

RED HAWK

PERENNIAL RYEGRASS

Lolium perenne

DESCRIPTION

Red Hawk is an improved Turf-Type Perennial Ryegrass for use on heavy-use sports fields and on the golf course, as well as lawn applications that demand turf quality, disease, and traffic performance. Red Hawk is a sister variety to Gallop Perennial Ryegrass with superior color and texture that blends well with other cool-season grasses. Its ability to tolerate a low height of cut make it an excellent companion in seed mixtures used for establishing professional turf as well as overseeding both cool and warm season grasses.

APPLICATION

- Golf course fairways, tees, and roughs, sports turf, lawn and landscaping
- Use in professional GLS Ryegrass blends and mixtures with other cool-season species including low-cut Kentucky Bluegrass

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones, arid regions with irrigation, warm-season zones for winter over-seeding of Bermudagrass turf

PRODUCTION AREAS

Oregon, Upper Midwest

SEEDS PER POUND

~250,000

FEATURES & BENEFITS

- Ideal in areas with fast establishment and wear tolerance issues
- Very good traffic tolerance
- Excellent year-round turf density and quality
- Improved disease resistance

SEEDING RATE

Warm Season Overseeding:

15+ lbs/1,000 sq ft

Cool Season Overseeding:

5-7 lbs/1,000 sq ft

Cool Season New Seeding:

8-10 lbs/1,000 sq ft

Local conditions vary and dictate rates
