The aluminium roof lantern *revolution*

Iconiq combines engineering excellence with unmatched innovation. Our prestigious aluminium roof lantern is a game changer. Iconiq delivering the perfect balance of style, performance and simplicity.

Iconiq's sleek, modern design adds a stunning visual element to any home, whether you're adding to an existing space or creating something entirely new, Iconq is the ideal addition. It complements both modern and traditional interiors and fits seamlessly into any renovation project.

With a choice of frame colours and glazing options Iconiq can be personalised to suit every style.

Contemporary design

Imagine your room bathed in the soft glow of natural light all day. Iconiqs perfect blend of sleek architectural structure and 25º pitch allows maximum light to flow through the lantern, illuminating the space below, reducing the need for artificial light and creating a welcoming and relaxing atmosphere.

Iconiq is available in either Matt Black, White or Matt Anthracite Grey as standard, with the option to order in any RAL colour for a more personalised finish, meaning that Iconiq won't be beaten on style.

Plus, with an integrated LED lighting tray, you can add lights for a truly personalised feel.

Complete *peace* of mind

Leading the way with a host of security features, Iconiq boasts bespoke glazing clips to secure the glass firmly in place, and interlocking eaves beams and rafters couple together ensuring they can't be pulled apart.

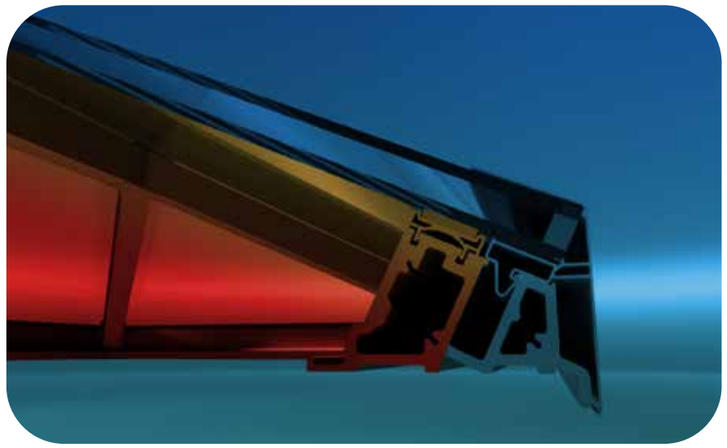
Plus, a tapered frame edge and anti-tamper screws lock the end caps in place. Making Iconiq the perfect choice for security conscious homeowners.

