

Bentgrass

UNCOMPROMISING QUALITY. UNMATCHED PERFORMANCE.

 **LANDMARK**
SEED COMPANY

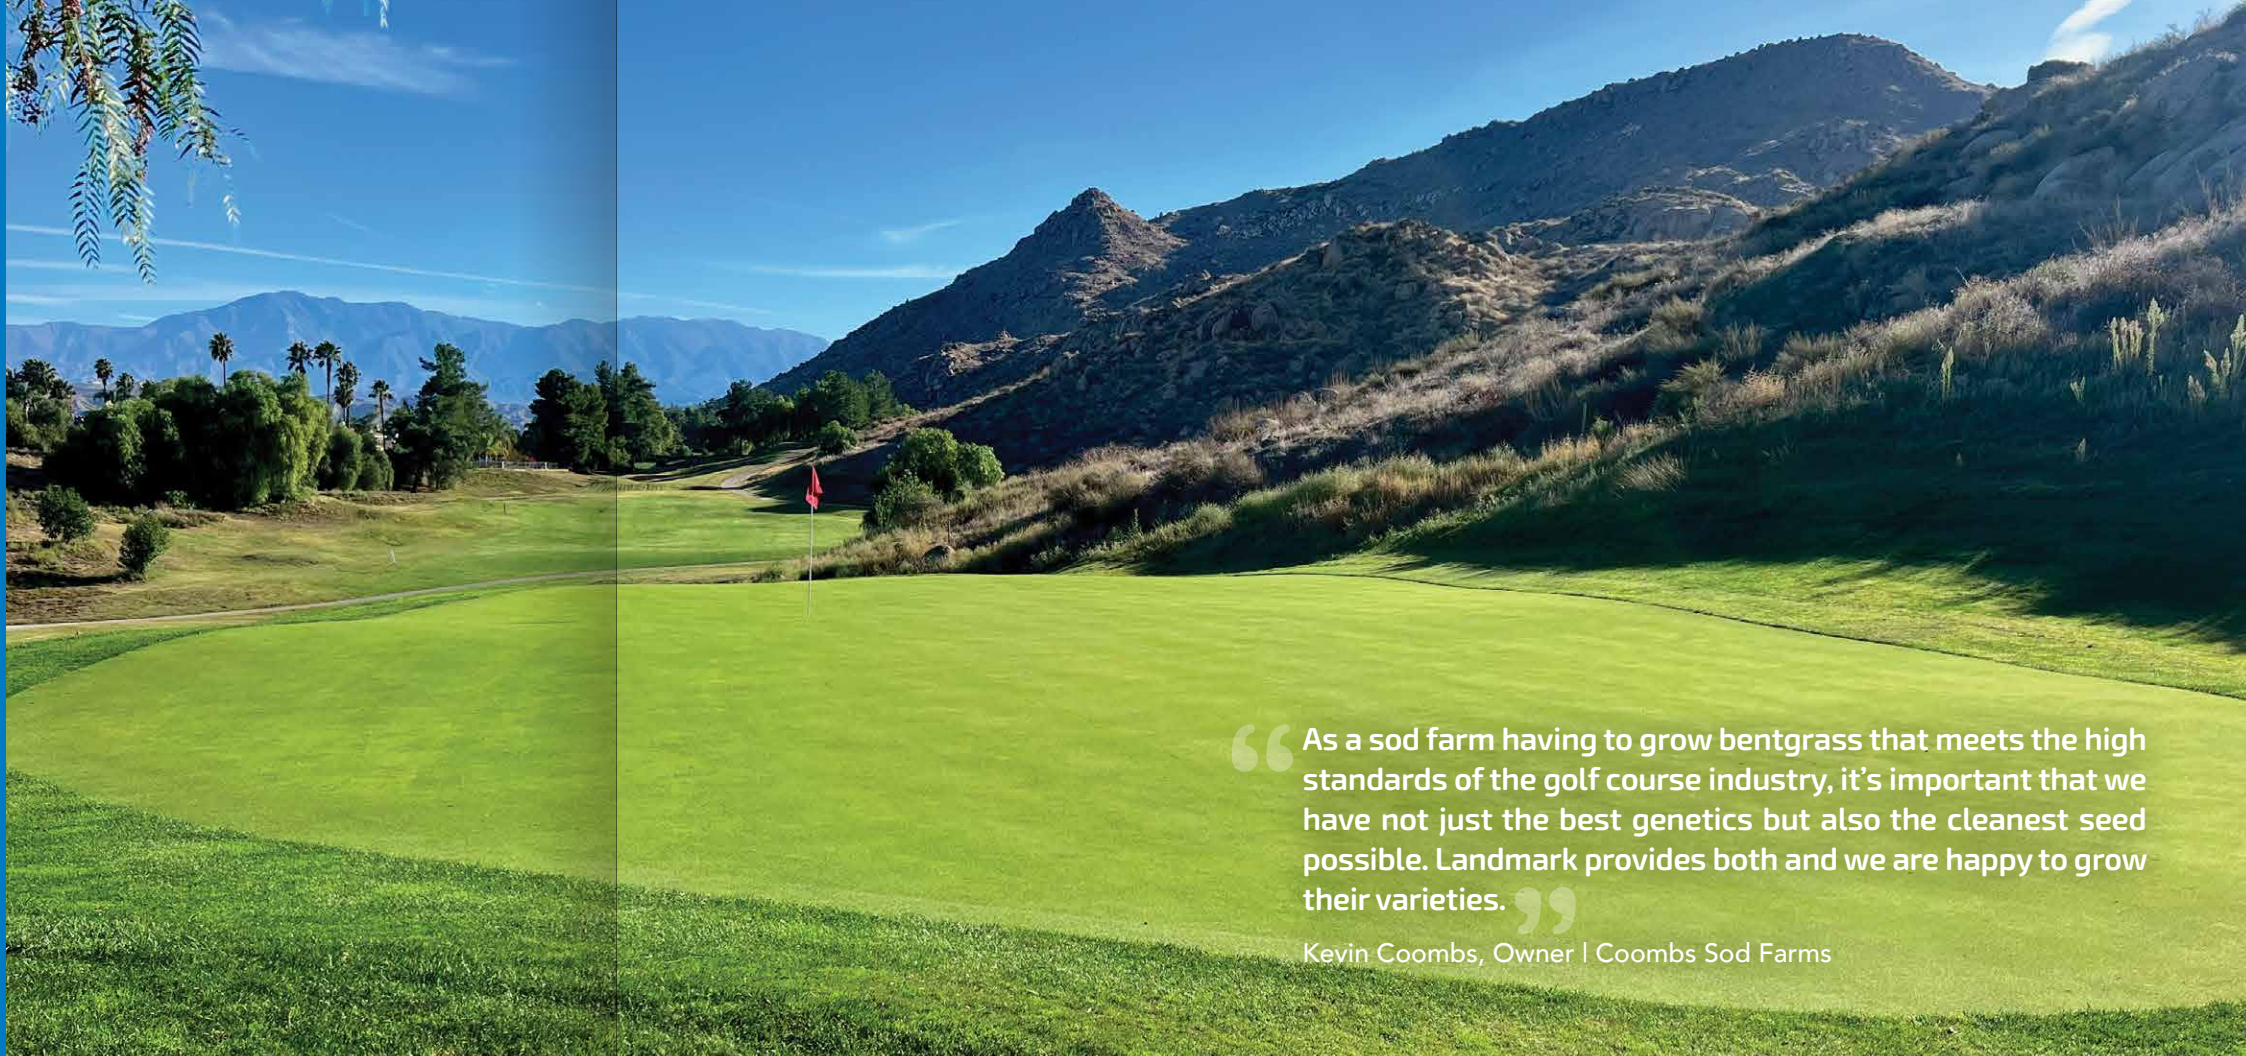

UNMATCHED SERVICE AND PRODUCTS

High-quality, value-added bentgrasses that reduce maintenance, therefore, saving time and money

Your golf course consists of many different microclimates, each requiring specific grassing solutions that are both playable and resilient. Landmark Seed Company has a solution to meet the unique needs of your environment. No matter what your conditions, level of maintenance, or design concepts, we can help you produce a world-class experience with the exceptional performance of Landmark's bentgrass. From the northern-most zones to the tropics, from the range tee to the 18th green and everywhere in between on your property, Landmark Seed Company has you covered.

