

SALINAS II (PST-204D)

Turf Type Perennial Ryegrass

DESCRIPTION

Salinas II, has a dark green color, a very fine blade width and excellent turf performance with good salt tolerance. Its salt tolerance lends itself to fall overseeding programs in the desert Southwest and other areas affected by salinity. With quick establishment, it provides a beautiful, wear-tolerant playing surface with a smooth spring transition.

APPLICATIONS

Golf, Sports, Sod Production, & Lawn Turf

GEOGRAPHICAL ADAPTATION

Adapted to the cool season, transition zones, winter overseeding Bermuda turf and arid regions with irrigation.

PRODUCTION AREAS

Pacific North West, Upper Midwest

SEEDING RATE (POUNDS/ACRE)

200 - 700 Pounds

FEATURES & BENEFITS

- Wear Tolerant.
- Excellent turf quality
- Excellent gray leaf spot tolerance
- Quicker Establishment

NTEP 2006 - 10 RESULTS

- Top 5 Turfgrass Quality 5.5
- Top 10 Spring Greenup 6.6
- Rated #3 Winter Kill 2.0
