Installing inPersona dApp

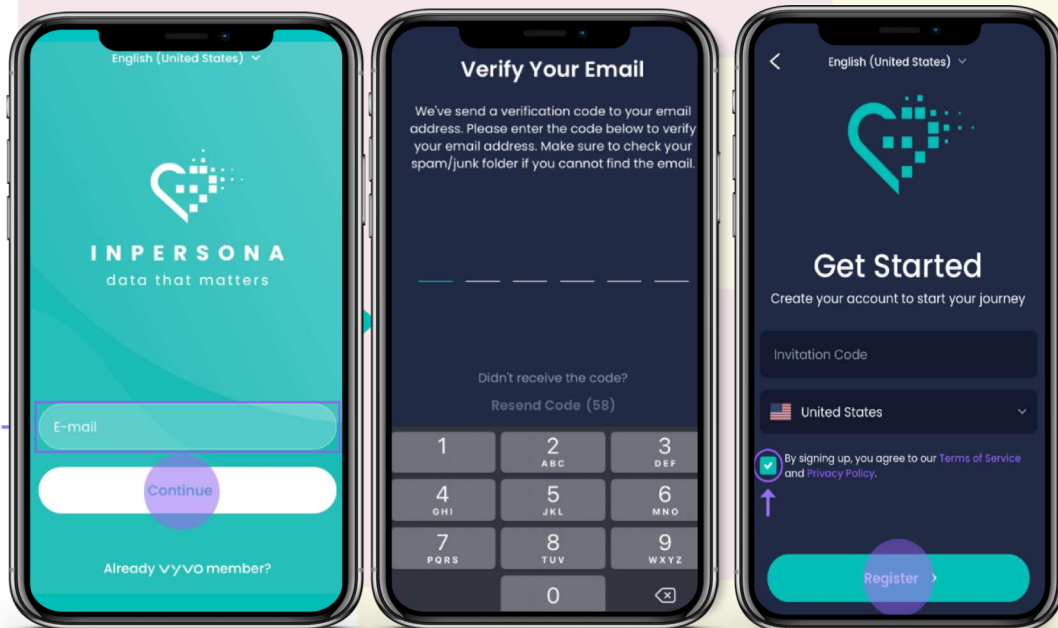

Download the dApp and create an inPersona Account.

1. Download **inPersona PRO** for iOS users from the Apple App Store. If you have an Android device download **inPersona** (PRO not required) from the Google Play Store. Please ensure you have the **LATEST iOS** for iPhone or **Software Version** for Android **BEFORE PROCEEDING!**

2. Open the application and begin the registration process by entering an email address when requested and click continue.

3. A One Time Password (OTP) will now be sent to your email address for verification purposes. Enter this 6 digit code into the application when requested to verify your email address.

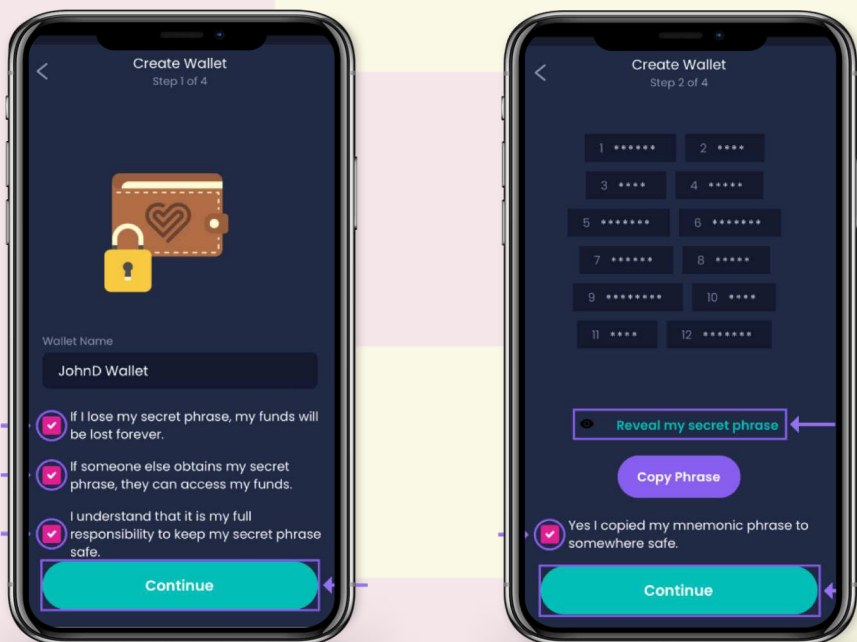

4. Make sure you have an Invitation (IC) code from the Vyvo Member who invited you to the project. Enter this code when requested and then select your country before reading and agreeing to the inPersona Terms of Service and Privacy Policy. Click **"Register"** to continue

Set Up Your Inpersona Wallet

Once you have completed the registration process above, you will be asked to set up your inPersona wallet. Select **"Create Wallet"** and following the 4 easy steps below.

1. Enter a **name for your wallet** as requested, carefully read and acknowledge all the information on the page before clicking continue.

VERY IMPORTANT

Write down and keep your secret phrase!

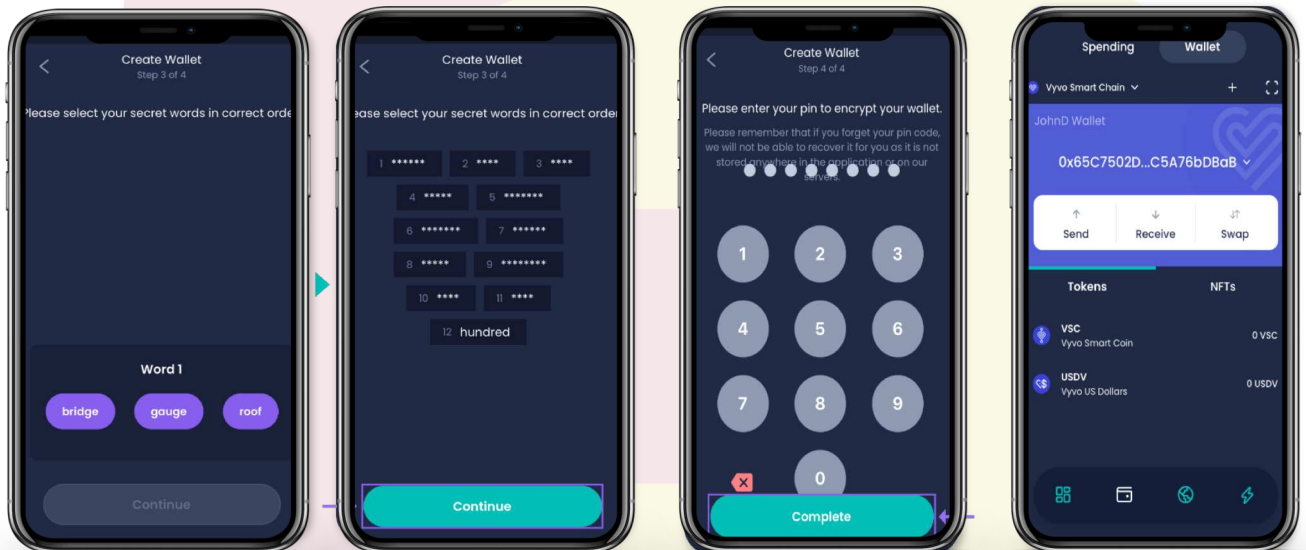

2. When you click continue will find a secret phrase covered by asterisks to keep it hidden. Click on **"Reveal my secret phrase"** to display it. Whilst you can click **"Copy phrase"** and paste it into a safe space, it is strongly recommended that you write it down in a physical notebook the location of which is only known to you to ensure that your funds cannot be lost or accessed by a third party.

Confirm the operation by checking **"Yes I copied my mnemonic phrase to somewhere safe"** and click **Continue**.

Setup inPersona Wallet

3. Next you will be asked to recreate your secret phrase by selecting the correct word from each group of 3 that appears on the screen in the correct order. Once complete click **Continue**.

4. You will now be asked to **create** and then enter an 8-digit pin to encrypt your wallet. Once again please ensure that you **write this down** and **keep it in a safe place**.

Note: If you forget your pin, you **WILL NOT** be able to recover it as it is not stored anywhere in the application or on any of inPersona's servers.

As soon as you click complete your fully integrated inPersona wallet will be ready for you to use.

Important: Before moving to the next stage please also **fully complete your PROFILE set-up** by navigating to the Profile menu at the top left of the home screen (by tapping on **Hi**). Otherwise you will not be able to complete your mining kit purchase.

