## next generation DMX lighting software for PC and Mac

Take your light show to a whole new level with the brand new DMX lighting software package from Daslight.

With over 15,000 lighting fixtures, a new timeline, live mixer and iPhone/iPad/Android control - Daslight 5 lets you create bigger and better light shows easier than ever before.
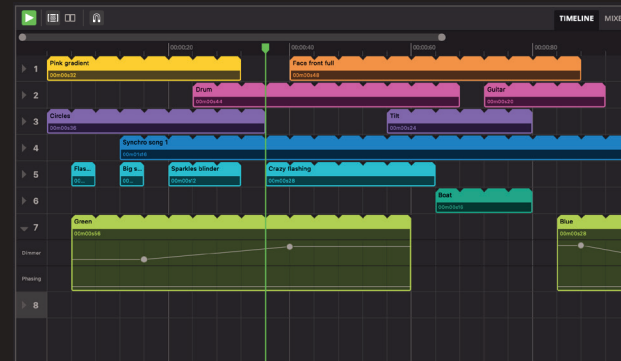

patch

Choose from over **15,000 lighting fixtures**. Map out lights according to your venue and easily arrange into lines, circles and matrices. Lights can be focused where you want them to be with the **fixture limits** tool.
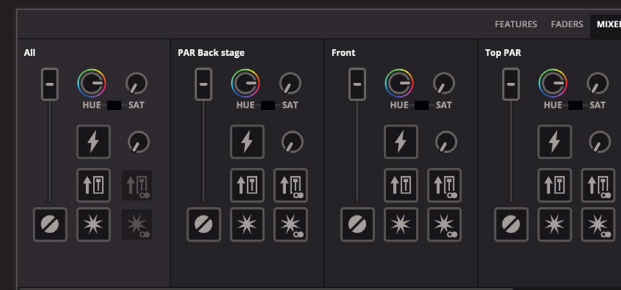

edit

Build your show with ease: add a **Scene**, select some fixtures, and set levels with faders, **color palette** and **pan/tilt grid**. Create stunning pixel, chase, curve, move and matrix effects with the easy to use **effects** tools. Playback scenes on a **timeline** and synchronise with audio with the new **Super Scene**.

live

Trigger scenes with a keyboard or **MIDI controller**. Manipulate your show 'on the fly' with hands-on live control of dimmer, speed, phase, size and scene progress. Sync a scene with **audio** or **BPM** from DJ Software. Perform live with help from the new **Live Mixer**.

touch

Create a **custom screen** layout to use on a touchscreen, or link with an **iPhone, iPad** or **Android** device over WiFi. Perfect for mobile control and for installations.

3D visualizer

Get to your gig fully prepared by building your lighting show before arriving. Lay out your show with **moving heads, scanners, LED's,** trussing and staging. Pre-render lighting effects, colors, dimmers and gobos with the real-time **Easy View 3D** tool.
