

EU Waste Electrical and Electronic Equipment (WEEE) Directive In August of 2005, the European Union (EU) implemented the EU WEEE Directive 2002/96/EC and later the WEEE Recast Directive 2012/19/EU requiring Producers of electronic and electrical equipment (EEE) to manage and finance the collection, reuse, recycling and to appropriately treat WEEE that the Producer places on the EU market after August 13, 2005. The goal of this directive is to minimize the volume of electrical and electronic waste disposal and to encourage re-use and recycling at the end of life. Nicolaudie Group has met its national obligations to the EU WEEE Directive by registering in those countries to which Nicolaudie Group is an importer. Nicolaudie Group has also elected to join WEEE Compliance Schemes in some countries to help manage customer returns at end-of-life. If you have purchased Nicolaudie Group-branded electrical or electronic products in the EU and are intending to discard these products at the end of their useful life, please do not dispose of them with your other household or municipal waste. Nicolaudie Group has labeled its branded electronic products with the WEEE Symbol to alert our customers that products bearing this label should not be disposed of in a landfill or with municipal or household waste in the EU. Instead, please be aware that Nicolaudie Group is making a return and collection system available to you, free of transportation and recycling costs, for discarding these products.
