

Hybrid A.I. Chatbots Get 16x Better ROI

Learn the “Zero Tech Skills” Strategy For
Elite Online Marketers

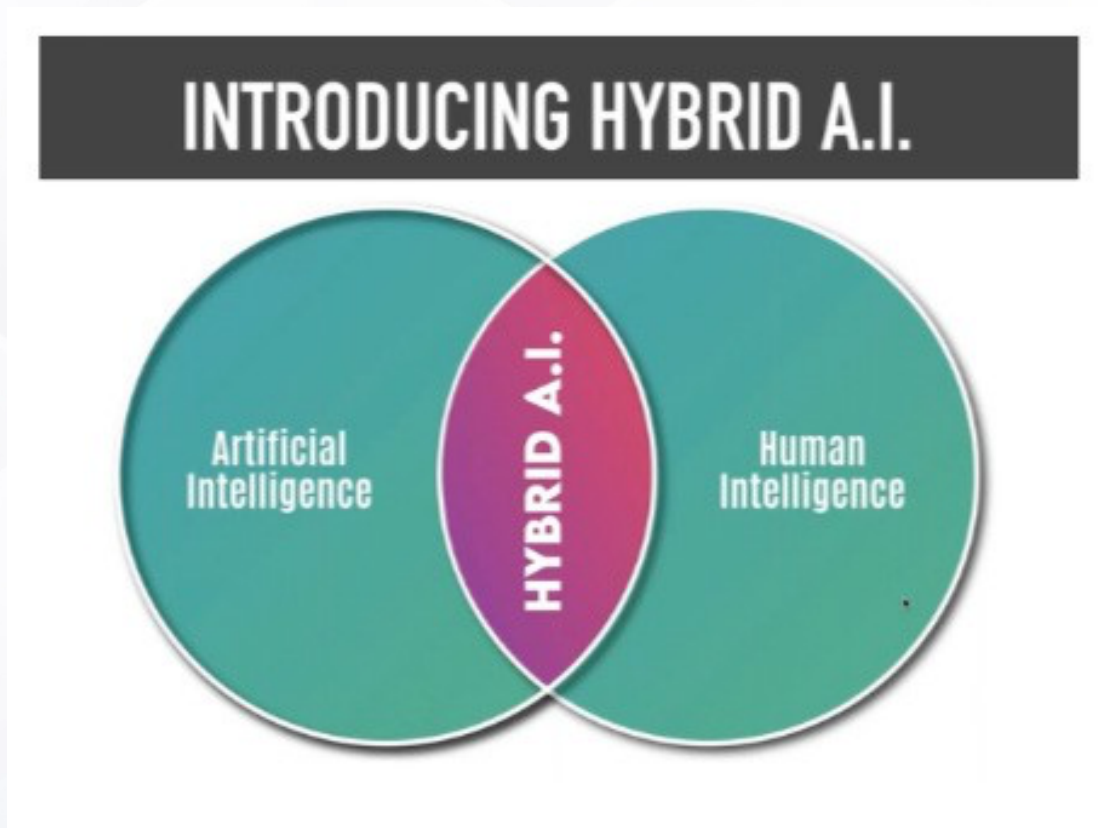

BY RICH ADUBATO

You're about to discover an exciting new form of artificial intelligence called "**Hybrid AI.**"

This is for you if...

- You have an **existing business** and you need more leads, more sales and want to work less.
- Or if you're a **beginner online** looking for something new that allows you to work from home and is very profitable.

So what is *Hybrid AI*?

It's where you take the best of Artificial Intelligence and Human Intelligence and combine them to generate leads and profit (even in 24 hours!)

Marketers, affiliates, and business owners are getting very excited about A.I.

And for good reason.

I believe...

AI will make more millionaires than anything else in history

The Power Of ChatGPT

Last year, ChatGPT opened people's eyes to the raw power of chatbots.

In fact, it took just 5 days to reach one million users!

So how does it work?

ChatGPT is generative AI.

That means you input something and it "generates" something out for you, in the form of text.

The text you enter is called a "prompt."

Some examples might be:

- *"What's a recipe for a pancake?"*
- *"Write me a poem in the voice of a pirate."*
- *"Write me a blog post about the keto diet."*

Now, I want to teach you how to prompt 99% better than most people out there.

