

Mortgage Protection

Protect Your Home, Protect Your Family

Protect Your Biggest Investment!

Buying a new home is exciting, but have you thought about protecting it? Mortgage protection insurance ensures that your family can stay in their home, even if the unexpected happens.

Mortgage protection provides financial security by covering your mortgage if something happens to you. It gives you peace of mind, knowing that your loved ones are protected from financial strain and can keep the home without the risk of foreclosure.

HOW DOES IT WORK?

Mortgage protection is a term life insurance policy designed to pay off your mortgage balance in case of death or critical illness. It is affordable and customizable to fit your budget and coverage needs.

We offer plans that include **LIVING BENEFITS**; which means you may have access to a portion of the policy's benefits while you're still alive, in the event of a critical illness or disability.

Why Choose WCHS Insurance?

We offer personalized plans to fit your family's needs. Our team is experienced in helping new homeowners secure their future. You can count on fast, friendly service from a trusted local agent.