Access inPersona Store

APPLE WATCH users **DO NOT** buy **DATA NFT** in the **APPLE APP STORE!**

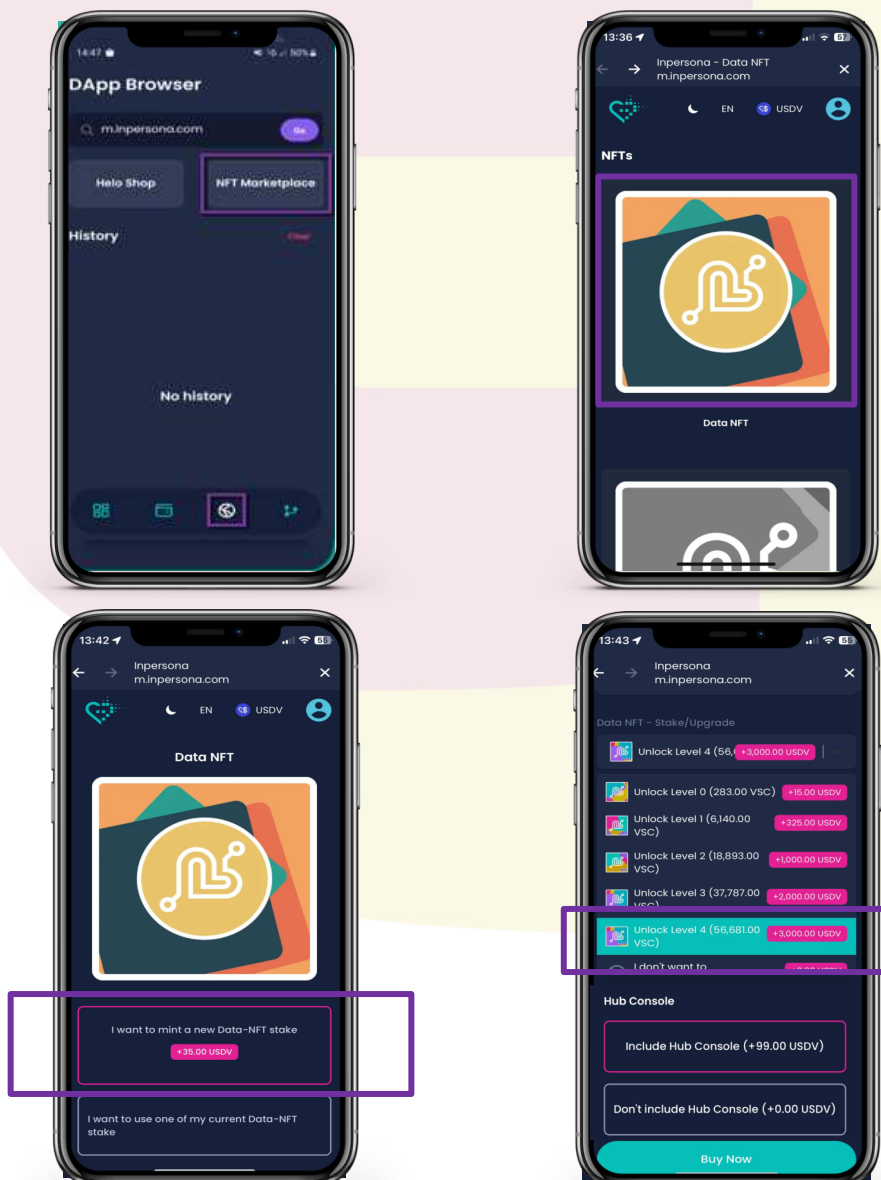

1. Access the inPersona Store by navigating within inPersona to the in-built web browser represented by the small **globe icon** which appears at the bottom of every screen in the inPersona dApp.

To access the inPersona Store select **NFT Marketplace button** however on **iPhone** devices type "**m.inpersona.com**" into the browser and click **Go**

2. Click on the orange Data NFT Graphic found at the top to enter the al la carte store.

3. Select the **"I want to mint a new data-NFT Stake" +\$35.00**.

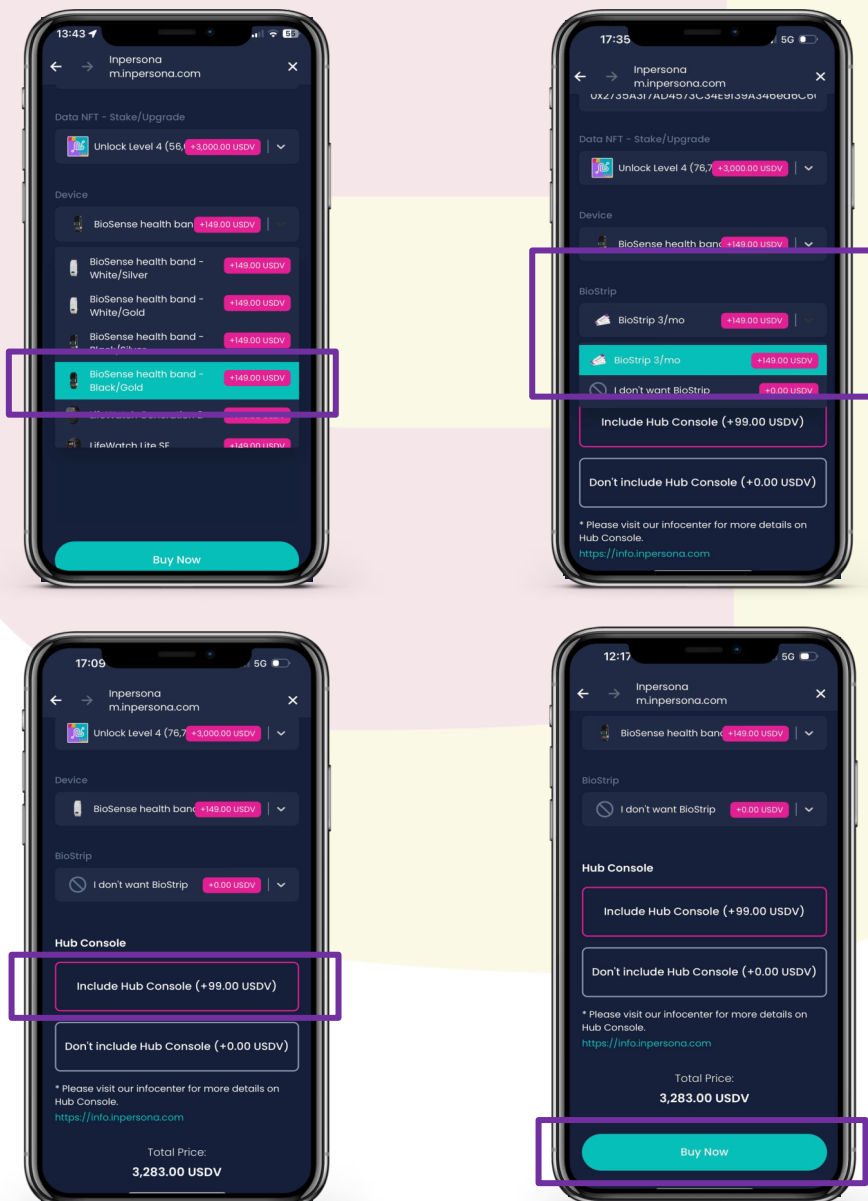

4. Next choose your **Activation** (Unlock Level) **Level 1 – 4** the higher the activation Level the more VSC per day you can earn. Remember this is **NOT A COST** its still **your money** it just converted at the prevailing rate for that day for **VSC VYVO Smart Coin** and locked for 12 Months.

Selecting Helo Device/BioStrip and Business Hub

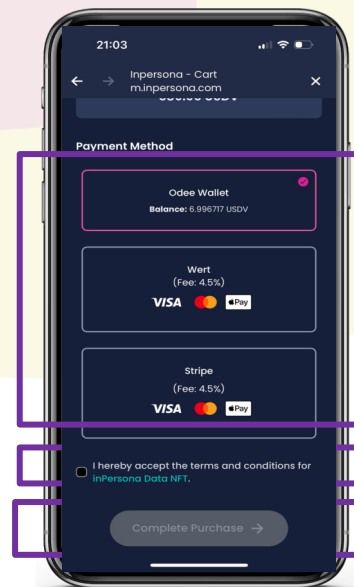

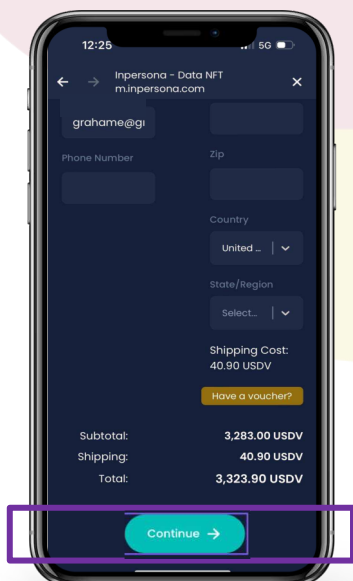

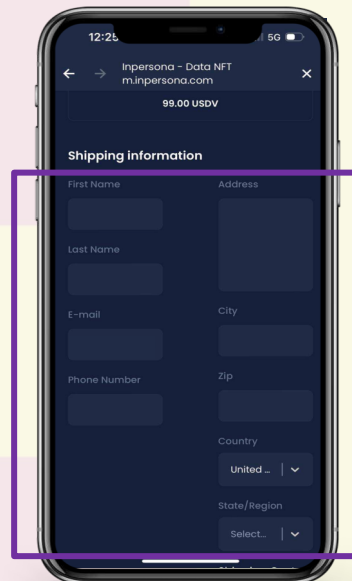

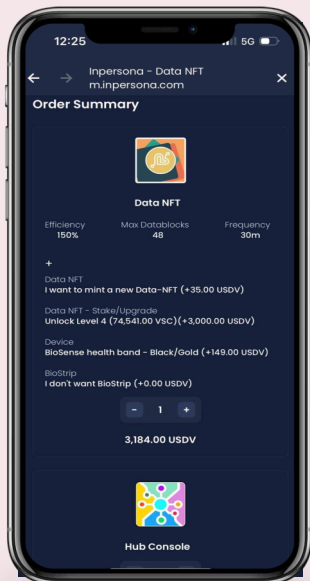

1. Next you select the **HELO Device** required, click the dropdown menu next to device and select the **HELO** type and colour of your choice. Of course **if you already own a APPLE WATCH** (or compatible device once supported) you can simply select **I don't want a Device**.
2. Next select the dropdown menu for the **Biostrip** product and choose the 3 months supply if required or simply choose **I don't want BioStrip**.
3. In order to fully participate in the **VYVO Rewards Program** along with being able to generate **Invitation Codes** you'll need the **Hub Console**. So make sure you select the **"Include Hub Console"** +\$99.00 if required.
4. Next once you have selected all the items required click the **BUY NOW** button.

