

SHANNON KENTUCKY BLUEGRASS

Poa pratensis

DESCRIPTION

Shannon establishes fast! An America-type hybrid, Shannon Kentucky Bluegrass captures elite turf performance, resulting in elite turf quality and excellent agronomic value. Fast to recover and quick to green up, Shannon is an improved variety and darker green than Shamrock-types, has medium-fine texture, durable density, and improved heat tolerance. It has an inherent vigor and responsiveness that speeds up knitting, sod formation, and ground cover density allowing it to better establish in blends with other Kentucky Bluegrasses and in mixtures with Tall Fescues and Perennial Ryegrasses. With its quick germination and establishment, Shannon is a must use ingredient for sod, athletic field, and golf turf blends and mixtures.

APPLICATION

An elite ingredient for sod, athletic fields, and golf turf blends and mixtures.

Used in super competitive situations like overseeding into existing stands and using mixtures than contain Perennial Ryegrass.

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones where Kentucky Bluegrass is used

PRODUCTION AREAS

Pacific Northwest

Shannon Kentucky Bluegrass has an inherent vigor and responsiveness that speeds up knitting, sod formation, and ground cover density.

FEATURES & BENEFITS

- Landmark's fastest establishing Kentucky Bluegrass variety
- Earlier spring green up
- Better fall color retention
- Strong wear tolerance
- Faster recovery from drought and stress
- Improved pest resistance
- Improved darker green color
- **MD/VA RECOMMENDED**

SEEDING RATE

Overseeding: 1.5 – 3 lbs/1,000 sq ft

New Seeding: 2 – 3 lbs/1,000 sq ft

Local conditions vary and dictate rates
