

# TEXAS HYBRID BLUEGRASS

*Poa arachnifera x Poa pratensis*

## DESCRIPTION

Texas Hybrid Bluegrass, is a cool-season, perennial cross between Kentucky Bluegrass and Texas Bluegrass. It produces a turf that has improved heat and drought tolerance derived from the Texas Bluegrass while maintaining excellent turf characteristics and uniformity typical of Kentucky Bluegrass. Seed size, seeding rates, germination, establishment, and handling is very similar to Kentucky Bluegrass. It will establish well and persist under conditions of drought that would cause other species to die off or become dormant. SPF 30 and United are common varieties of Texas Hybrid Bluegrass.

## APPLICATION

Turf, home lawns

## GEOGRAPHICAL ADAPTATION

Cool-season zone

## SEEDS PER POUND

~1,200,000

## SEEDING RATE

130 – 175 lbs/acre

*Local conditions vary and dictate rates*

## FEATURES & BENEFITS

- Heat and wear tolerant
- Moderate winter dormancy
- Drought tolerant with good recovery
- Extensive rhizomes