Completing Your Purchase

1. Next you will now be presented with an **Order Summary**, please ensure that the details are correct.
2. Scroll down and complete your shipping details if you ordered a **Helo Device**.
3. Again check the details and totals and click the **continue** button .
4. Next select your **Payment Method** we suggest using **STRIPE** if you are using a Debit or Credit Card. After choosing payment method click the check box to accept the terms and conditions and click **Complete Purchase**.
5. On the next screen complete your payment details and finalise payment.

You can also make your purchase using stable coin funds held in a compatible crypto wallet.

Experienced users who have crypto currency held in a compatible external wallet can make their purchase by using **USDC, BUSD** or **USDT** (bep20) on the **Polygon** or **Binance Smart Chain**, respectively.

Before you can make a purchase using one of the above crypto currencies you need to create an account at **odee.com**

Create ODEE Account

1. Go to **odee.com** in the web browser on your mobile device or by using the internal web browser in the inPersona App by navigating once again to the small **globe icon** which appears at the bottom of every screen in the inPersona dApp.
2. **Create** Account/Log In using the same **EMAIL ADDRESS** you used for **inPersona** and click **login**.
3. Enter the **OTP** (one time password) you will received via email. Once entered correctly, you will automatically directed to your **Odee Dashboard**.

On completion of the above steps you will have basic access to your **Odee.com** account and **Odee Wallet**, you will be guided on how to complete the full set up of your account including KYC and how to activate your **VyvoPay** or **OdeePay** Cards later in this guide.

4. To complete your basic set-up access your profile from your **Dashboard** by clicking on the button located under the Wallet Balance.

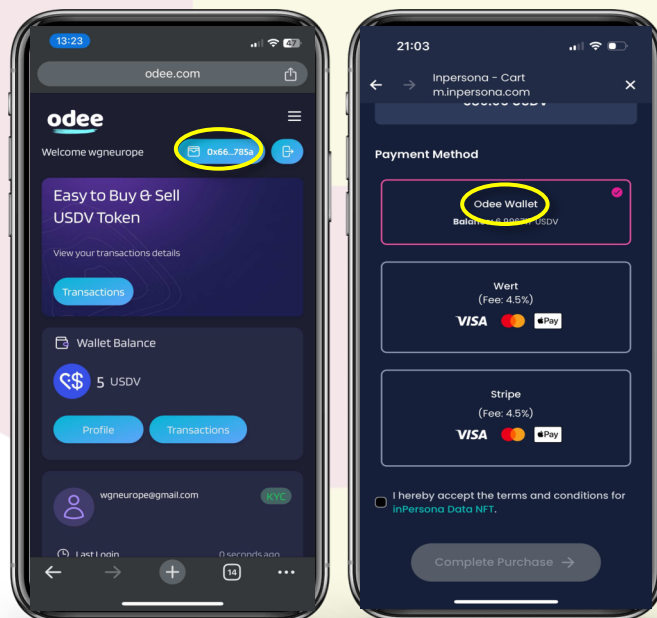

5. In the **My Profile** page you will be able to edit your Gender, Phone Number and Address information, Once KYC verification is completed, you will only be allowed to edit your phone number.

Completing Your Purchase Using Crypto

In order to complete your purchase you will need to transfer your chosen crypto currency to your **Odee Wallet** using the **Odee Wallet Address** located in the top right hand corner of your Odee Dashboard.

During the transfer process your funds will automatically be converted to our **USDV Stable Coin** and will be available to make your purchase when you select Odee Wallet as your payment method at checkout.

Please ensure that you have sufficient funds in your external wallet to cover transfer and gas fees.

Setting up HELO Device

Helo contents and Setup

Once you receive your **Helo** wearable device please follow the steps below.

1. Open the packaging and check the contents, for **LifeWatch Gen 2** the cable charger and spare smaller strap are contained in the foam inlet, for the **Biosense** device it's contents are contained in the lower section of the box.

If you have a **LifeWatch Gen 2** make sure you **remove the sticker** on the face of the watch.

2. Connect the **USB cable (included)** to a power source and connect your Helo device to enable charging. Ensure that the charging pins line up with those on the Helo Device and they should easily lock into place.

3. Once you have fully charged your Helo device follow the instructions on the next page to connect to the **Helo Smart App**, the first time you connect your Helo to the Helo Smart App you should be directed to perform a device **Firmware update**. It's **very important** that perform this update, so please make sure you follow the onscreen instructions to enable the latest **Firmware Version**.

HELO Smart App

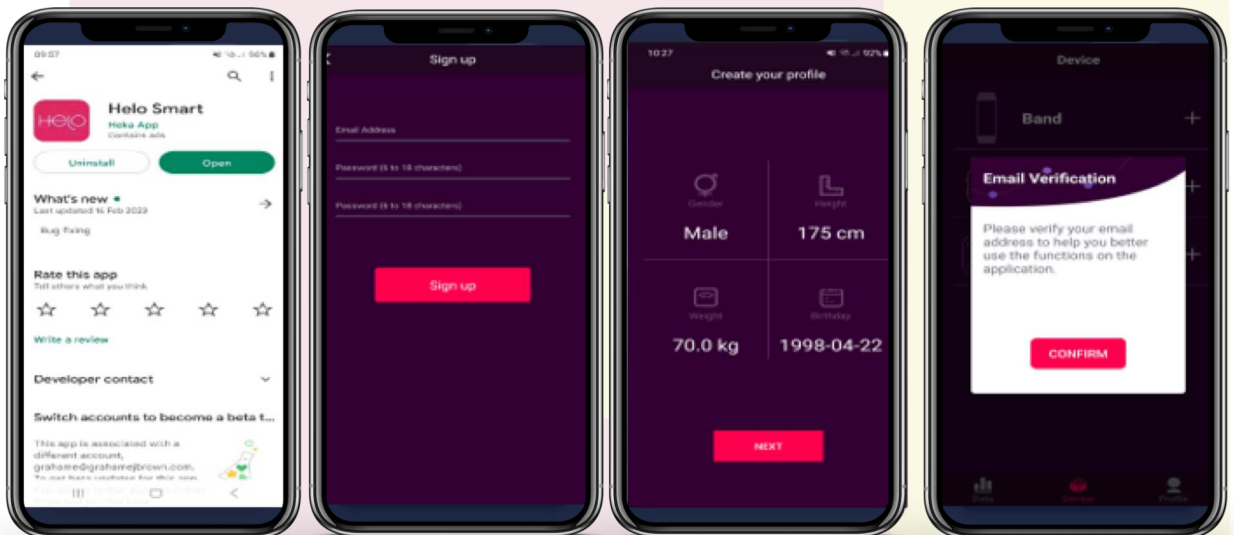

Helo Smart App & Pairing Your Wearable Device.

Once you receive your Helo wearable device, you can track your health and fitness using the Helo Smart App on your mobile phone.

1. Download the **Helo Smart App** from the Apple App Store for IOS users or the Google Play Store for Android.

2. Once you have installed the Helo Smart App on your mobile phone, launch the application by clicking on the Helo Smart icon.

3. Within the Helo Smart App register your account using the **same email address** that you used to register with Inpersona, choose and verify your password.

4. Follow the on-screen instructions to create your profile and click next before verifying your email address by visiting your email account and clicking on the verification link in the email sent from **helohealth.com**.

