OVERVIEW

The Advanced **BANKCODE** Assessment measures and defines your code of values; it is helpful for anyone who wants to explore their personal values and motivations. You will gain a better understanding about why you make certain choices and how you typically communicate in any given setting.

The goal of completing this 20-question assessment is to determine your actual **BANKCODE** score by following a scientifically validated process to determine your score with more accuracy.

To complete the assessment:

- Complete the 20 questions by rating each statement on a scale of 1 to 5, where 1 is almost never and 5 is always. Keep in mind there is no such thing as a wrong answer!
- Avoid overthinking your answers; take only 5 to 7 minutes to capture your results.
- When you are done, go to the next page and calculate your results by writing each score in the block following the corresponding number.
- Once you have transferred all your scores, add them up to determine the totals.
- The highest total goes into the 1st box, the second highest into the 2nd box, and so on. For example, if my code is A25, N23, K22, and B19, then my **BANKCODE** is: ANKB.
- NOTE: If you have a tie in the results, then it is up to you which order you want to put them in.

This is a powerful assessment tool; once you know your **BANKCODE** score, you will have a better understanding of which values drive your decisions and communication styles.
