

Aero Slide

Invisible Coating & Bug Shield

North Woods® Aero Slide was designed specifically for the aerospace industry, but is excellent anywhere where a soil repelling barrier is beneficial.

Aero Slide polishes, protects, and shines while leaving a molecular film that greatly reduces drag coefficient. It also contains a mild cleaner that serves to prepare surfaces for bonding with its space age polymer formulation. This polymer coating aids in preventing bug, exhaust, dirt, dust, and other environmental pollutants from bonding. Treated surfaces repel water and soil, so they stay cleaner longer! Plus, makes secondary cleaning easier!

Aero Slide excels on planes, RV's, cars, motorcycles, boats, snowmobiles, tractors, watercraft, lawnmowers, and other outdoor equipment. It's even fantastic on heavy traffic glass and glass display cases!

BENEFITS

- Super repelling formula
- Micro coating polymers protect finish from environmental damage
- Polishes, protects, and shines surfaces
- Molecular film reduces drag coefficient
- Helps prevent against bug, exhaust, dirt, dust, and other surface fowling agents
- Non-Abrasive
- Prevents fogging
- Surfaces stay cleaner longer
- Makes secondary cleaning easier
- Crystal clear
- Safe on any surface not harmed by water
- Biodegradable

DIRECTIONS FOR USE

Shake well before using. Remove protective cap. Point opening in spray tip toward surface to be cleaned. Hold can 6 to 8 inches from surface. Apply with a smooth, even motion. Clean with a dry, clean cloth or microfiber towel. Additional coats will improve water/soil repelling capabilities.
