

SHANNON KENTUCKY BLUEGRASS

Poa pratensis

Exp. A05-319

DESCRIPTION

Shannon establishes fast! An America-type hybrid, Shannon Kentucky Bluegrass captures elite turf performance, resulting in elite turf quality and excellent agronomic value. Fast to recover and quick to green up, Shannon is an improved variety and darker green than Shamrock-types, has medium-fine texture, durable density, and improved heat tolerance. It has an inherent vigor and responsiveness that speeds up knitting, sod formation, and ground cover density allowing it to better establish in blends with other Kentucky Bluegrasses and in mixtures with Tall Fescues and Perennial Ryegrasses. With its quick germination and establishment, Shannon is a must use ingredient for sod, athletic field, and golf turf blends and mixtures.

APPLICATIONS

An elite ingredient for sod, athletic fields, and golf turf blends and mixtures.

Used in super competitive situations like overseeding into existing stands and using mixtures than contain Perennial Ryegrass.

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones where Kentucky Bluegrass is used

PRODUCTION AREAS

Pacific Northwest

FEATURES & BENEFITS

Landmark's fastest establishing Kentucky Bluegrass variety

Earlier spring green up

Better fall color retention

Strong wear tolerance

Faster recovery from drought and stress

Improved pest resistance

Improved darker green color

★ MD/VA Recommended

SEEDING RATE (pounds/1,000 ft²) *

Overseeding: 1.5-3

New Seeding: 2-3

*local conditions vary and dictate rates
