Summary:
The crew arrived with the Otter today in Thomasville, GA. This will be the base of operations for the collection of the Jones site. During the transit, both yesterday and today, we were flying in mostly IFR conditions requiring the system to be shut down. The system will need to be cooled and vacuum pressure achieved again before flights can resume.

Issues/Concerns:
- Continuing to start camera manually due to ongoing banding issue.

Comments:
- The system is currently cooling and on the vacuum pump. The system is expected to be back in tolerance sometime late tomorrow. The next couple of days’ weather forecasts do not look favorable, so it is not expected that we will lose any good collection days.
- Mitch set up GPS1 at the FBO (KTVI)
