Summary
The crew left Salt Lake City early this morning trying to beat some weather as they transited to D11. One fuel stop was made in Farmington NM and the otter was able to make it the rest of the way to Wichita Falls TX.

Concerns
- The air conditioner that cools the interior of the cabin on the ground that was found to have oil leaking from it yesterday is nonfunctional today. A replacement was ordered and will arrive in a couple of days. The crew will keep a close eye on the temps inside the plane in the interim.
- The pilots have noted a discrepancy in the fuel quantity of the 2 main tanks from the fuel quantity gauges to the levels when manually using a dip stick on the tanks. This does not seem to pose a safety risk at this time, but it does impact the calculations of how long the plane can stay in the air on a flight. The pilots will be coordinating with TOIL for some guidance.

Comments
- Mike departed the crew in Salt Lake City and Matt joined in Wichita Falls.
- Pilot Will Departs the crew this evening and has been replaced by Paul.
