

Turf Producers' Select

Uncompromising Quality, Unmatched Performance

SUPER-ELITE BLUEGRASS PRODUCTION

It Takes a Little Bit Extra

Producing super-elite bluegrasses requires extra labor, clean ground, and costs more to ensure genetic and mechanical purity. In addition, the traits super-elites are bred for make production more difficult and slower, usually taking twice as long.

Super-elite bluegrasses are some of the smallest seeded varieties with seed counts in excess of 1.5 million per pound. The smaller seeds are similar in size to weed seeds so more time and care must be taken in the cleaner to ensure only the purist seed.

In order to ensure the most pure seed is delivered to Landmark customers a 50 gram sample, 5 times the normal sample size, is run through the seed testing lab. This ensures the cleanest seed reaches our customers.

Our Turf Producers' Select formulations are produced in blending facilities specializing in sod. The machinery is thoroughly cleaned and inspected between each batch and separate equipment is used for sod Bluegrass or sod Tall Fescue. Turf Producers' Select sod quality assurance continues through shipment as each pallet of sod seed is wrapped and segregated on the truck to further protect against potential cross contamination. With Turf Producers' Select, our attention to detail is second to none.

Crossover™

Mixed perfectly, combining the complimentary characteristics of both Turf-Type TF and Elite KB

FORMULATED WITH

Turf-Type Tall Fescue
Elite Kentucky Bluegrass

FEATURES & BENEFITS

- Greater Density
- Improved Disease Resistance
- Finer Texture

SEEDS PER POUND

~335,000

RATE

225-300 lbs/acre

ZONES

Northern, Transition, Southern
Transition

Diversity™

Greater genetic variability while also reducing the effect of cultivar specific weakness

FORMULATED WITH*

Super-Elite Kentucky Bluegrass
Elite Kentucky Bluegrass

FEATURES & BENEFITS

- Broad Genetic Diversity
- Early Spring Greenup
- Extended Winter Color

SEEDS PER POUND

~1,200,000+

RATE

50-100 lbs/acre

ZONES

Northern, Transition

**Three formulations available to meet your budget and application needs*

“Producing clean super-elite bluegrass seed takes a little bit extra and these Landmark varieties are worth it.”

Jason Miller, Owner/Operator | HiMark Farms | Othello, WA

Drought Star™

Designed for better drought performance and recovery from harsh summer conditions

FORMULATED WITH

Elite Kentucky Bluegrass
Texas-Kentucky Hybrid Bluegrass

FEATURES & BENEFITS

- Excellent Drought Recovery
- High Tensile Strength
- Good Wear Tolerance

SEEDS PER POUND

~1,150,000

RATE

50-100 lbs/acre

ZONES

Northern, Transition, Southern
Transition

Express™

Faster to establish and knit, producing high tensile strength sod and premium quality turf

FORMULATED WITH

Elite Kentucky Bluegrass
Texas-Kentucky Hybrid Bluegrass

FEATURES & BENEFITS

- Fast Establishing & Knitting
- Low-Mow & Wear Tolerant
- Aggressive

SEEDS PER POUND

~1,000,000

RATE

50-100 lbs/acre

ZONES

Northern, Transition

A-LIST Mix

Looking for more sustainable growth? Our A-LIST Mix combines high turf quality with low-input requirements; such as reduced water, chemical and fertility needs.

FORMULATED WITH

A-LIST Approved Varieties
Available as Straight Kentucky
Bluegrass Blend or as a Tall
Fescue/Kentucky Bluegrass Mix

ZONES

Northern, Transition, Southern