Connect your HELO Device

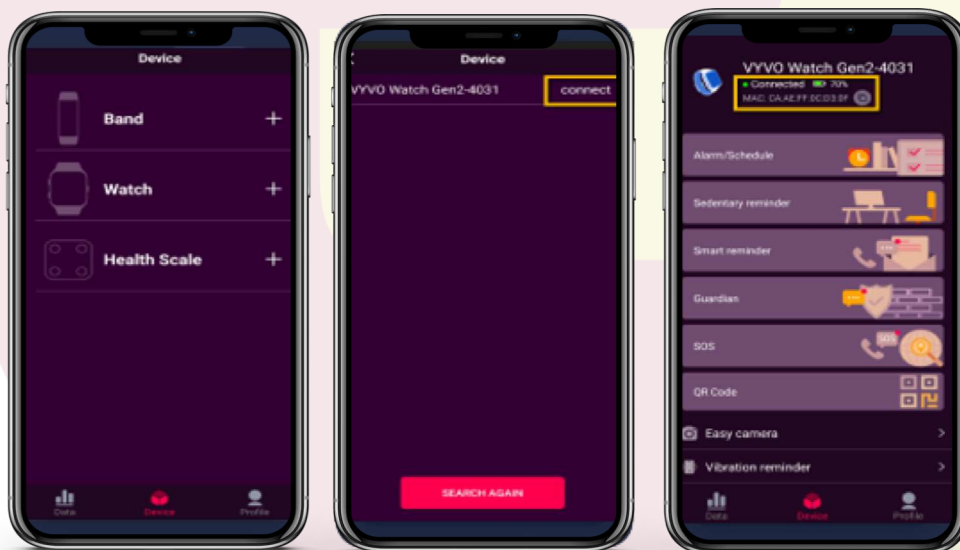

Pairing Your Wearable Device.

4. Next you will see the device selection screen; choose **Band** if you have a **Biosense** or **Watch** if you have a **Watch Gen 2** in order to start the process of binding your device to the Helo Smart App, using your phone's Bluetooth connection.

5. The App will search for nearby devices and your device will be displayed on the following screen. **Click Connect.** Next you should see confirmation that your device has connected successfully.

Very Important: Please complete the **Firmware Update** by following the on screen instructions when prompted.

In order to benefit from **Personal Mining Rewards**, you now need to attach your wearable device to your Data NFT in the inPersona dApp by following the binding instructions on the following page.

IMPORTANT

In order to maximise your daily **VSC** rewards from your **Personal Health Data** please ensure that you **refresh** the HELO Smart app several times daily by simply pulling down and releasing the home page so as the **Blue** refresh circle icon appears each time.

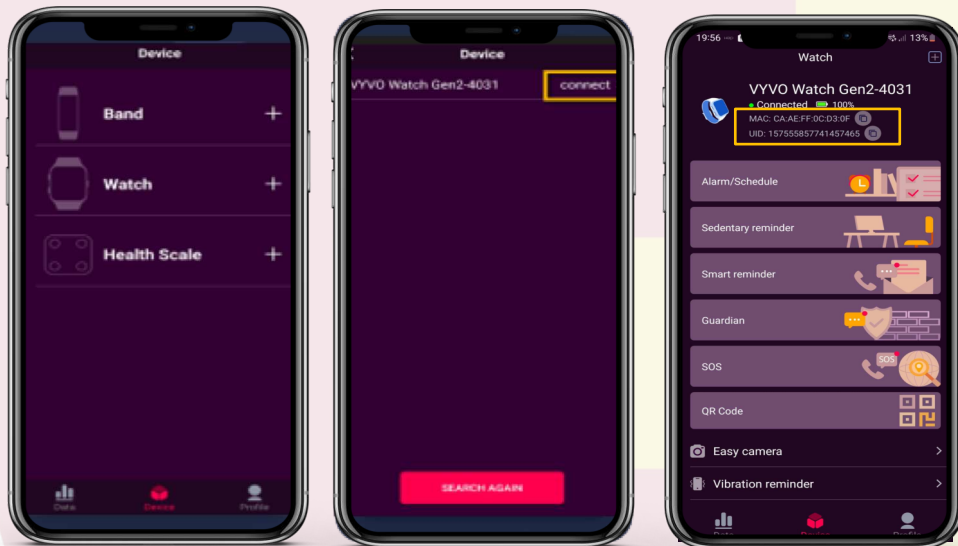

Binding HELO to inPersona

Binding Your Device to the inPersona dApp.

1. To bind your device to the Inpersona dApp you firstly need to locate the **MAC address** and the **UID** of your device in your **Helo Smart App** as pictured below...

The **MAC & UID** address is located on the Device Home Page. Next to them is a COPY button so you can paste each of them into the inpersona dApp.

You will now use this information to **bind** your **Helo Device** to the **NFT** in your **inPersona dApp** by following the instructions below.

Binding HELO to inPersona

2. Open **inPersona** and select the “**Bind your device**” button, located below your Data NFT details on the homepage.

IMPORTANT

If you are unable to see your **DATA NFT** you are more than likely have the wrong blockchain selected. . To resolve this simply click the **icon** at the very top right and select the appropriate chain. This is usually the **Vyvo Smart Chain** unless you purchased your **DATA NFT** on **POLYGON** or **BINANCE** in which case select that blockchain.

3. Enter your pin to unlock your wallet and confirm.

4. Enter the **MAC Address** by copying this from the **Helo Smart** home page.

5. Enter the **UID** of your device by copying this from the profile section within the Helo Smart App.

Select “**Bind**” when you are ready. A message at the top of the homepage will confirm the bind

Wellness+ Subscription

HELO OWNERS ONLY!

Not required for APPLE WATCH owners

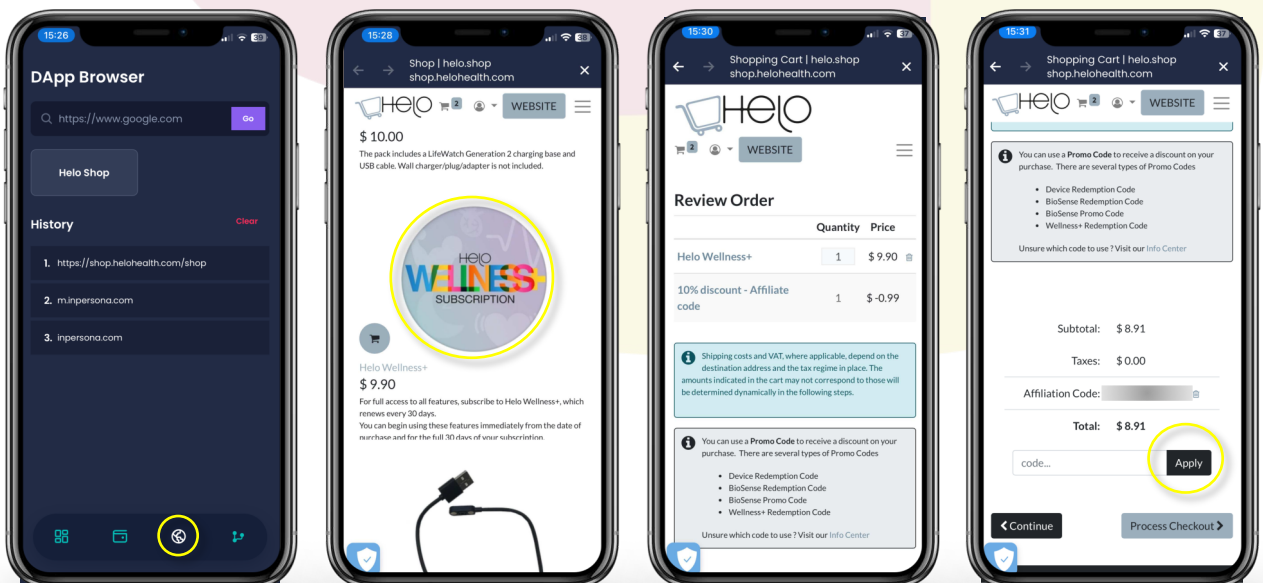

* * HELO OWNERS IMPORTANT STEP PLEASE COMPLETE * *

Included with your Helo device is a **FREE 30 Day Trial** of the **Wellness+** subscription service. This not only unlocks the Advanced Features of your Helo Device **ECG/EKG, BIA, APG, Atrial Fibrillation** and **REM Sleep** but you also have full access to the Artificial Intelligence and Reporting.

In addition by enabling your Helo **Wellness+** subscription you will be generating more **DATA BLOCKS** by default, so it is effectively self funding and this is why we highly recommend you enable and continue with the **Wellness+** subscription.

1. **USE the BROWSER** from within the **inPersona dApp** in order to be automatically allocated your 10% Affiliate discount (The Affiliate code can also be found in your inPersona profile page) and choose the Helo Shop.
2. Scroll down in the Helo Shop until you see the big circle logo of **Wellness+** subscription and click on it.
3. Now in the Review Order section scroll down to where you can add your Voucher Code. The code is contained in the square card found inside your Helo Box (see above picture). Carefully peel back the **GREY STRIP** at the bottom of the card to reveal the voucher code number. Enter the code exactly as it is written and click the Apply button.

