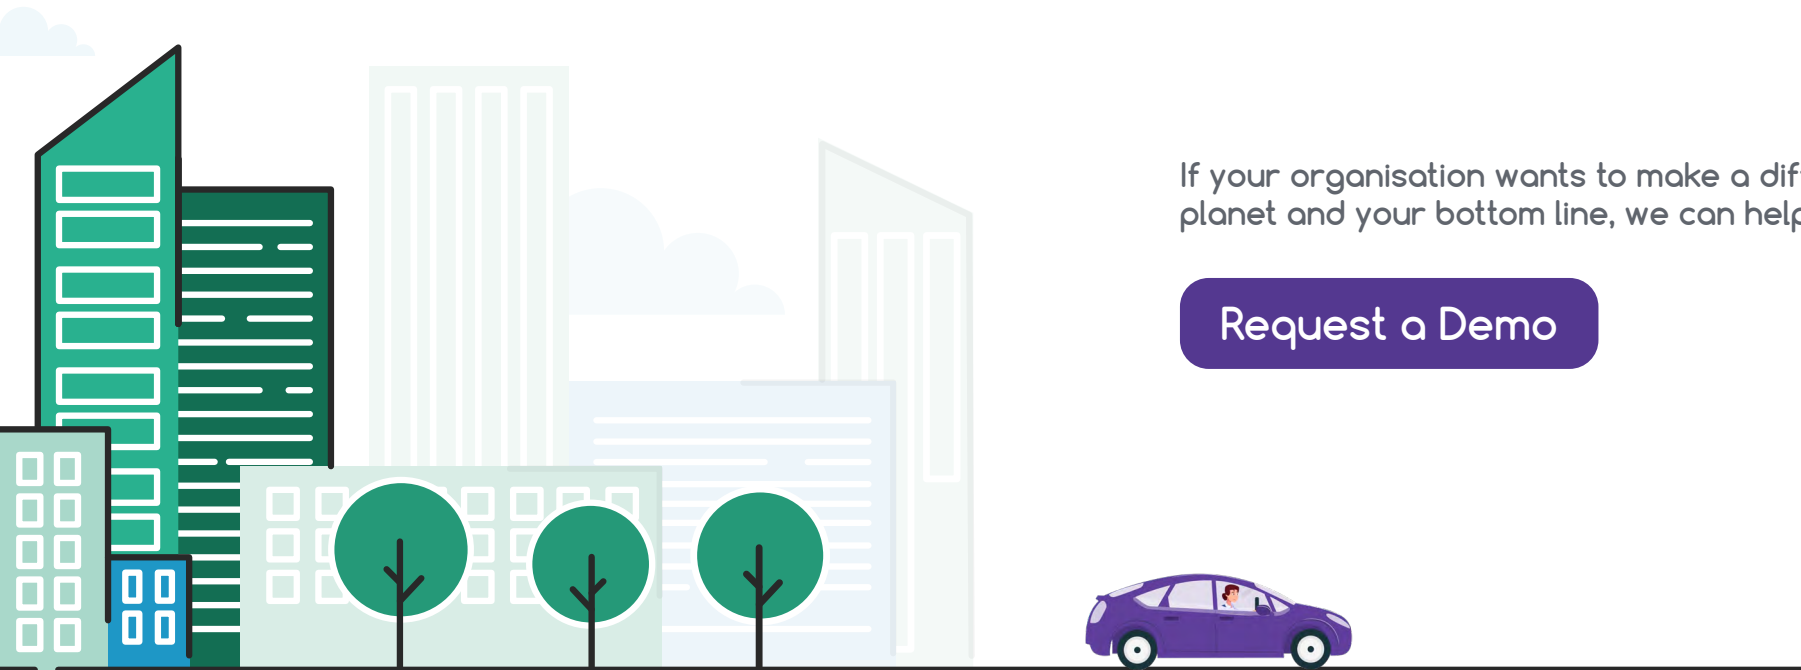

We all play a part in an interconnected economy. Evaluate8 helps you to take responsibility for your part and share your climate success story with stakeholders.

Benefits

- ✓ Client satisfaction, attraction and retention
- ✓ Full carbon visibility
- ✓ Track and demonstrate your progress
- ✓ What would it cost to do without Evaluate8
- ✓ Potential savings
- ✓ Benchmark your company in your industry

If your organisation wants to make a difference for the planet and your bottom line, we can help you get there.

Case Studies

RΛMENTIC

“Almost all businesses, like ours, produce greenhouse gas emissions that are inconsequential in themselves but in aggregate extremely dangerous to our planet. Each of us needs to show leadership by opting out of harming our world. Evaluate8 Sustainability helps me do that by making it easier for me to track my emissions and to work out how to reduce them. I want to enhance my customers’ joy in sharing food together at Ramentic by providing them with the reassurance that their tradition is sustainable.”

Rujyort Tamrakar, Owner/Chef

Castlepoint

“Measuring our greenhouse gas emissions has enabled us to be responsible for our contribution to climate change. We have always been a values-driven organisation that wants to do the right thing and addressing the climate emergency is an important part of that. We found that being able to prove our environmental claims, in a market full of competitors making assertions without an evidence base to back them up, helped us attract more business and manage our stakeholders more effectively.”

Rachael Greaves, CEO

THE HEALTHY EATING CLINIC

“Evaluate8 Sustainability prompts me to make better choices about how The Healthy Eating Hub consumes energy and shows me how to reduce my business’s carbon footprint.”

Kate Freeman, Founder and Managing Director
