

NDC Communications, LLC

Capabilities Statement

Introduction:

NDC Communications, established in 2003, is a communications construction company specializing in a variety of tower applications for the major cell/wireless providers. We operate from a large warehouse/manufacturing facility in Brewer, Maine and a 15,000 square foot fleet service facility in Etna, Maine. Our strengths include an obvious commitment to quality and excellence in work performance and finishes, a very high customer service satisfaction reputation, and our continued matriculation as a “one-stop-shop” for all wireless construction needs.

Core Competencies:

NDC Communications is fully experienced in land clearing, road installations, site preparation, foundation and grounding constructs, shelter fabrication and setting, grounding, assembly of guyed towers, self-supporters, monopoles/flagpoles, rooftop and integrated towers. Our expert team also performs all lines, antenna and light installations, RF implementations, SWEEP and PIM testing, as well as fiber and HVAC installation and maintenance.

Past Performance and Differentiators:

NDC Communications has performed wireless construction projects from the Maine-Canadian border to the BaWa market in Washington D.C. and in a couple of states outside of the northeast region. We have served the major Telco’s (Verizon, AT&T, US Cellular, T-Mobile, Sprint, etc.) as well as many communications management companies. Our sites include commercially competitive locations and governmental “border control” sites. NDC stands out among competitors due to our efficiencies, timely build-outs, attention to detail, our extremely experienced division leaders and our absolute commitment to customer satisfaction.
