**What is Nature
Masterclasses
On-demand?**

What is Nature Masterclasses On-demand?

Nature Masterclasses On-demand is an online training program for researchers, aimed at improving research skills and supporting career development.

- All faculty and students at a subscribing institution have access to Nature Masterclasses On-demand.
- Remote access is available.

What is Nature Masterclasses On-demand?

Expert training

High-quality courses drawing on the expertise of ***Nature Portfolio*** journal Editors and leading international experts from academia and industry

Designed for busy researchers

To accommodate researchers' busy schedule, our training is **self-paced**, bite-sized and in a **dip in and out** format, so they don't have to study the course in one go

Tailored to researchers

Our courses are designed and developed using a **data-driven** approach to understand and fulfill researchers' specific needs

Contributors to course development

Magdalena Skipper

Editor in Chief, *Nature* and
Chief Editorial Advisor,
Nature Portfolio

W. John Kao

Chair Professor of
Translational Medical
Engineering, The
University of Hong Kong

David Rueda

Professor and Chair of
Molecular and Cellular
Medicine, Imperial
College London

Paola Quattroni

Alliance Delivery
Manager, Health Data
Research UK

Helen Pearson

Chief Magazine Editor,
Nature, Springer Nature

Peter Gorsuch

Chief Editor and Product
Manager, *Nature*
Research Editing Service,
Springer Nature

Available courses

The courses support researchers across the whole research life cycle.

For details on each course, please refer to the separate document “Nature Masterclasses On-demand courses.”

Available courses

Number of modules and learning time

	Course	Number of modules	Learning time
Design Research	Experiments: From Idea to Design	4	8.5
Secure Funding	Finding Funding Opportunities	1	3.5
	Persuasive Grant Writing	3	7.5
Experiment and Analyse	Data Analysis: Planning and Preparing	2	4.0
	Data Analysis: Conducting and Troubleshooting	3	5.0
	Interpreting Scientific Results	1	3.5
	Managing Research Data	4	10.0
Write and Publish	Research Integrity: Publication Ethics	3	8.0
	Choosing the Best Journal for Your Paper	3	4.0
	Writing a Research Paper: 2nd Edition	5	14.5
	Publishing a Research Paper: 2nd Edition	3	6.0
	Writing and Publishing a Review Paper: 2nd Edition	17*	4.0
	Focus on Peer Review	4	3.5
Share and Disseminate	Advancing Your Scientific Presentations	4	10.0
	Creating Successful Research Posters	1	4.5
	Effective Science Communication	1	6.5
	Maximising the Impact of your Paper	8*	1.5
	Narrative Tools for Researchers	3	8.5
Develop your Career	Building a Strong Online Researcher Profile	5*	1.0
	Getting an Academic Research Position	4	9.5
Work with Others	Networking for Researchers	4	8.0
	Introduction to Collaboration	1	2.5
	Participating in a Collaboration	1	5.0
	Leading a Collaboration	3	11.5

How to Access the Courses

Registering for the first time

The first time you register, make sure you are connected to your institution's network and are within the registered IP range. If you are off-campus, make sure you are connected to your institution's network remotely via VPN.

1. Visit <https://masterclasses.nature.com/catalogue>
2. Select [Register]

After registration, the website will remember your institutional IP address and it will enable you to access the course with any internet connection for 6 months. If you have been off campus for over 6 months after your initial registration, you will need to log in from your institution's network to refresh your connection.

How to register

3. Click “Your institution” and select your institution from the drop-down menu
4. Enter your password twice
5. Enter your email address
6. Complete the profile with your personal information

Registration

Please type only in English and Latin characters as this form is unable to accept other character types.

Exploring your data and reviewing your analysis plan

80% COMPLETE

- Introduction ☒
- Explore your data numerically ☒
- Explore your data visually ☒
- Review your data analysis options and your plan ☒
- Module summary ☐

Portfolio activity

Note down your research question and pick the variables you need to answer it, then reflect on the following questions.

- What types of variables are they?
- What kind of visualisations could you use to explore relationships between them?
- Is there a response variable?
- Are there confounding variables?
- How does each variable contribute to the analysis?

Add the answers to these questions to your data analysis plan (if you are creating one) as you work through the course. If you are amending an existing plan, be sure to follow the best practices outlined in this lesson, and document any changes.

To record your thoughts, you can use the individual downloadable document that accompanies this activity or the collated portfolio document you might have downloaded in the "Introduction" lesson.

About this course

'Advancing Your Scientific Presentations' teaches you how to create more memorable and engaging presentations to your scientific peers. In the course, you will discover how you can develop your research story - the foundation of your presentation - using narrative tools, how to build a slide deck that supports and enhances your presentation, and how to prepare to deliver your presentation on the day.