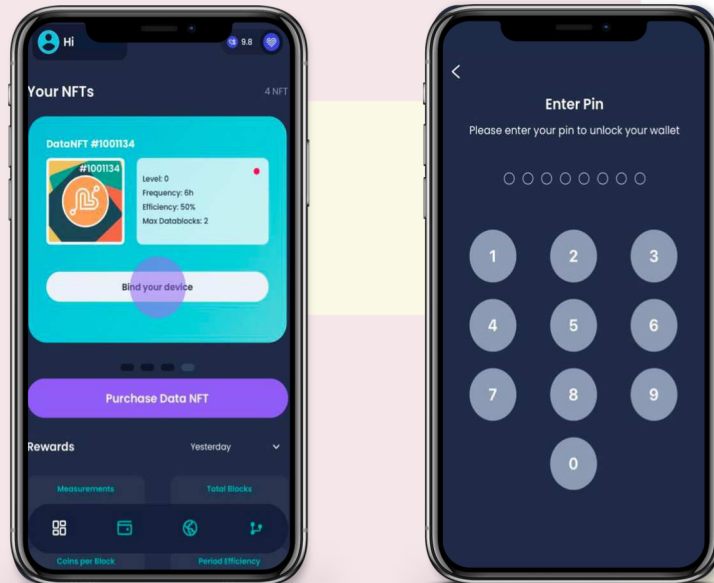

Complete the next section by adding your payment details to enable your recurring subscription to **Wellness+** (\$8.91 every 30 days) after your initial **FREE 30 Day Trial** has finished. Once completed your **Wellness+** subscription should immediately update within the Helo Smart App. If it does not update immediately, fully close and re-open the app to cause it to refresh.

Binding Your APPLE WATCH

1. Open the App > select the **Data NFT** you want to bind > click “**Bind your device**”.
2. Enter your 8 digit Pin Number.

3. Click on the Brand field and select “**Apple Watch**” > click “**Connect to Apple Watch**”.
4. Agree to activate all the requested features.
5. Once successfully bound, the status visible on your Data NFT will be displayed as “**SYNC DATA**”, along with the serial number of your device.

VERY IMPORTANT

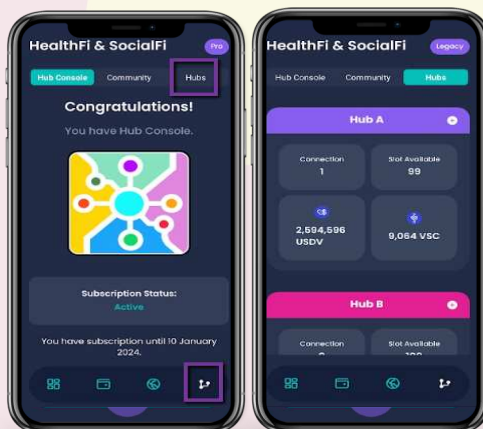

Synchronisation of the health data collected by your Apple Watch with **inPersona PRO** **must be done manually**. Frequently click on the “**SYNC DATA**” button (located under the Data NFT in the Inpersona App homepage) during the day to ensure all your health data is correctly collected.

Sending Invitation Codes and Building Your inPersona Community.

In order to add new connections, you need to generate unique **Invitation Code** for each person from within your Hub Console. Your Hub Console is the system that allows a Data NFT to be connected to the inPersona dApp allowing the user to track their mining, rewards and manage Invitation Codes.

To access your **Hub Console**, navigate to the small share icon to the bottom right of every screen in the inPersona dApp and select Hubs from the top right navigation bar.

To request an Invitation Code, follow these 3 simple steps:

1. Select either **Hub A** or **Hub B**, dependent on where you want to position your new connection, by clicking the small **+ symbol** next to the appropriate hub.
2. Next click **Request New Invitation Code** as in the image below.
3. Click to **copy and paste** or share the newly generated Invitation Code. You will now be able to copy the Invitation Code to a private message or you can share it using your chosen social network by clicking the share button.

The **invitation code** is unique to each person you requested for that **Hub** slot and has no further use after being used. It has an expiry date of **12 months**.

Permenant Invitation Codes

Using Permenant Invitation Codes.

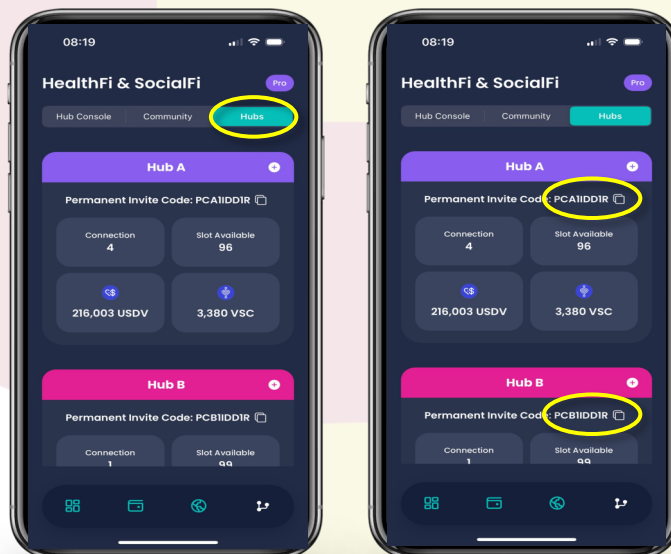

As an alternative to single use Invitation Codes you now also have the option of using **Permanent Invite Codes** for Hub A and Hub B, designed to be easily shared with your new connections.

Unlike one-time use Invitation Codes, Permanent Invitation Codes can be used whenever you need them, without worrying about using them up or creating a unique code for each new connection. All you have to do is just copy and send the permanent code from your Hub Console.

This is particularly useful if you are an online content creator or affiliate marketer who is using direct response marketing to attract new members to the Vyvo Inpersona Project.

In order to access your Permanent Invitation Codes simply open your Hub Console by navigating to the Share Icon displayed on the bottom right of every page of the Inpersona dApp and Select **Hubs** from the 3 Tabs displayed at the top.

You will find your Permanent Invitation Code displayed at the top of both Hub A and Hub B as shown in the image below. Next to each one is a Copy symbol to enable you to easily share your permanent code either individually or as part of your online marketing campaigns.

Using the Seed Feature

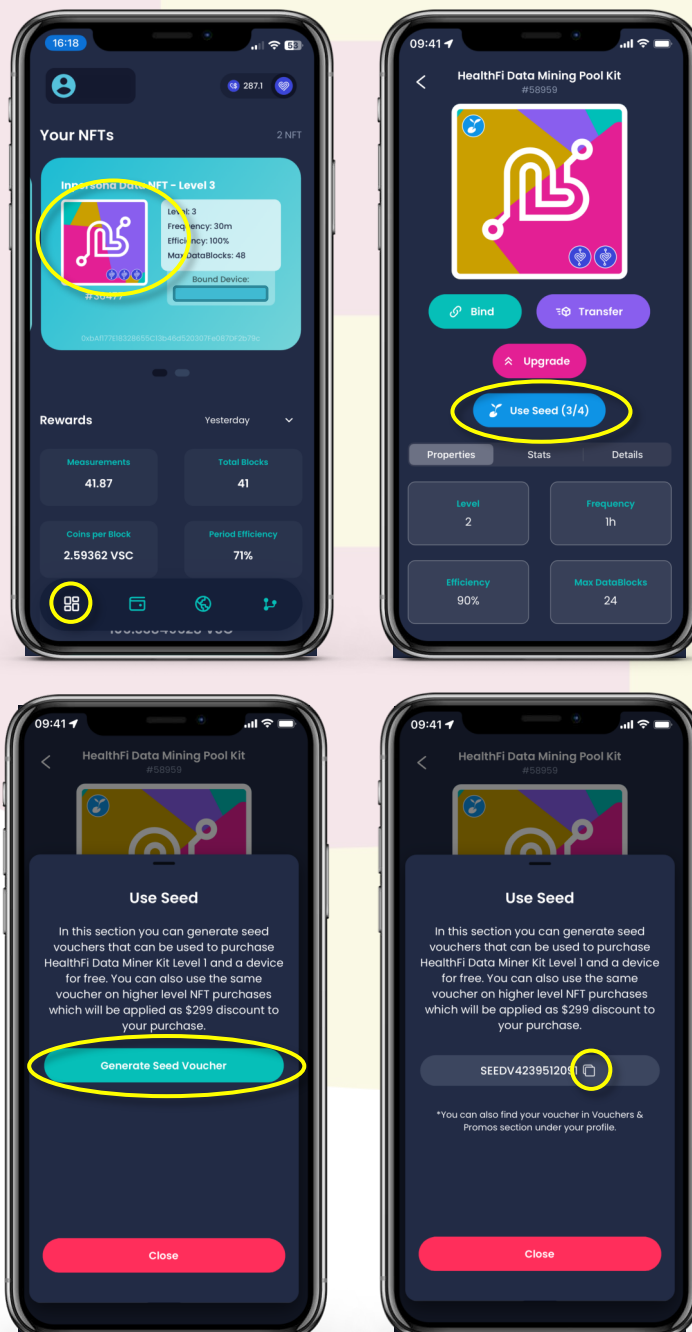

LEGACY - Data Mining Pool Kit Owners Seed Feature

If you wish to activate one of your seed options you first need to get the user to install **inPersona** and use one of your generated Invitation Codes (See Page 14). Please ensure you have sent them a copy of this Setup Guide.

To generate a **Seed Voucher** you simply go to the Home page of your **inPersona** dApp. Tap on your **DATA NFT**, enter your pin and then tap the **blue button** where it says **SEED FEATURE 1/4**.

Next click on the green **Generate Seed Voucher** button this will generate a seed voucher code. Now click the Copy button (two boxes). You can also find Seed Voucher codes generated in your Profile section on Home Page.

