

SUPPLEMENTS

to support your hormones

Alpha Base

Alpha Base is a comprehensive, hypo-allergenic, multivitamin and mineral blend. As a complete multivitamin, Alpha Base provides high-quality nutrients to build a healthy micronutrient reserve and supplies the essential nutrients for healthy thyroid hormone balance

Ortho Digestzyme

Ortho Digestzyme is a comprehensive blend of enzymes used to support healthy digestion and maximize nutrient absorption. Because hormone balance starts in the gut, this helps with the foundation to proper hormone balance.

Fiber Formula

Fiber Formula contains fibers and herbs to adsorb and eliminate toxins and improve colon function. The fiber provided will help activate estrogen.

N-Acetyl Cysteine

N-acetyl cysteine (NAC) is an amino acid that boosts antioxidant function and is a source of the conditionally essential amino acid L-cysteine. It raises glutathione levels, an antioxidant used in many different metabolic processes within the body. The balance of the Reset's 7 hormones will help heal your metabolism and NAC is essential to that process.