ChatGPT

Prompting Tips

1. **Be clear.** Be specific and tell it exactly what you want.
2. **Use as few words as possible.** The more words you use, the higher the chance it gets confused and makes a mistake.
3. **Define parameters and limitations.** Don't just say what you want, also explain what you don't want.
4. **Provide examples.** This gives the bot more context and helps it understand what output you're looking for.
5. **Don't get too complex.** Unfortunately, ChatGPT suffers from something called "hallucination", which is the industry term for "making stuff up." They don't know why it does this but it's something you should be aware of.
6. **Break up prompts with punctuation.** The only three things you need to use:

- a. Commas (,) when you want to string multiple things together.
- b. Colons (:) when you want to describe something in detail after a thought.
- b. Period (.) when you want the thought to end.

How To Create Images From Thin Air

You can write text (a prompt) and get a unique, original image created for you.

MidJourney is a popular tool for this.

For example, a guy named Matt asked his daughter what she wanted to see.

She said “Kitty cat mermaid” and in 30 seconds...

They got this...

Cool, huh?

Then he asked his son for a prompt. He said, "Red guitar hard rock"...

Now, here's where it gets exciting.

Matt used AI to create the following Facebook ad...

 **Matt Leitz** ...

As a solopreneur, you don't just want to succeed - you want to 10x. That's why our AI training is a must-have. With AI skills, you can automate tasks, make data-driven decisions, and unlock new opportunities for growth. So if you're serious about success, enroll now and let's 10x together.

They created the image, the text, and the idea... all using AI.

Another 3 Awesome AI Tools...

- **Descript:** (Video in > text out) You put a video in and get a full-text transcript. What's amazing is that you can edit the text and it will *edit the video for you!* It will update your mouth and voice!
- **Resemble:** (Text in > Voice out) This tool creates lifelike voices from your text in seconds.
- **Runway:** (Text in > Video out) You type in text and it creates a video for you. This one is not ready for primetime yet but it's amazing to see where things are heading.
- **Various Tools:** (Text in > Action out). For example, you could say, "Create me a spreadsheet with all the properties in Austin Texas between 500-700k and AI can research online, do the work, and create it all for you. Amazing.

With all that said...

ChatBots Are Where The Big Money Is In AI

That's because chatbots can...

- Generate leads
- Increase sales
- Improve customer support

If you already have an existing business, you can put chatbots on social media, and on your website to collect leads and answer questions.

Or, if you want to launch a new business, here's a big opportunity for you:

Create custom ChatBots for other businesses

Every business will benefit from having its own chatbot and it makes sense. It's faster, easier, and cheaper than doing it the old way.

Forbes predicts that AI will be a **\$15.7 trillion industry.**

It's the biggest opportunity in today's fast-changing economy.

Truth is, we're still in the infancy of AI.
Here's where we are with AI right now.

amazon

Things are going to explode in the next few years.

Are you going to jump on this earlier? Or will you miss this incredible revolution?

In fact, some experts believe...

AI Is A Bigger Opportunity Than The Internet

Why?

