MATCH PLAY CREEPING BENTGRASS

*Agrostis stolonifera*

**DESCRIPTION**

Match Play creeping bentgrass is the culmination of years of selection, screening, and combining of a diverse array of proven parental clones for improved stress tolerance while purposefully avoiding extremes in color, density, and texture. It is a versatile and compatible creeping bentgrass. Match Play is new and improved, but don’t expect it to stand out until others fold under pressure.

**APPLICATIONS**

- Golf course putting greens, fairways, tees

**GEOGRAPHICAL ADAPTATION**

Cool-season and transition zones where creeping bentgrass is used

**PRODUCTION AREAS**

- Oregon

**SEEDS PER POUND (approximate)**

6,000,000

**FEATURES & BENEFITS**

- Next generation heat tolerance and disease resistance
- Medium dark green color – avoids color extremes
- Optimum density without puffiness and specialty maintenance
- Versatile for tees, fairways, and greens
- Quick divot and ball mark recovery
- Extensive genetic diversity
- Early spring activity and green up

**SEEDING RATE (pounds/1,000 ft²)***

- Inter-seeding: 0.5-2
- New Seeding: 1-2

*local conditions vary and dictate rates
