Equipment Interests

We're Your Buyer for Equipment

HERE'S WHAT WE PURCHASE

**We want to purchase your operational critical/backup power equipment
+ AI GPU & Components**

Do you have excess, legacy, or upcoming critical/backup power equipment, AI GPU & component inventory that you'd like to move?

Whether acquiring ourselves or selling to our vast buyer network, we'd love to collaborate.

Oftentimes, the sale of equipment can offset the costs of the decommissioning services.

Critical Power

Substations 115V - 138V+ (prefer larger)
Generators (20KW - 5+Megawatts)(Diesel/NG)
Uninterruptible Power Systems
Panelboards (800-1000+ amps)
Automatic Transfer Switches
Power Distribution Units
Remote Power Panels
Switchboards / Switchgear
Transformers (5kVA - 5MW+)(prefer larger)

Building Infrastructure

Chillers
Cooling Towers
Boilers
Pallet Racking
Conveyor

Data Center

CRAC/CRAH Units
PDUs | All Power Distribution
Raised Computer Flooring
Server Racks
Network Cabling
Copper Wire/Piping
Busways
Server Blade Chassis

AI GPUs + Components

NVIDIA/SuperMicro GPUs
Other AI Servers
Networking Components
Enterprise Hardware
A100/H100 Systems
B200/B300 Deployments/Clusters

JAYLAN SOLUTIONS
INTERNATIONAL

Comprehensive Solutions We're Your All-In-One Provider

OUR CORE COMPETENCIES

Jaylan Solutions prides itself on having established a team with 80+ years of combined experience. Our Team delivers white-glove, professional, reliable, and on-time services. Every service we provide is tailored to our clients' needs and exceeds expectations. Our nationwide team of experts includes engineers, electricians, and general contractors (Licensed/Bonded/Insured) From removal to recycling, Jaylan's expertise ensures a seamless, safe, and efficient experience.

SERVICE CATEGORIES

Equipment Removal and Decommissioning

Streamlined removal of outdated or redundant equipment with minimal disruption.

- Safe disconnection and dismantling of electrical systems
- Expert handling to preserve valuable components
- Compliance with all safety and environmental standards

Equipment Installation

Expedited and reliable equipment installation is vital to operational excellence.

- Nationwide expert technicians specializing in specific equipment.
- Experts familiar with regulatory requirements from local agencies.
- Licensed, Bonded, and Insured.

Electrical Systems Preparation for Removal

Ensuring electrical systems are safely disconnected and ready for removal.

- Comprehensive control and power disconnection
- Precise conduit cutting and wire organization
- Collaboration with demolition teams to meet project timelines

Diesel Generator, Chiller, and Cooling Tower Preparation

Specialized preparation services for large-scale equipment removal.

- Disconnection of coolant and fuel systems
- Secure handling of exhaust and piping systems
- Precision unbolting and structural preparation

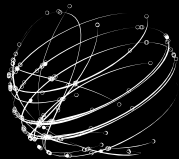

Electrical Equipment Rigging and Loading

Expert rigging and loading services for heavy electrical equipment.

- Safe lifting and transport using industry-grade equipment
- Skilled technicians for precise and efficient handling
- Coordination with logistics to ensure smooth delivery