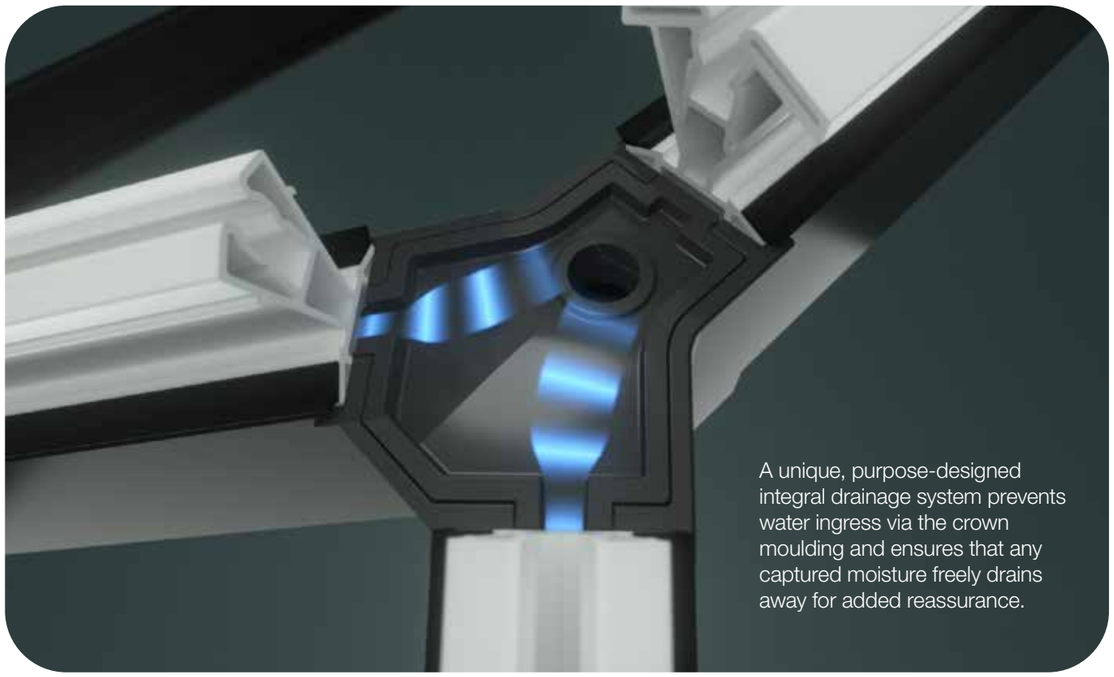
ICONIQ

Aluminium roof lantern

At the heart of Iconiqs innovative design is a glass-reinforced plastic (GRP) thermally efficient ring beam and patent pending Q-loks.

Together they create an insulating barrier that protects against heat transfer and locks in more warmth than a traditional thermally broken lantern. Combined with 28mm energy efficient double glazing, with a U-value of 1.0*, Iconiq is the most thermally efficient roof lantern available.





*centre pane

Engineering excellence combined with a superior GRP ring beam deliver a high strength to weight ratio, allowing Iconiq sizes to range from 1m x 1m up to a breathtaking 4m x 10m* Making Iconiq the largest lantern available on the market and a perfect choice for any size project.

Embrace creativity and think beyond the ordinary when designing your space. choosing two square lanterns instead of one large lantern makes a stunning style statement.

SKYPOD

Aspirational living spaces

Go large to create an impressive feature on your flat roof – maximising the natural light in your room

Make your home *a star*

Imagine creating a stylish new living space that's flooded with natural light. Imagine an inspiring contemporary design feature that will not only enhance your lifestyle but add value to your home too. Skypod is our original uPVC roof lantern that has been leading the way for roof lantern design since it's launch in 2013.

The Eurocell Skypod pitched roof lantern system enables you to create an eye-catching, contemporary feature that floods the interior of a property with natural light. It brings life and freshness to uninspiring flat-roofed buildings, and makes a stunning alternative to conventional conservatory roofs.

Skypod roof lanterns add height, light and volume to any living space. They are the perfect choice for a wide range of refurbishment, extension or new-build projects – including reception areas, classrooms, orangeries, kitchen-diners and garage conversions.

SKYPOD

Styles to suit *every home*

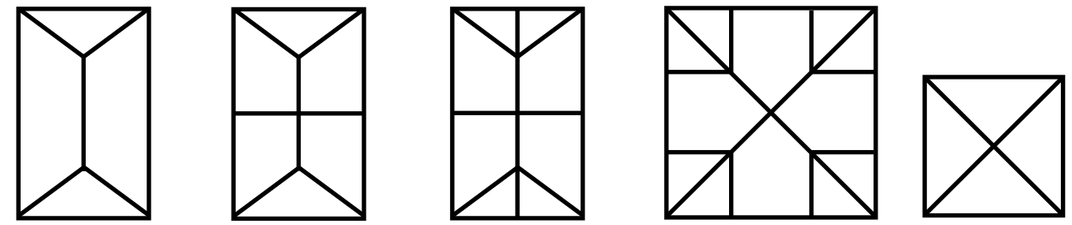
Skypod is available in a wide range of sizes and styles, so you can create a lantern roof that complements the individuality of your home. Skypod is suitable for a wide range of projects such as flat-roofed extensions, orangeries, new builds, kitchen-diners and garage conversions. Go large to create an impressive feature on your flat roof – maximising the natural light in your room.

SKYPOD

SQUARE SHAPED

SKYPOD PLUS

Choose your size and style



Up to 1.5m x 2.75m

Up to 1.5m x 7.45m

Up to 2.75m x 8.7m

Up to 2.75m x 2.75m

Up to 1.5m x 1.5m

A perfect *square*

The alternative to a single span rectangular rooflight, our square lantern roof offers perfectly balanced sightlines and, thanks to its simple 4-hip design, higher levels of natural light than conventional designs of the same surface area. Because it can be produced in sizes right down to 0.5m× 0.5m, this means that even the smallest flat roofs can still benefit from day long natural light.

