

Ron Charles Tomblin Tomblin Investigations, Inc 320 S. Madison Ave. STE 302 Monroe, GA 30655 678.863.8002 ron@tomblininv.com

Overview

Mr. Tomblin is the owner and founder of Tomblin Investigations. He is a dedicated, crash research, mechanics of injury and public safety professional with extensive experience in law enforcement and crash reconstruction. Sharing his extensive knowledge through motivational communication and presentation skills, Mr. Tomblin is an industry leader with a firm but fair attitude and a reputation for honesty, integrity, and loyalty.

Knowledge of crash investigation, traffic safety, mechanics of injury and education include:

Extensive law enforcement experience
Court Qualified Expert in Accident Reconstruction
Vehicle safety systems
Vehicle dynamics
Crash Data Retrieval System trainer/mentor
Court Qualified Expert in Event Data Recorders

Court Qualified Expert in Human Factors
Forensic Diagraming Experience
Incident Command System
Adult Teaching Experience
AIS Coding experience and training
Emergency Medical Technician

Accomplishments

Medal of Valor June 2007

On 06-14-2007 I responded to a person down call and removed a male from standing water during a Severe Thunderstorm. C.P.R was performed until medical Personnel arrived.

Deputy of the Month June 2004

Responded to a call where a female had been injured. Through investigative procedures it was determined that the people involved had committed a burglary a short time earlier. The injuries were a result of the perpetrators fighting over the stolen items.

Speed Detection/ Apprehension Award; Nominated for Deputy of the Month; December 2007 & June 2006 December 2005

Multiple convictions for vehicular homicide and other crash related charges

Specialized Training

Instructional and Presentation Experience

Crash Scene and Vehicle Photography, Medical College of Wisconsin CIREN Center

08/2023

This course was an instructional block designed for law enforcement officers tasked with photographing crash scenes and vehicles. This course identified specific elements of a vehicle that needs to be photographed to document occupant kinematics and elements to assist the successful prosecution of a crash.

Basic Occupant Kinematics for the Traffic Crash Investigator, Medical College of Wisconsin CIREN Center 10/2023

This course was a block of instruction that was designed for law enforcement officers whose job responsibilities include investigation and reconstruction of traffic crashes. This course introduced the officer to the basics of occupant movements within a vehicle during a crash sequence.

Biomechanics of injuries for automobile crashes, Medical College of Wisconsin CIREN Center 11/2013

This course was a block of instruction that was designed for law enforcement officers whose job responsibilities include investigation and reconstruction of traffic crashes. This course is a continuation of the Basic Occupant Kinematics for the Traffic Crash Investigator course. The objective of this course is to give the officer a basic understanding of the forces required to produce certain fractures. After understanding how fractures occur, the officer can apply this knowledge to creating a path of travel of the occupant within the motor vehicle during the crash sequence.

Mechanics of injury in automobile crashes and air bag safety for first responders, Medical College of Wisconsin CIREN Center

08/2014

This course was a block of instruction that was designed for first responders whose job responsibilities include initial response, pre-hospital medical care and extrication. This course was designed to give first responders an idea of mechanics of injury by looking at the damage pattern of a vehicle. This course also discussed the safety measures that need to be taken when encountering newer generations of supplemental restraint systems.

Mechanics of injury in automobile crashes and proper use of the Wisconsin Trauma Field Triage Guideline, Medical College of Wisconsin CIREN Center 08/2015

This course was a block of instruction that was designed for first responders whose job responsibilities include initial response, pre-hospital medical care and extrication. This course was designed to give first responders an idea of mechanics of injury by looking at the damage pattern of a vehicle. This course also discussed the proper field triage of patient as discussed in the field triage guidelines that were developed by the Wisconsin Department of Human Services, Emergency Medical Service Division.

Basic Crash Investigation, Medical College of Wisconsin CIREN Center

02/2016

This course was a block of instruction that was designed for law enforcement officers whose job responsibilities include investigation and reconstruction of traffic crashes. This accident investigation course stresses evidence recognition, interpretation, and collection procedures. This course gives officers direction in serious traffic accidents and provides determination of how the accident occurred. This course gives officers the skills to collect and interpret the results of the accident and the knowledge to establish vehicle speeds, vehicle to roadway and vehicle to vehicle relationships. This course also introduces students to traffic accident reconstruction principles that will help them establish these facts from certain kinds of skid mark evidence.

Professional Experience

08/2020--Present Tomblin Investigations Inc. Monroe, GA

President, Senior Crash Reconstructionist

Provide expert witness services, consulting, courtroom expertise, and collision reconstruction for attorneys and insurance companies.

08/2017— 10/2023 Emory University Atlanta, GA Crash Investigator, Lead

Research and Investigate crashes that occur in the covered area that meet a set research guideline. I also reconstruct the crash and provide a detailed report to my team and National Highway Transportation Administration of my findings. Instruction of local groups on selected topics and making public presentations is also part of my position

Medical College of Wisconsin Milwaukee, Wi Crash Reconstructionist 05/2013—07/2016

Research and Investigate crashes that occur that in the covered area that meet a set research guideline. I also reconstruct the crash and provide a detailed report to my team and National Highway Transportation Administration of my findings. Instruction of local groups on selected topics and make public presentations is also part of my position. I also assisted with crash lab crash testing

Forsyth Co. Sheriffs Office Cumming, GA Corporal, Traffic Enforcement Unit 04/2004—05/2013 I was assigned as a team leader within the newly implemented Traffic Enforcement Unit. Prior I was assigned to the Traffic Specialist Unit where my responsibilities were to reconstruction of fatal and serious Traffic Crash. I was also assigned to the Uniform Patrol Division where I served as Patrol Officer and a fill in supervisor. I was then assigned to the Special Operations Division as a School Resource Officer. While there, I was assigned to a High School, my duties included security of the school, instructing classes, public speaking and interaction with administration, parents and students about confidential and security issues. I also assisted with planning and implementation of the security plan and conducted checks of the grounds to make sure that the plan was being followed. I was also assigned to the Court Security Division; my duties included protection of court officials, courtroom security and inmate security

Education

08/2013 — 08/2015 Reinhardt University Waleska, Ga

Bachelor of Criminal Justice

08/1999—06/2012 Abraham Baldwin College Tifton, GA

Associate of Science in Criminal Justice Degree

6/1999 Pickens County High School Jasper, GA

Certifications

- Expert in Traffic Crash Reconstruction (Superior Court) Certification
- Georgia Certified Peace Officer
- Field Training Officer
- Radar Operator
- Gang Investigator
- Laser Operator
- Crime Scene Processing
- P.R.I.D.E Instructor
- Advanced Emergency Medical Technician (State of Georgia and National Registry of Emergency Medical Technicians)
- Crash Data System Recovery Trainer Mentor
- Commercial Vehicle Inspection and Crash Investigation
- Pedestrian/ Bicycle Crash Investigation and Reconstruction
- Crash Zone Reconstruction/Forensic Mapping Software
- Forensic Mapping with a Total Station.
- Virtual Crash Simulation Software
- Expert in Human Factors
- Event Data Recorders

Professional Societies

- National Association of Professional Accident Reconstruction Specialists (NAPARS)
- CDR Users Group
- Crash Hub

Expert Deposition Testimony

US District Court for the Northern District of Georgia Plaintiff Sabrina Head ET EL vs Trash Trucking LLC

Attorney: Adewale Adetunde

Hall County Superior Court 2023
