Alexandre Ferreira

I am passionate about technology and the entire programming ecosystem, as a hobby learning cloud,devOps and backend(nodejs). I am always trying to improve myself by reading and creating little projects to understand the new possibilities that technology provide us to solve any daily problems, and always looking for ways to solve any problem with a smart approach.

Work experience

Software Engineer   Nov 2021 - Sep 2022
Jumia, Casa da Musica/Porto

My functions inside the company were to maintain authentication flow working between all products that jumia has like pay,food and others, and finally develop new features for instance to be able to personalize their info, 2FA and others.

Tech Lead   Sep 2019 - Nov 2021
Contele, Santos/São Paulo

My functions inside the company were to handle infrastructure AWS and/or GCP. It may be IAM Keys rotations, security, kubernetes and other services inside the both clouds, besides that I help to create projects from the beginning talking with other areas inside the company to discuss deadlines,tasks,goals and features.

Full Stack Developer   Jan 2017 - Oct 2019
ModalGR, Santos/São Paulo

My function was to build and implement custom software solutions for its clients and provide comprehensive software and make analyzes to ensure that was bug-free for every software product we delivery.

Junior Software Engineer   Jan 2012 - Dec 2016
Flextech, São Bernado/São Paulo

My function inside the company was to create features and help with the projects that we discuss between areas and fully integrate with the Siemens products and help with database management and maintain.

Education and Qualifications

Bachelor Computer Science   Jan 2013 - Dec 2017
University Santa Cecília, Santos/São Paulo

Exceptional university where it has a strong faculty. Teachers always seek to bring current topics and technologies to the classroom.