Activating ODEE / VYVOPAY

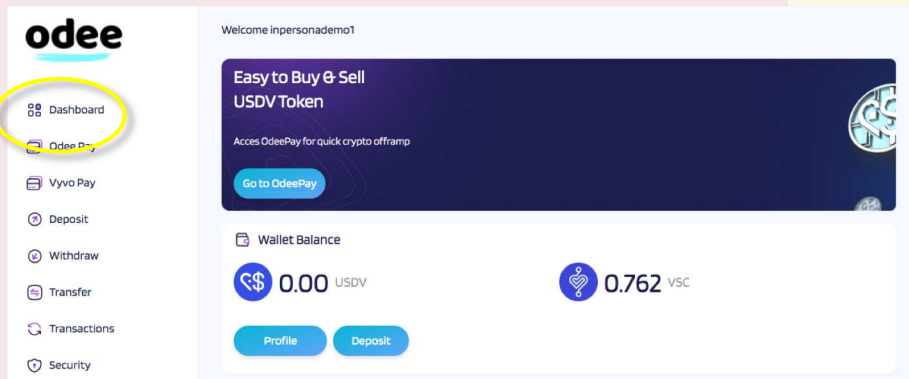

Activating ODEE / VYVOPAY Debit card

The procedure to activate a Debit Card / BioSense Band is the same for **OdeePay** and **VyvoPay** and will require **\$10 USDV**.

Before you can activate your VyvoPay or OdeePay Card you will be directed to complete KYC. KYC is only requested once, and once completed will be valid for both VyvoPay and OdeePay.

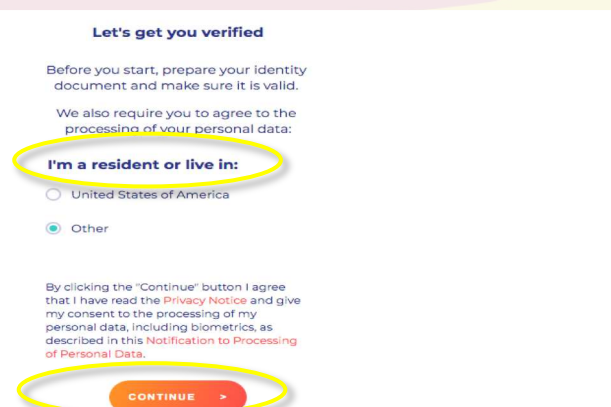

To complete your KYC and activate your card follow the steps below:

Select either **OdeePay** or **VyvoPay** from the left hand menu subject to which Debit Card you wish to activate.

You will immediately be directed to complete the Odee KYC Verification Process

1. Select Country of Residence (USA or other) and click Continue to accept the Privacy Policy and continue with the KYC process.

Activating ODEE / VYVOPAY

2. Submit Your Identity Document by selecting your country of residence and choosing one of the accepted document types:

- Passport.
- Driving license.
- Identity card.

You can now upload your documents images:

- One front.
- One back.

Please make sure they are good quality and intact.

The screenshot displays the Odee web application interface. On the left is a sidebar menu with options: Dashboard, Odee Pay, Vyvo Pay, Bank Details, Deposit, Withdraw, Transfer, Transactions, Security, and Ask for Help. The main content area is titled 'Step 1 IDENTITY DOCUMENT'. It prompts the user to 'Select issuing country' (currently set to Italy) and 'Choose your document type' (with radio buttons for Passport, Driver's license, and ID card). Below this, it instructs the user to 'Take a photo of your passport' and lists requirements: 'bright and clear' and 'all corners of the document should be visible'. There are three small icons representing different document types. A blue arrow points down to the next screen, which shows a preview of the uploaded document (a passport) and a 'Continue on phone' button. At the bottom, there is a 'NEXT' button and the 'sumsub' logo.

Complete KYC Information

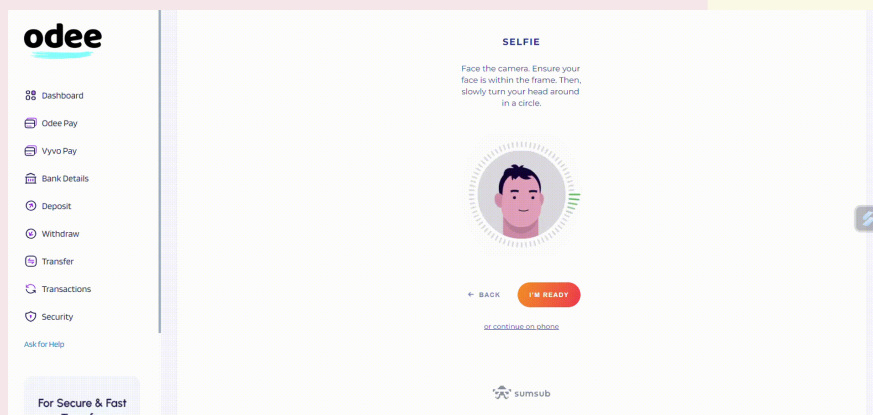

Please note: you can also complete the verification **via smartphone**. If you choose this option, you'll just have to scan on the QR code displayed to transfer the process from your computer to the phone. The whole process will be reflected on the desktop in real time.

5. After the document images upload, you'll be required to take a **"selfie"**. It is a short camera recording of your face in motion. It can be done via either computer webcam or phone camera.

Click on **"I'm ready"** to proceed and follow the instructions displayed on screen:

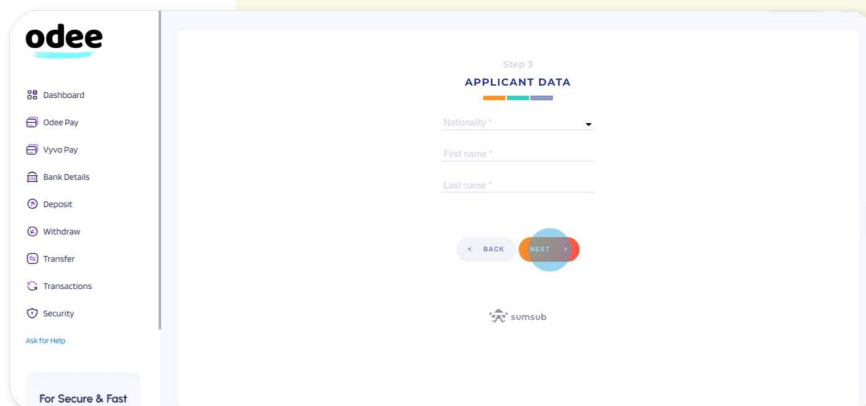

- Look at the camera.
- Ensure your face is fully framed.
- Move your head slowly in a circle.

6. After the selfie, you'll be required to complete the following information:

- **Nationality**
- **First name**
- **Last name**

When done, click the **Next** button.

Complete KYC Information

7. Review the information you have submitted one more time, and if it is all correct, click the **Next** button.

STATUS

CONGRATULATIONS!

Your verification was successful. You have been verified.

sumsub

If successful, your **KYC** status will be displayed in **green** in your Odee Dashboard

Activating ODEE / VYVOPAY

Now that you have completed the KYC process you can continue with the activation of your VyvoPay or Odeedev card by completing the following steps:

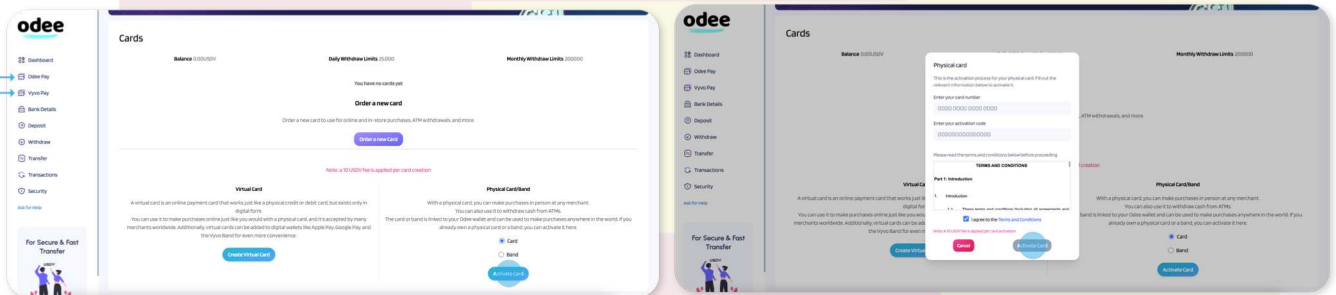

The procedure to activate a Debit Card / BioSense Band is the same for **Odeedev** and **VyvoPay** and will require an available **Odeedev balance** of **\$10 USDV**

If you have not yet started to earn commissions through the Socialfi Program and do not have USDV in your Odeedev Wallet you can deposit using Fiat currency before starting the activation process.

Simply select **Deposit** from the left hand menu and then choose **Deposit with Fiat** at the top of the page. You can then deposit \$10 **USDV**, by choosing one the payment processors available in your country.

