

# Missing Keys R2

## Supported Layouts:

- 60%
  - ISO-DE / ISO-UK
    - Use modern bottom row with 6.25u space from set for modern bottom row with ALT Gr or use source board's bottom row with 1u super for Tsangan
    - Use Icon mod 1.75 right shift + fn if needed
    - All other keys from source board
  - ANSI
    - Same as above
    - Except:
      - Use 2<sup>nd</sup> 1.25u ALT key instead of ALT Gr for modern bottom row
      - Use 1.75u text+icon short shift to match your other text+icon mods
- 65%/75%
  - ISO-DE / ISO-UK
    - Use 1.75u short shift
    - Use PgUp / PgDn from set and add Home / End from source board to complete 65% column right of enter key. You could also use Del from source board and Cherry key to complete 65% column
  - ANSI
    - Same as above except use 1.75u text+icon short shift to match your mods
- TKL
  - ISO-DE / ISO-UK
    - Use modern bottom row from set or 1u super key for Tsangan bottom row
    - Use 1.75u short right shift+fn if needed
  - ANSI
    - Same as above except use 1.75u text+icon short shift to match your mods

- HHKB
  - ISO-DE
    - Use R3 Control from set
    - Use ANSI left shift
    - Use 1.75u short shift + fn from set
    - Use R2 Backspace from set
    - Use R1 ['#] from set
  - ISO-UK
    - Same as above except R1 [~#] instead of R1 ['#]
  - ANSI
    - Use R3 Control, 1.75u text+icon short shift+fn, R2 Backspace, R1 [|\] from set
- ANSI
  - ISO-DE
    - Use left shift, modern bottom row, R3 "ANSI" Enter, R2 ['#] from set
  - ISO-UK
    - Same as above except R2 [~#] instead of R2 ['#]
  - ANSI
    - Use modern bottom row from set

## Prerequisite / Source Boards

G80-3000 ISO-DE (WKL, R5 bottom row, 7u Spacebar, OG Icon Mods)

G80-3000 ISO-UK (WKL, R5 bottom row, 7u Spacebar, OG Icon Mods)

G80-3000 ANSI (WKL, R5 bottom row, 7u Spacebar, Text+Icon Mods)

FAQ:

Why did you drop 1800 support from Missing Keys R1?

- 1800 support was far from complete but bloated the set with quite a lot of keys.

Why did you get rid of that R3 Fn key from Missing Keys R1?

- This key was only beneficial to certain 40% boards like the Equinox and will not enable you being able to cover a full 40% board. For both reasons, it will not be part of this set.

Why do you not include at least key xyz from a certain layout as opposed to all keys for that layout?

- I made the decision to only support layouts in full or not support them at all.

But I really need layout xyz what can I do?

- Buy 9009 basekit for 99 USD.

Can you please include a full 7u spacebar R5 bottom row because my board only has an R4 bottom row?

- No, sorry. This would make the kit more expensive for everyone else.

Can you please include a stepped Caps, my keyboard only has a text mod in that position?

- No sorry. We don't include keys in the set that are on the actual source board, only "missing keys".

Can you please include more redundant keys / mods than actually required because they could have got lost from old keyboards.

- No sorry, it is your responsibility to have a complete board. This is a pretty random request and it would make the set expensive for others.

Why is there no ANSI pipe anymore?

- This key in ISO represents the "pipe" key in ANSI (green Arrow). In case of the ISO-DE board, this key is [#'] in case of the ISO-UK board, this key is [#~]. In case of the ANSI board, this key already exists on the sourceboard. This there is no case where the ANSI pipe key is required to be part of this set.