Whatever the size, Skypod squares up

Whether you're looking for a small rooflight or large gazebo-style lantern roof, there's a solution for you. Our dedicated frame system means that rafter bars line-up perfectly, whatever the size.

Perfect for home extensions

Looking to extend? Make a stunning feature of a flat roof with Skypod.

SKYPOD PLUS

The easy way to add more *class* to your glass roof

Skypod Plus is a cost-effective way to utilise the benefits of a uPVC roof lantern with the premium finishing touches in aluminium.

Available in Black, White and Grey. This sleek, modern roof lantern has been designed to meet the demands of design-conscious buyers.

If you want to let more natural light into your flat roof extension or garage conversion, but also want a contemporary design that works in harmony with your living space, then Skypod Plus is the perfect solution.

Premium finish

Because we've used a uPVC frame with aluminium ridge and top rafter cappings, you can have the best of both worlds. The lower cost of uPVC with the look and feel of an aluminium roof lantern. Skypod Plus offers a premium quality finish, for years of faithful service.

Multiple design options

Eurocell Skypod Plus is available in a range of stylish options, helping you make light work of the most demanding design and installation requirements.

LUMA

Luma flat rooflights are elevated, fixed shut, flat roof windows with a sleek and contemporary look.

And, unlike roof lanterns, there are no bars across the glass to interrupt your view of the sky or cast shadows across your room.

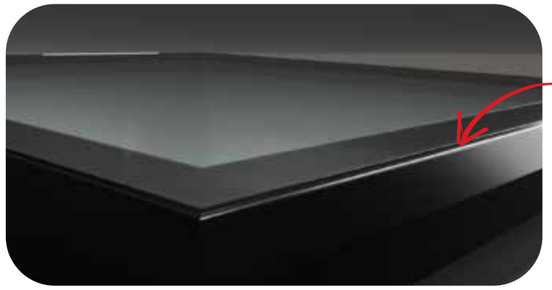
They're the perfect way to flood your home with natural light. So, whether you're planning a new flat roof extension or want to breathe life into an existing one, adding Luma flat rooflights will totally transform the space.

Excellent energy efficiency

Luma's aluminium frame has an integrated thermal break, which reduces heat transfer. And it's available in double-glazed and triple-glazed options, with U-values of 1.3 W/m^{2}K for double and 0.92 W/m^{2}K for triple-glazed. So, you'll stay cool in summer and warm in winter and save money on energy bills.

Secured from the inside

Interior fixings allow Luma to be secured internally for an added layer of security.



Slimline modern profile with sleek seamless glazing

Luma's sleek aluminium frame and unique glazing tape mean there are no chunky frames or painted borders. And there are no bars across the glass to impede your view either. The inside is beautifully finished with a PVC plasterboard trim. The result is minimal framework and maximum daylight.

Integral drainage system

The outer frame includes a unique drainage system that allows moisture to drain away outside for added reassurance.

High performance self-cleaning glass

Luma features self-cleaning glass. It has a special coating that uses UV rays to break down organic matter on the surface, which then washes away when it rains. So, the glass stays cleaner for longer, and the need for regular washing is significantly reduced.

Glass colours

Create a roof lantern or rooflight that complements the individuality of your home with our range of glass options.

Self-cleaning, temperature-controlled glass is included as standard, but you can also choose from one of our tinted glass options. Tinted glass still allows the light to flood in but reduces uncomfortable glare when the sun hits the glass.

Our high quality *standards*

Eurocell plc is the UK's leading manufacturer, distributor and recycler of uPVC window, door, conservatory and roofline systems, offering the widest product range of any single brand.