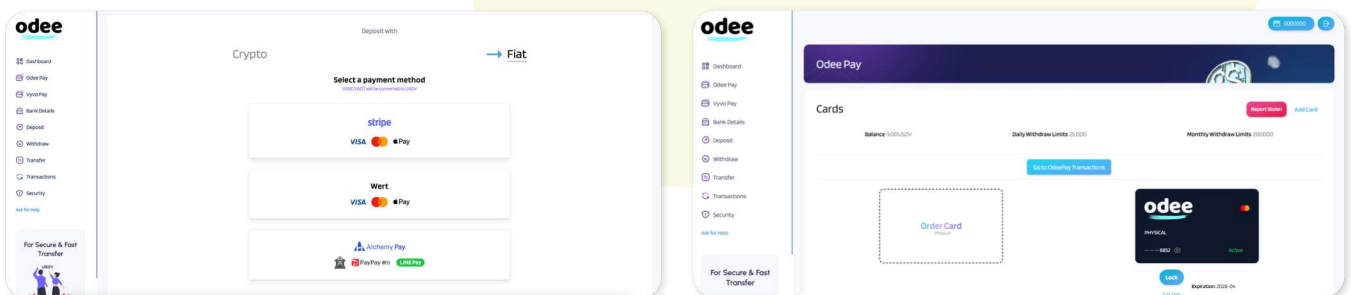

To complete the activation of your card follow the steps below:

1. Select either **Odeedev** or **VyvoPay** from the left hand menu subject to which Debit Card you wish to activate.

3. Enter your **card number** and **activation code** in the correct fields. **Both** numbers are printed on the card. Agree to the Terms and Conditions.

4. After these steps, your card will be displayed as active in the **Odeedev** or **VyvoPay** page.

Raising Card Limits

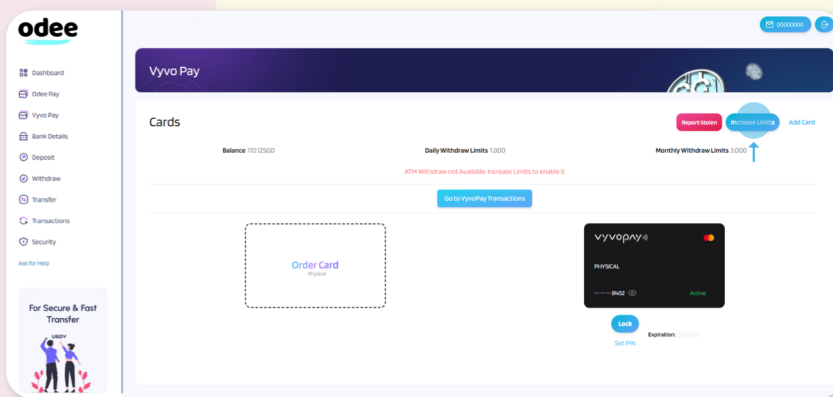

Raising limits for ODEE / VYVOPAY Debit card allowing ATM withdrawal and higher daily limits.

To unlock all the limitations of your card / band, it is required to complete your **KYC profile** verification by submitting a **proof of address**.

The procedure is the same for both OdeePay or VyvoPay.

1. Go on the **OdeePay or VyvoPay** page. On the top right side of the screen, click on the "Increase limits" button.

2. Submit a proof of address, making sure it meets the following requirements: The document must be no older than **3 months** by the moment of submission and it can be:

- **Bank Statement.**
- **Bills** (energy, TV, Wi-fi, telephone).
- **Tax declarations.**
- **Municipal property tax.**
- **Proof of residence.**
- **ID** that contains your full address not used in KYC process.

Documents not accepted:

- **Screenshots.**
- **Cell phone bills.**
- **Hospital bills.**
- **Purchase invoices.**
- **Insurance statements.**

Please note: you can also complete the verification **via smartphone**. If you choose this option, you'll just have to scan on the QR code displayed to transfer the process from your computer to the phone. The whole process will be reflected on the desktop in real time.

Raising Card Limits

3. Review the data submitted for the last time, then, if all correct, click the **Next** button.

The screenshot shows the Odeee app interface. On the left is a sidebar menu with options: Dashboard, Odeee Pay, Vyvo Pay, Bank Details, Deposit, Withdraw, Transfer, Transactions, Security, and Ask for Help. The main screen displays a progress bar at the top with four steps: Identity document (checked), Selfie (checked), Proof of residence (current step, highlighted in orange), and Applicant data (unchecked). Below the progress bar, a white box contains the text 'Please check the information below to make sure everything is correct.' followed by 'APPLICANT DATA' with an 'Edit' link. The applicant data fields are: First name, Last name, and Nationality. Below this is the 'IDENTITY DOCUMENTS' section, showing: Passport — verified, Selfie — verified, and Proof of residence — with an 'Edit' link. At the bottom of the white box are two buttons: 'BACK' and 'NEXT'. The Odeee logo is in the top left, and the sumsub logo is at the bottom center.

4. Once every step is completed and the documents correctly submitted, depending on the evaluation, your request will be instantly accepted or rejected.

The screenshot shows the Odeee app interface after successful verification. The sidebar menu is the same as in the previous screenshot. The main screen is titled 'Cards' and shows a progress bar with all four steps checked: Identity document, Selfie, Proof of residence, and Applicant data. In the center, there is a large blue circle with a white checkmark, followed by the text 'CONGRATULATIONS!' and 'Your verification was successful. You have been verified.' The Odeee logo is in the top left, and the sumsub logo is at the bottom center.

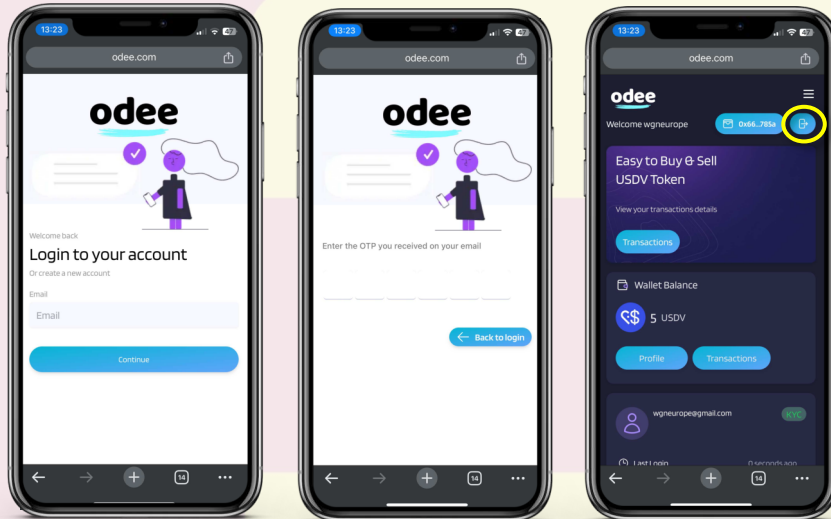

Withdraw to VyvoPay Card

Once you start to earn **USDV** commissions through the Socialfi Program you can easily make transfers from your Odee Wallet to your VyvoPay card in order to access your funds via ATM, online or at Point of Sale in store

Log into your **odee** account on your mobile device and follow the steps below:

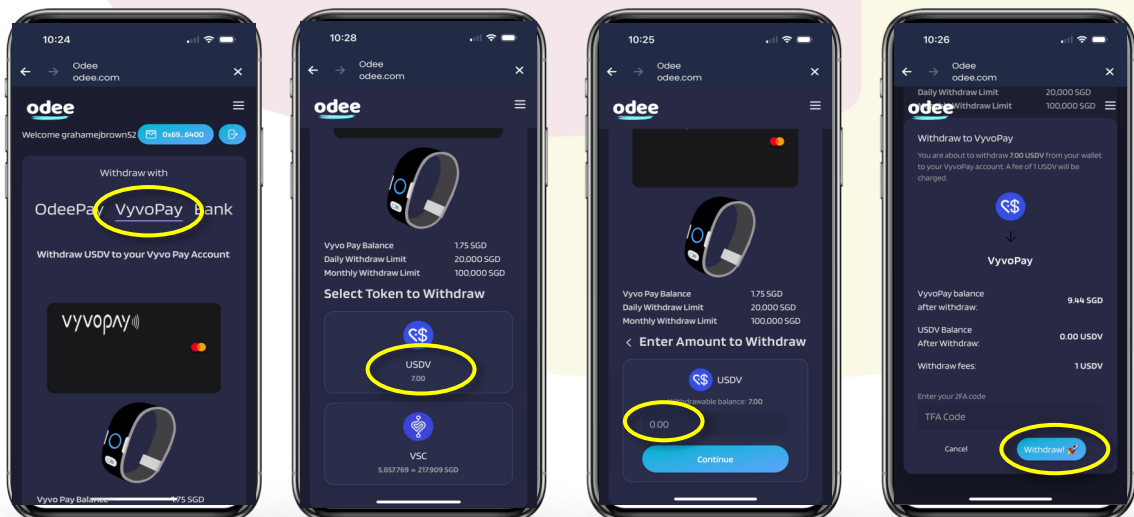

1. Select dropdown Menu by clicking on the **3 Lines** at top right.

2. Select **withdraw** from the menu.

3. On the next screen, make sure you select **VyvoPay** and then USDV as the token that you wish to withdraw. On the next screen enter the amount that you wish to withdraw to your **VyvoPay card** account and click **continue**.