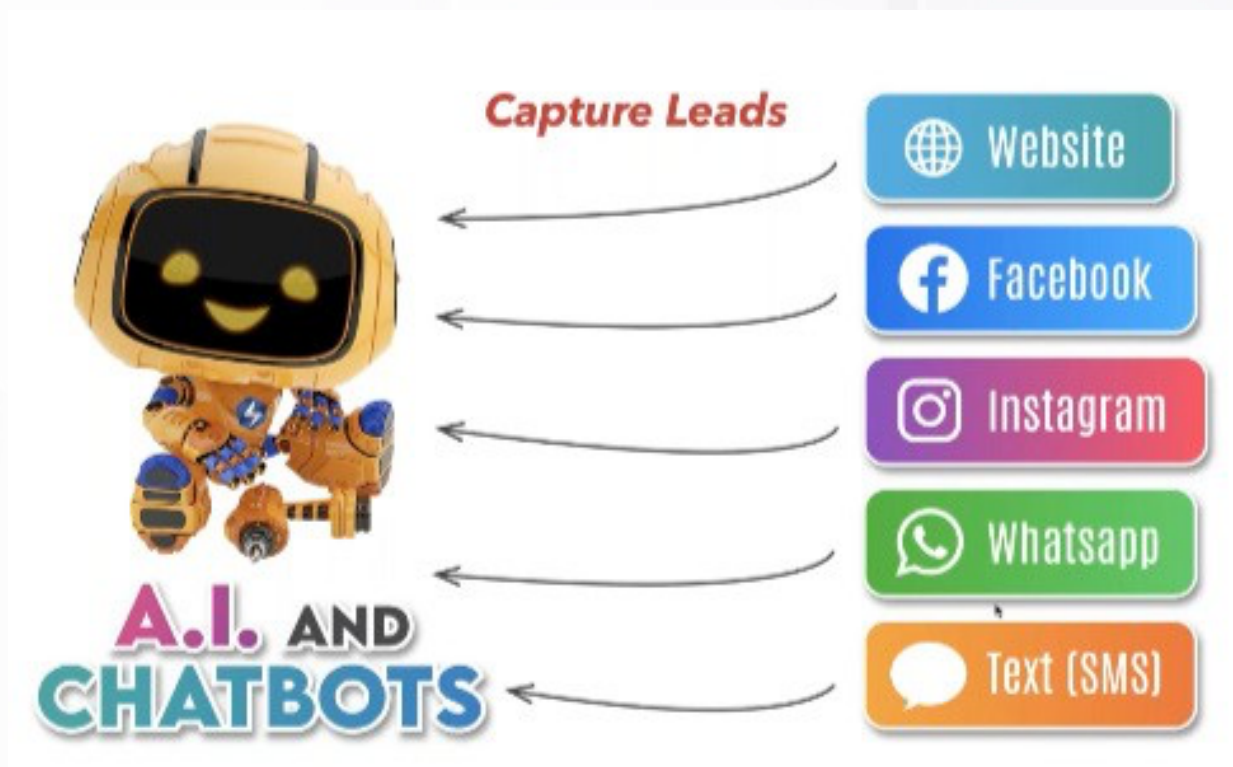

Three reasons:

1. **AI is cheaper.** In the early days of the internet (around 2005) it would cost you \$10,000 to create a website.

2. **AI is easier.** You don't need to hire a big development company, you can do a lot of this stuff relatively easily.

3. **AI is faster.** The internet was very slow back in the day. Today, you can create an entire website using AI in a matter of hours.

You can put AI chatbots everywhere to capture leads ...

Plus, you can send messages to people on these channels to have a back-and-forth dialogue with people.

As a comparison to see how much better this is...

✓ Leads Comparison

Websites

- Opt-in form

VS.

Chatbots

- Opt-in form
- Click a Button
- Click a Link
- Facebook Ad
- Instagram Ad
- Social Comment
- Send DM Message
- Send Text
- Automated Chat
- Scan Codes

***Messenger + email + text 😊**

With a website, the only way to capture leads is with an opt-in form.

However, with Chatbots, you can capture leads from all over the internet.

Chatbot Got 16X More Leads

Matt Leitz, an AI chatbot expert, did an experiment. He pitted email against chatbots to see which captured leads.

Here were the results he got:

- Sent: 1,000
- Open: 200
- Click: 20
- Reg Rate: 40%
- Register: 8

Now, when he sends the same messages with a ChatBot...

- Sent: 1000
- Open: 796
- Click: 259
- Reg Rate: 51%
- Register: 131

That's a whopping 16 X better results than email!

Now, don't get me wrong, Chatbots aren't going to kill email.

Email isn't going anywhere.

The two platforms work together hand-in-hand.

However, if you've ever struggled to get people to register for a webinar or build an email list, now you can do so in a way that generates breakthrough results.

How To Build A Profitable Business With Chatbots

If you'd like a deep dive into profiting from chatbots, I encourage you to sign up for an exciting training session with **Matt Leitz**, the chatbot expert.

[Go here to register now!](#)

During the training, Matt will show you, live on screen, how chatbots have made him and his clients millions of dollars.

These live demos are insane!

You don't want to miss this.

Register now.