- All Eurocell products are manufactured to stringent specifications in a carefully controlled environment where high standards can be maintained and guaranteed. To give customers the assurance that all Eurocell products meet the highest standards, we have achieved accreditations from leading UK certification bodies.
- Eurocell products meet the requirements of current Building Regulations, and exceed the standards set out in Part L1 and 2 Conservation of Fuel & Power (Windows).
- As new regulations are introduced, Eurocell remains committed to meeting and exceeding these ever more demanding standards, so that we continue to set the quality benchmark for the building plastics industry.

INSTALLERS IN MIND

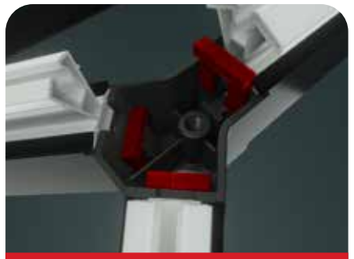
We understand that time is money, and fast and simple installation is key to delivering customer satisfaction. That's why all of our roof lanterns and rooflights feature time saving design elements.

Iconiq

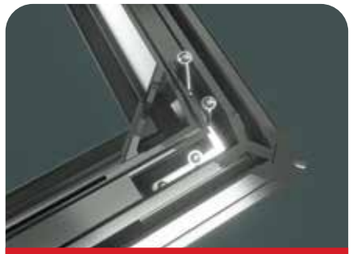
Iconiq's genius patent pending Q-lok technology reduces the need for mechanical fixings and ensures precision connections every time. The simple slide and lock mechanism makes installation simple and efficient and means that standard size lanterns can be installed in under an hour.

Watch Iconiq's innovation

Rapid-fit slide & lock connections



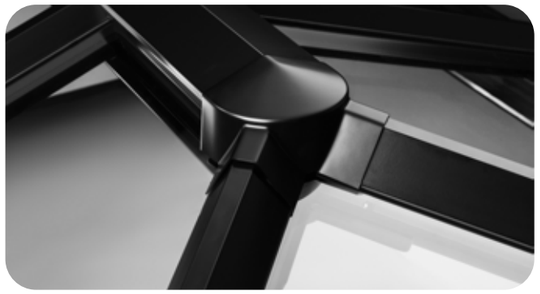
Fit together in seconds



Minimal fixings

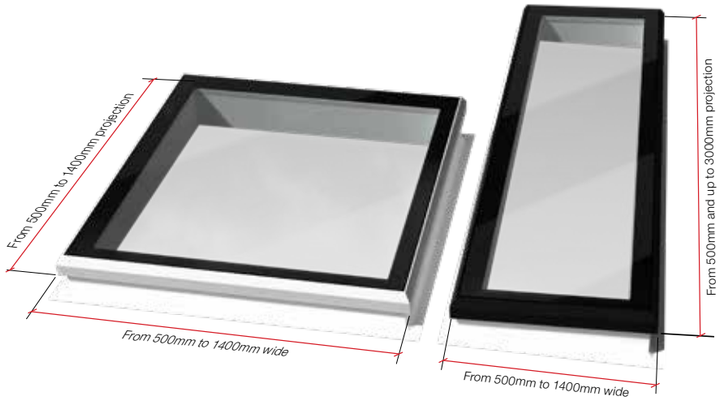
Skypod & Skypod Plus

Skypod and Skypod Plus are delivered pre-cut and all screw holes are pre-drilled ensuring a precision-fitted watertight lantern roof. The sleek architectural design means there are no fussy ridge crestings or finials to fit.



Luma Flat Rooflights

Luma flat rooflights are made-to-measure in our factory and delivered straight to site at a time that suits you. Easy to install with no fuss and no mess.



Our service *promise* to you

We know how important it is to you to keep your customers happy. That's why we take great pride in consistently providing a friendly, approachable service to make finding and getting what you and your customers need quick and easy.

Customer first
Whatever you need, we're here to help.

Fast quotes
Receive a detailed, personalised fast quote.

Technical support line
Need help? Our expert team is just a call away.

Assisted surveys
Need a site survey? We'll arrange for an engineer to assist.

Order checking
Every order is checked before delivery, so you can get straight to work.

Lead times to suit you
Tell us when you need it and we'll make sure it arrives on time.

Assisted installations
Need installation support? We'll arrange help on-site.

Always a solution
No matter the project, we have a roof lantern to fit.