4. On the final screen check the summary, enter your TFA code and click Withdraw to complete the process. If you have not set up your TFA please complete by following the on screen instructions when prompted to do so.

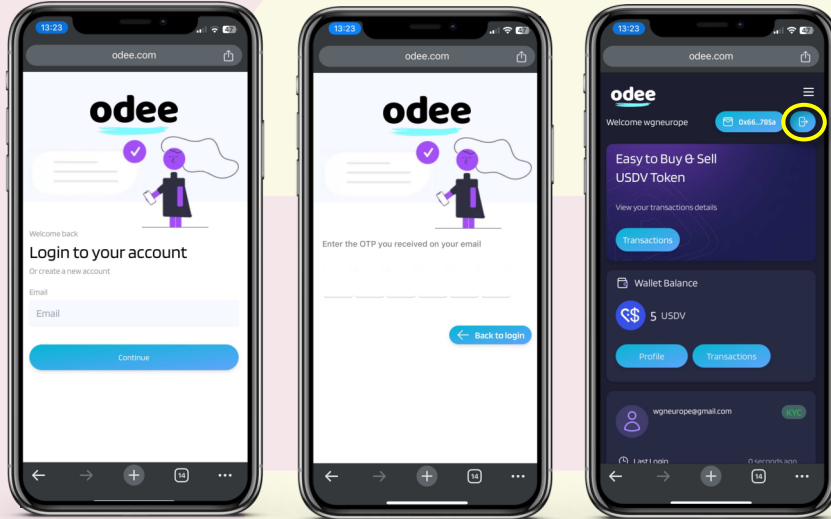

Withdraw to Odeepay Card

Once you start to earn **USDV** commissions through the Socialfi Program you can easily make transfers from your Odee Wallet to your OdeePay card in order to access your funds via ATM, online or at Point of Sale in store

Log into your **odee** account on your mobile device and follow the steps below:

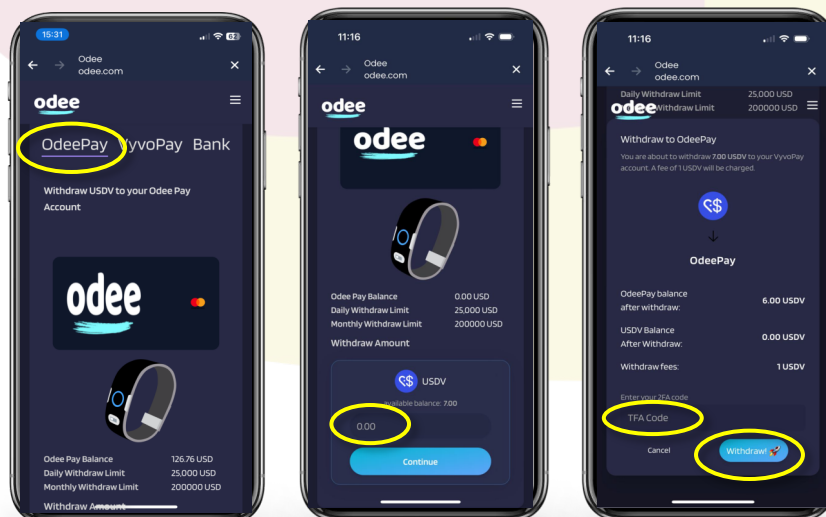

1. Select dropdown Menu by clicking on the **3 Lines** at top right.

2. Select **withdraw** from the menu.

3. On the next screen, make sure you select **OdeePay** and scroll down to enter the amount that you wish to withdraw to your **OdeePay** card and click **continue**.

4. On the final screen check the summary, enter your TFA code and click Withdraw to complete the process. If you have not set up your TFA please complete by following the on screen instructions when prompted to do so.

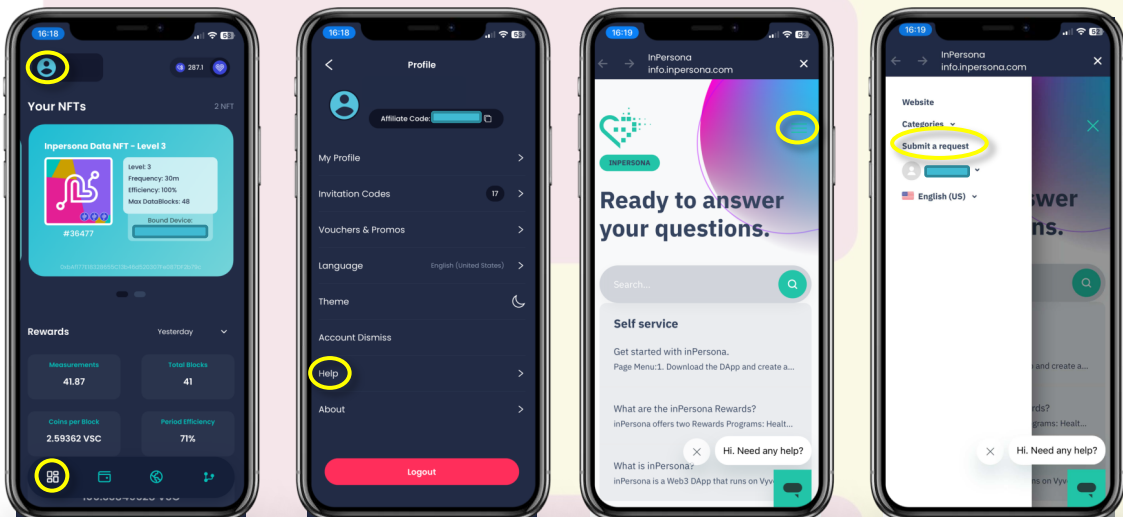

Contacting Inpersona Support

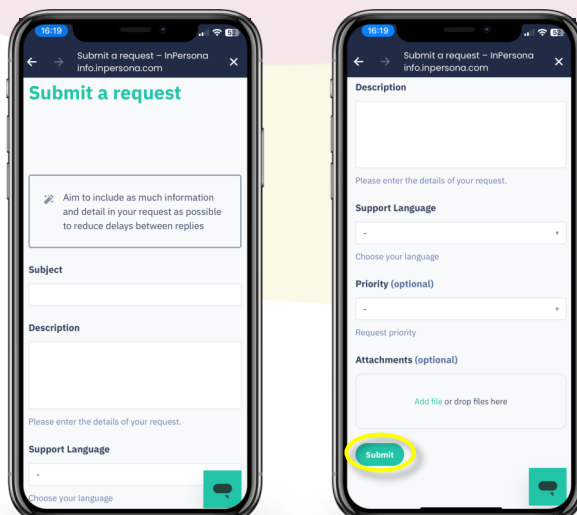

If you require additional assistance or need to report a problem you can easily raise a **support ticket** from inside the **inPersona** dApp or by visiting info.helo.com

1. Open **inPersona** and select the **Home Page** by clicking the first option on the navigation bar at bottom and then click on your profile **Top Right**.
2. In your Profile section click on the **Help** option.
3. Click the **Menu tab 3 Lines** at top right (Note: very faint to see)
4. Select **Submit a request** from the dropdown menu.

5. Write the details of your query completing all sections of the **submit a request** form and click on the **Submit** button. You can check back here for replies to your query but you will also receive updates to your registered email address.

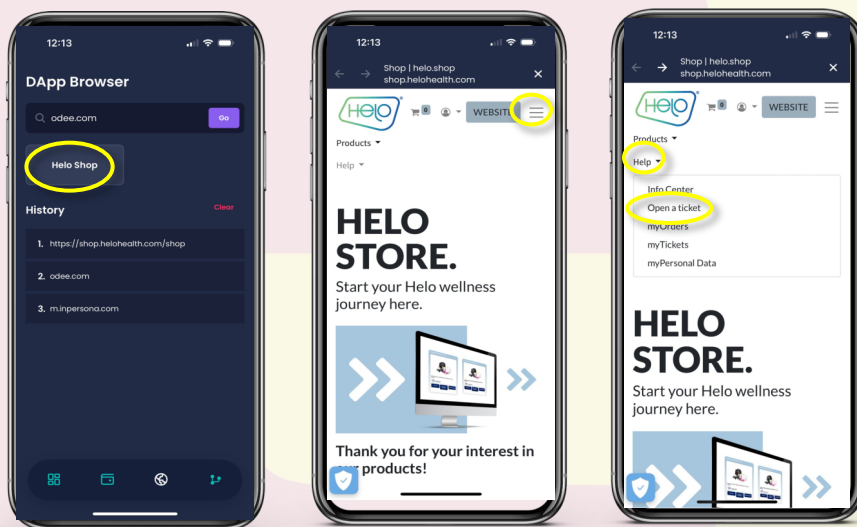

Contacting Helo Support

If you require additional assistance or need to report a problem with your Helo you can easily raise a **support ticket** by navigating to the Helo Shop from the web browser in your inPersona dApp.

1. Once inside the Helo Shop, Firstly ensure that you are signed into your Helo Account then click on the 3 horizontal bars on the top right of the screen to open the main menu.
2. Click Help and then Open Ticket
3. Next choose your language

5. On the next screen write the details of your query completing all sections of the support ticket form and click on the **Submit** button. You can check back here for replies to your query but you will also receive updates to your registered email address.
