

WOODALL CHEWINGS FESCUE

Festuca rubra var. falax

DESCRIPTION

Woodall Chewings Fescue, *Festuca rubra var. falax*, is excellent for use in shade, low input mixtures, and blends requiring reduced fertilizer, irrigation and mowing which saves time and money. It excels in sun and shade mixtures for lawn and golf course rough use. Woodall Chewings Fescue was developed and tested in the transition zone.

Woodall Chewings Fescue was named in honor of the late Don Woodall, a career seedsman, friend, and colleague of many in the green industry.

APPLICATIONS

Low input turf, sun or shade mixtures, close-cut tees and fairways, overseeding tee and fairways, divot mixes, Bentgrass/Fescue turf mixes

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones, arid regions

PRODUCTION AREAS

Pacific Northwest

SEEDS PER POUND (approximate)

365,000

FEATURES & BENEFITS

Excellent for low and high maintenance sites

Strong seedling vigor and establishment – excellent for overseeding

Contains endophytes for improved insect resistance

Handles minimal mowing and reduced fertilizer

Performs under tee and fairway maintenance requirements

Dense, fine, and brilliant colored turf

SEEDING RATE (pounds/1,000 ft²) *

Overseeding: 3-4

New seeding: 5-6

*local conditions vary and dictate rates
