

V2.0.1r

New feature:

- You can now trigger Slide and accent via CCs : send any value to CC 85 for an accent, and any value to CC 86 for a slide.
- Error handling and management : there is now a way to display error and dump project in case of error for analysis and recovery. If your Mono's sequencer blinks with a code, it means an error occurred, contact us!

Bug fixes :

- Some improvement and fixes to the V1 project transcription as well as update procedure issue have been solved.
- Pattern Copy/Paste now works correctly
- UI improvement : LED brightness difference in some mode has been increased
- Fixed some issue with the CC implementation
- MIDI/USB clock improvement
