News You Can Use

With the Stats tab in Flexmls, you can instantly impress your clients by becoming the neighborhood expert they trust for deep market insights. For example, your client might say: "I'm interested in the 12345 zip code. What can you tell me about that market?"

Using Quick Search to filter by that zip code, you can go to the Stats tab and immediately show them information like Median List vs. Sold Prices, Average Days on Market Trends, How Time on Market Affects Pricing, and lots more valuable data.
