Summary
With a decent forecast and good looks in the tower cam the crew took off to try to collect in “green” at the DEJU site. On the transit flight to the site the crew observed thick haze and a building cloud layer that pushed the site beyond the “green” sky conditions threshold. No collections were made, and the crew returned to Fairbanks.

Concerns
-Our hangar GPU is only partially functional, and a replacement will be needed. We are currently using one from the FBO.
- The waveform recorded has frozen up on several flights, and the crew is monitoring the situation.
