🔹 How to Assist Using www.miraclereadyinfo.com

Once you've made a strong connection, your next step is to **guide**—not present or convince. The website does the heavy lifting; you're simply pointing them in the right direction and staying present.

Follow this simple walkthrough:

---

1. Start with the FIRST short video on the homepage

> "This video is just 2 minutes and gives a great intro. It's the fastest way to understand what this is about."

This builds immediate curiosity and gives a strong, simple overview.

---

2. Scroll through the Before & After photos

> "These are real people and real results. Everyone responds differently, but these photos really speak for themselves."

If you know what they're struggling with, highlight a story or image that's relatable to them.

---

3. Stop at the 'How the Body Works' section

> "This part is really important. Let me read you the last paragraph—it explains how our bodies function over time and why we experience aging."

Then read the final paragraph aloud.
This helps them understand *why* the technology makes sense.

---

4. Scroll to the section about the company

> "Here's where it talks about the founder, David Schmidt—he's actually the inventor of the technology."

Point out the company's **20+ year history** and solid foundation. It helps establish trust and long-term credibility.

---

5. Ask them to watch the video about David Schmidt

> "This short video explains his background and vision—he says it better than I ever could. It's only a few minutes and really worth watching."

This adds credibility and shows the human story behind the product.

---

6. Leave them with the website to explore further

> "Take a few minutes to explore the site and watch what interests you most."
> "When do you think you'll be able to take a look? And when would be a good time for me to follow up? I'd love to hear what stood out to you."

This naturally leads into the **next step: R – Reconnect**.

🔔 Important Reminder:

You are **not** the expert.
The website and tools do the work—you simply **guide the experience**.

- Keep it simple.
- Stay curious, not pushy.
- Follow up by asking, *"What did you like most about what you saw?"*
