

# DOUBLE COVERAGE™

## *Sod Seed Blend*

### DESCRIPTION

Double Coverage™ is the most heat and drought persistent seed mixture of cool-season turfgrasses we offer for sod producers targeting golf course roughs, sports turf, lawns, and parks. Double Coverage™ combines our high-quality Turf-Type Tall Fescue with SPF 30 Texas Hybrid Bluegrass, our heat tolerant Texas x Kentucky Bluegrass cross. By combining the two species, genetic diversity is increased, traits are complementary, drought and wear tolerance are improved, and added protection against disease is expressed. Double Coverage™ mixture performs better under brown patch pressure and the deep rhizomes of SPF 30 rapidly repair from wear damage, heat stress, and drought stress.

### FORMULA

\* Example:

90% Improved Turf-Type Tall Fescue  
10% SPF 30 Texas Hybrid Bluegrass

\*ask for current or custom formulations

### SEEDS PER POUND (approximate) \*

335,000

\*seed count estimate – actual counts vary by lot

### SEEDING RATE \*

225-350 pounds/acre  
5.5-8 pounds/1,000 ft<sup>2</sup>

\*local conditions vary and dictate rates

### FEATURES & BENEFITS

Heat tolerant

Fast establishing

Fast knitting

High tensile strength – may be managed and harvested without netting

Premium genetic diversity

Good wear tolerance

Long-term disease tolerance
