

MATCH PLAY CREEPING BENTGRASS

Agrostis stolonifera

DESCRIPTION

Match Play Creeping Bentgrass is the culmination of years of selection, screening, and uniting a diverse array of proven parental clones for improved stress tolerance while purposefully avoiding extremes in color, density, and texture. It is a versatile and compatible Creeping Bentgrass. Match Play is new and improved, but don't expect it to stand out until others fold under pressure.

APPLICATION

- Golf course putting greens, fairways, tees

GEOGRAPHICAL ADAPTATION

Cool-season and transition zones

PRODUCTION AREAS

Oregon

SEEDS PER POUND (APPROXIMATE)

~6,000,000

FEATURES & BENEFITS

- Next generation heat tolerance and disease resistance
- Medium dark green color – avoids color extremes
- Optimum density without puffiness and specialty maintenance
- Versatile for tees, fairways, and greens
- Quick divot and ball mark recovery
- Extensive genetic diversity
- Early spring activity and green up

RATE*

- Inter-seeding: 0.5 – 2 lbs./1,000 ft².
- New Seeding: 1 – 2 lbs./1,000 ft².

*Local conditions vary and dictate rates