“As a sod farm having to grow bentgrass that meets the high standards of the golf course industry, it's important that we have not just the best genetics but also the cleanest seed possible. Landmark provides both and we are happy to grow their varieties.”

Kevin Coombs, Owner | Coombs Sod Farms

LUMINARY

BENTGRASS

Luminary is the leading option for versatility and density when inter-seeding existing greens, tees, and fairways as a stand-alone cultivar or in premium performance blends. Luminary displays outstanding performance under take-all patch and snow mold disease pressure. It exhibits optimum color, density, and texture and was developed at Rutgers University from a broad genetic-based germplasm. Luminary has performed exceptionally well across multiple regions and in multiple independent tests.

FEATURES & BENEFITS

- Excellent Mowing Qualities
- Maintains High Turf Density All Year Long
- Superior Disease Resistance to Dollar Spot, Brown Patch and Anthracnose
- Early Spring Green Up

Spectrum

BENTGRASS

Spectrum is the latest generation creeping bentgrasses being developed at Rutgers University. Spectrum is the leading choice for golf courses that demand the highest turf quality and greatest resistance against a range of stresses. This variety is at the top of its class for Dollar Spot resistance, spring green up, traffic and wear tolerance in addition to overall turf quality. Optimal shoot density, pleasing bright green color and an upright growth habit make Spectrum the perfect choice for interseeding into older varieties.

FEATURES & BENEFITS

- Optimum Density
- Versatile for Tees and Fairways
- Fine Yet Durable Texture
- Resilient and Wear Tolerant with Good Divot Recovery
- Excellent Winter Color

Match Play

BENTGRASS

Match Play Creeping Bentgrass, *Agrostis palustris*, is the culmination of years of selection, screening, and uniting of a diverse array of proven parental clones for improved stress tolerance while purposefully avoiding extremes in color, density, and texture. It is a versatile and compatible Creeping Bentgrass. Match Play is new and improved, but don't expect it to stand out until others fold under pressure.

FEATURES & BENEFITS

- Excellent Heat Tolerance
- Next Generation Disease Resistance
- Versatile for Tees, Fairways and Greens
- Extensive Genetic Diversity
- Optimum Density without Specialty Maintenance
- Medium Dark Green Color – Avoids Color Extremes

Memorial was “championship proven” on the tees and fairways at Black Wolf Run Golf Course in Kohler, WI, host of the 2012 U.S. Women's Open Championship. Bred at Rutgers University for fine texture and optimum density plus dollar spot performance, Memorial will compliment and improve older generation Creeping Bentgrasses and is also ideal for improving turf quality and enhancing disease resistance in blends. Memorial is an excellent stand-alone variety or as a component of our Center Cut™ Blend to provide superior performance couple with premium genetic diversity.

FEATURES & BENEFITS

- Exceptional Tee, Fairway and Green Turf Quality
- Moderately Open Canopy Providing Outstanding Year-Round Density
- Medium-Dark Green Color
- Less Prone to Scalping

Center Cut™ is the best generation creeping bentgrass blend for golf course interseeding and new construction. It is agronomically formulated with Memorial and 13M Creeping Bentgrass for genetic diversity, compatible color, density, and texture to blend well when interseeded into existing Bentgrasses such as L-93, Penncross, and similar traditional cultivars.

FEATURES & BENEFITS

- Dark-Medium Green Color, Avoids Color Extremes for Blendability
- Optimum Density with No Puffiness
- Quick Divot and Ball Mark Recovery
- Early Spring Activity and Green Up
- Versatile for Tees, Fairways, and Greens
- Superior Dollar Spot Resistance
