

LUNAR

KENTUCKY BLUEGRASS

Poa pratensis

DESCRIPTION

Lunar is an elite Kentucky Bluegrass with a deep, dark green color, fine texture, durable density, and excellent performance in all cool-season and transition regions of Kentucky Bluegrass use. Lunar exhibits good spring green up, improved heat tolerance and is rated very high in Drought Tolerance (Dormancy) trials. This variety is great for use in sod production, athletic fields, and golf turf blends and mixtures desiring a dark green color and elite performance. Lunar's dark green color, strong vigor, and responsiveness allow it to complement and compete with Perennial Ryegrasses when used in high performance sports turf mixtures. This aggressiveness also helps out-compete weed species resulting in improved establishment and high-quality turf for various uses.

APPLICATION

Athletic fields, golf courses, sports turf, lawn turf, sod production, sod seed

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones where Kentucky Bluegrass is used

PRODUCTION AREAS

Pacific Northwest

SEEDING RATE

Overseeding: 1.5-3 lbs/1,000 sq ft

New Seeding: 2-3 lbs/1,000 sq ft

Local conditions vary and dictate rates

FEATURES & BENEFITS

- Elite Midnight-type
- Dark color, fine texture
- Low mowing height
- Better fall color retention
- Quicker establishment
- Strong wear tolerance and faster recovery from drought and stress
- Improved pest resistance
- Better spring green up
