Exp.# A03-1017

Bluebank KENTUCKY BLUEGRASS

DESCRIPTION

Bluebank- The latest *SUPER ELITE* Kentucky Bluegrass. Bluebank's proven traffic tolerance, disease resistance, dark green color, medium fine-texture, uniformity, durability, and density earn It *Super Elite status* suitable for professional sports stadiums and tournament golf.

APPLICATIONS

Use for sod production, athletic field, and golf turf blends and mixtures. In supercompetitive situations like over-seeding into existing stands, and using mixtures that contain perennial ryegrass, Bluebank will establish well, and tolerate wear, resulting in more Kentucky bluegrass in the stand. Bluebank is also a key ingredient in sod seed blends, adding superior performance and genetic diversity, to the most high profile venues.

GEOGRAPHICAL ADAPTATION

Cool season and transition zones where Kentucky bluegrass is used.

FEATURES & BENEFITS

Super Elite- Compact Type

Dark Color, Medium-Fine Texture

Low Mow

Superior wear tolerance

Improved resistance to summer patch, dollar spot and red thread.

Superior uniformity

PRODUCTION AREAS

Washington

RATE

Overseeding 1.5–3 lbs./1,000 Sq. Ft. New Seeding 2-3 lbs./1,000 Sq. Ft.
