# Competency Assessment made simple. **Just for you.**

Clinical Workforce Management Software

StaffReady® features

- Full implementation using your existing content
- Upload, create and monitor checklists and quizzes
- Send in bulk newly published training documents
- Meets all six CLIA requirements, including Proficiency Testing and Blind Samples
- Manage employee task deadlines and timelines through a web-connected dashboard
- Centralized assessment management
- Compatible with all lab test systems and accreditations

Are you managing competency assessments for laboratory staff? You understand the challenge of staying inspection ready with spreadsheets, binders and shared drives. We've worked with a team of lab experts to understand workforce management challenges and to create solutions specific to the needs of the laboratory environment. StaffReady Competency delivers a customized, lab-specific competency assessment management solution that runs in the cloud. Trained service advisors help client partners manage their workflows within the software through the life of a software subscription. Say goodbye to paper and headaches. Say hello to seamless competency automation.

Our products run on everything.
Any time. Anywhere. Any device.

We Solve Competency Asssesment Headaches

" The amount of time StaffReady Competency saves us is phenomenal. I don't spend hours of my day figuring out who needs assessments, tracking down supervisors, and rearranging benches. With StaffReady I spend 10 minutes instead of the whole day.

Renata Carson
Assistant Laboratory Manager
DynaLIFE DX

Automate all of competency assessment procedures and documentation.

Get rid of the three-ring binders and file folders. Automatic workflows and smart triggers provide the structure and tracking you need with automated reminders, task and assessment tracking, and remedial pathway notifications.

Centralize all records for tracking and accuracy.

Our complete cloud-based solution keeps your data safe and secure, with a dashboard interface offering real-time access for both managers and employees. Inspection time? No problem. Search all data from any screen; automatic audit trails track all tasks, changes, signatures, and date/time stamps.

Manage all six competency assessment procedures, and all types of lab testing.

Master all six procedures of competency assessment (direct observation, monitoring test results, record review, performance of maintenance, proficiency testing, and problem solving), and all types of lab testing (high complexity, moderate complexity testing including provider performed microscopy, and waived testing).

Customize to fit your unique needs.

Our solution quickly becomes your solution. We can customize to meet any governmental regulations or accrediting standards. Create and customize additional standards and checklists, and create problem solving assessments to fit your organization.
