

RED HAWK PERENNIAL RYEGRASS

Lolium perenne

DESCRIPTION

Red Hawk is an improved Turf-Type Perennial Ryegrass for use on heavy-use sports fields and on the golf course, as well as lawn applications that demand turf quality, disease, and traffic performance. Red Hawk is a sister variety to Gallop Perennial Ryegrass with superior color and texture that blends well with other cool-season grasses. Its ability to tolerate a low height of cut make it an excellent companion in seed mixtures used for establishing professional turf as well as overseeding both cool and warm season grasses.

APPLICATIONS

Golf course fairways, tees, and roughs, sports turf, lawn and landscaping

Use in professional GLS Ryegrass blends and mixtures with other cool-season species including low-cut Kentucky Bluegrass

FEATURES & BENEFITS

Ideal in areas with fast establishment and wear tolerance issues

Very good traffic tolerance

Excellent year-round turf density and quality

Improved disease resistance

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones, arid regions with irrigation, warm-season zones for winter overseeding of Bermudagrass turf

PRODUCTION AREAS

Oregon, upper Midwest

SEEDS PER POUND (approximate)

250,000

SEEDING RATE (pounds/1,000 ft²) *

Overseeding (warm-season): 15+

Overseeding (cool-season): 5-7

New Seeding (cool-season): 8-10

*local conditions vary and dictate rates
