

# 13 M

## CREEPING BENTGRASS

### DESCRIPTION

13M holds the highest overall final rating in the multi-year National Fairway or Tee test (www.ntep.org, 2004-2007 Data). Similar in appearance to Memorial Creeping Bentgrass, 13M is a proven performer for interseeding and improving existing tees and fairways. 13M is less prone to scalping than the puffy, super-dense bents and has a medium dark green genetic color that blends well with other creeping bents. Turf quality ratings in this National test, 13 M rated #1 in the transition zone, and was either tied for #1 or is in the #1 statistical rating in the North East, North Central and Pacific reports. Additional #1 statistical ratings include low maintenance, traffic, summer density & % living ground cover in summer, winter color, drought tolerance, poa annua competition & mowing quality. Superb disease pressure performance includes dollar spot, brown patch, pythium and microdochium patch. 13M is an excellent standalone creeping bentgrass or can be used in Center Cut™ Blend to provide superior performance coupled with genetic diversity.

### APPLICATIONS

Putting Greens, Tees & Fairways

### GEOGRAPHICAL ADAPTATION

Adapted to the cool season and transition zones.

### SEEDS PER POUND

~6,000,000

### PRODUCTION AREAS

Pacific North West, USA

### FEATURES & BENEFITS

- Exceptional Fairway and Tee Turf Quality
- Excellent Disease Resistance
- Provides Outstanding Year-Round Density
- Less Prone to Scalping

### RATE\*

1-2 Lbs/1000 sq. ft.

\*local conditions vary and dictate rates
