

# BLUESTAR KENTUCKY BLUEGRASS

*Poa pratensis*

## DESCRIPTION

Bluestar Kentucky Bluegrass is a hybrid variety possessing good disease tolerances and a nice, green color. This Kentucky Bluegrass variety has improved resistance to diseases including leaf spot, stripe smut, fusarium blight, leaf and stem rust, and dollar spot. Bluestar is an aggressive root builder with an ability to withstand heat and drought and perform well in sun or light shade. Bluestar has a low-growth habit that reduces scalping and clippings when mowed. When used in a program of high fertility and managed soil pH, it will spread and withstand wear, traffic, and mechanical damage. EU Listed.

## APPLICATION

Home lawns, commercial turf, parks, cemeteries, recreational and sports turf, golf course roughs, sod production

## GEOGRAPHICAL ADAPTATION

Excellent quality throughout all cool season zones

## PRODUCTION AREAS

Pacific Northwest

## SEEDS PER POUND

~1,100,000

## SEEDING RATE

Overseeding: 1-2 lbs/1,000 sq ft

New seeding: 1.5-3 lbs/1,000 sq ft

*Local conditions vary and dictate rates*

## FEATURES & BENEFITS

- Consistent performer that provides excellent turf quality
- Excellent turf density with medium to fine leaf texture
- Resists dollar spot and stem rust
- Performs well in sun and moderate shade
- Improved wear tolerance and sod strength
